ROSENOW SKIN REACTION IN SCHIZOPHREНИA

behave relatively normally tend to react negatively to all four substances. However, it was not the purpose of this paper to establish this point.

We should like to thank all those who have helped us with this work, particularly Mr. Warne and Mr. Hadley in the laboratory, members of the nursing staff at Shenley Hospital, and Miss E. Fellowes for her secretarial help. We should also like to thank Dr. E. C. Rosenow for his helpful cooperation and encouragement in carrying out this study, and Dr. S. T. Hayward, of Shenley Hospital, for permission to carry out the work.
