Chorea, polycythaemia, and cyanotic heart disease. I. Chorea, polycythaemia, and morbus coeruleus P. D. EDWARDS, R. PROSSER, and C. E. C. WELLS.............................................................................page 729

Sporadic ulcerative mutilating acropathy with imbalance of free amino acids in the cerebrospinal fluid F. MONACO, A. RICCIO, A. COVACICH, L. DURELLI, M. T. GIORDANA, and L. PALMUCCI........................................page 740

Acute unilateral hydrocephalus resulting from oedematous occlusion of foramen of Monro: complication of intraventricular surgery THOMAS H. MILHORAT, MARY K. HAMMOCK, and DAVID L. BRECKBILL.........................................................................page 745

Effects of stimulus site on the pattern of skin conductance responses evoked from spinal man MARCUS J. FUHRER.............................................................................................................page 749

Normal ulnar nerve conduction velocity across the thoracic outlet: comparison of two measuring techniques GARY W. LONDON............................................................................................................page 756

Myotubular myopathy associated with cataract and electrical myotonia C. H. HAWKES and M. J. ABSOLON........................................................................................................................................page 761

Alterations in cerebral blood flow produced by hypotension: a comparison of methods FRANCIS W. GAMACHE and GEORGE M. DOLD..................................................................................................................page 765

Experimental neuropathy produced by 2,5-hexanediol—one major metabolite of the neurotoxic industrial solvent methyl n-butyl ketone PETER S. SPENCER and HERBERT H. SCHAUMBURG........................................................................page 771

Intraosseous neurilemmoma of the cervical spine causing paraparesis and treated by resection and grafting C. E. POLKEY............................................................................................................page 776

Symptomatic Rathke's cleft cyst with amyloid stroma S. CONCHA, B. P. M. HAMILTON, J. C. MILLAN, and J. DONALD MCQUEEN.............................................................................................................page 782

Note on the scoliosis of Parkinsonism ROGER C. DUVOISIN and C. DAVID MARSDEN...........................................................................................................page 787

Cognitive deficits associated with chronic hepatic encephalopathy and their response to levodopa ALICK ELITHORN, MICHAEL LUNZER, and JOHN WEINMAN.............................................................................................................page 794

Safety factor in single human motor end-plates studied in vivo with single fibre electromyography ERIK STÅLBERG, HANS H. SCHILLER, and MARTIN S. SCHWARTZ......................................................................................................................page 799

Regional curare for the reduction of the safety factor in human motor end-plates studied with single fibre electromyography HANS H. SCHILLER, ERIK STÅLBERG, and MARTIN S. SCHWARTZ..................................................................................page 805

Brain damage after intrathecal methotrexate BARBARA SMITH.........................................................................................................................page 810

Precentral cerebellar vein in cystic astrocytomas of the vermis LEO N. HOPKINS and LOUIS BAKAY....................................................................................page 816

Traumatic disruption of the sacral root sheath G. PADBERG and L. N. M. COENE.............................................................................................................page 819

Proceedings of the Society of British Neurological Surgeons....................................................................................................................page 822

Book reviews........................................................................................................page 830
