Automation and Data Processing in Pathology

Symposium organized by The College of Pathologists

Edited by Professor T. P. Whitehead

Automatic scanning for cervical smears
Automation in diagnostic bacteriology
Serological techniques
Multichannel continuous flow analysis on the SMA-4/-7A
An evaluation of the Coulter model S
Automated blood group serology
Continuous-flow techniques for tests in clinical chemistry
Discrete analysis systems
Computer operations and the structure of information
The laboratory and patient records
Problems and benefits of using a computer for laboratory data processing
Data processing in histopathology
Basis of data control for anatomical pathology
Analysis of hospital bacteriological data
Computers in bacteriology
A data processing system for haematology
Computer processing of biochemical information without going on-line
Experience with on-line computing in clinical chemistry
Concluding remarks

PRICE 30s. (U.S.A. $3.75) including postage
