Presentation
Madopar contains a combination of levodopa and the decarboxylase inhibitor benzerazide in the ratio of 4:1.
Madopar 62.5 capsules containing 50mg levodopa and 14.25mg benzerazide hydrochloride (equivalent to 12.5mg of the base).
Madopar 125 capsules containing 100mg levodopa and 25 mg benzerazide hydrochloride (equivalent to 25mg of the base).
Madopar 250 capsules containing 200mg levodopa and 57mg benzerazide hydrochloride (equivalent to 50mg of the base).

Indications
Parkinsonism – idiopathic, post-encephalitic.

Dosage
Dosage is variable and the data sheet should be consulted for full details. The effective daily dose usually lies between four and eight capsules of Madopar 125 (two to four capsules of Madopar 250) daily in divided doses; most patients requiring no more than six capsules of Madopar 125 daily. In some elderly patients initial treatment with one capsule of Madopar 62.5 once or twice daily, increasing by one capsule every third or fourth day may suffice.
Patients who experience fluctuations in response may also benefit from administration of smaller and frequent doses using Madopar 62.5.

Contra-Indications
Narrow-angle glaucoma, severe psychotomoroses or psychoses. It should not be given in conjunction with monoamine oxidase inhibitors or within two weeks of their withdrawal; to patients under 25 years of age; to pregnant women; or to patients who have a history of, or who may be suffering from, a malignant melanoma.

Precautions
Drugs which interfere with central nervous mechanisms should be avoided. Endocrine, renal, pulmonary or cardiovascular disease, hepatic disorder, peptic ulcer, osteoporosis, sympathomimetic drugs, antihypertensive drugs. Patients who improve on Madopar therapy should be advised to resume normal activities gradually as rapid mobilisation may increase the risk of injury.

Side-effects
Nausea and vomiting; cardiovascular disturbances; psychiatric disturbances; involuntary movements.

Packings
Madopar 62.5 capsules, Madopar 125 capsules and Madopar 250 capsules in packings of 100.

Licence Numbers
0003/0125 (Madopar 62.5 capsules) 0001/0040 (Madopar 125 capsules) 0003/0074 (Madopar 250 capsules).

Basic NHS Cost
Madopar capsules 62.5 £0.49 per 100
Madopar capsules 125 £0.69 per 100
Madopar capsules 250 £1.25 per 100

Madopar is a trade mark.
J5214V/580.

Mozart, in his Clarinet Quintet, achieved harmony with a balance of 4 + 1.

Roche, with Madopar, struck the right balance of 4 + 1 with levodopa and the decarboxylase inhibitor benzerazide. Chosen from several ratios as the one giving the best results in clinical practice, this combination has proved its rightness over a decade of clinical experience.

The 4 + 1 preparation of levodopa and benzerazide has recently added another string to its bow. In a comparative trial it was shown to be preferred by patients to a 10 + 1 preparation of levodopa and carbidopa because of its better gastro-intestinal tolerance in the critical first three months of treatment.

Madopar
levodopa plus benzerazide
balanced for optimal performance in Parkinson's disease
62.5, 125 and 250

Why is CELLOLITE so much better, so much safer than other patties? Consider its properties:

• **SOFT** – no damage to delicate tissue.
• **X-RAY DETECTABLE** – overall X-Ray opacity for added safety – just in case.
• **FIBRE-FREE** – no loose fibres or particles which may be left behind resulting in granulomas and other lesions.
• **TESTED** – exhaustive tests, approved by the DHSS, show CELLOLITE to be safer than fibrous patties.

No other neuropatties have been so stringently tested. No other neuropatties have these properties. Be safe – choose CELLOLITE.

STATISTICS AT SQUARE ONE

by T. D. V. SWINSCOW

from the British Medical Journal

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step-by-step instruction. Subjects covered include standard deviation, $\chi^2$ tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation not published in the B.M.J. series. Methods specially adapted to pocket calculators.

"The ability to put symbols in sequence may well be one of the greatest advances in man's development... This excellent and attractive volume will give you an idea into which category an article or projected article fits. The ink you save may be your own. It is superb value."  

"This gem of a practical booklet squeezes the essence of biostatistics into 75 well-written, well-organized pages. Newcomers to the field will like the way obscure concepts are clarified; experts will find the book valuable as a teaching aid."

Fellowship in Clinical Neurosurgery

Lahey Clinic Medical Center Burlington, Mass. offers six to twelve month salaried fellowships in general clinical neurosurgery including clinical microsurgery and spinal surgery for individuals who are in, or who have completed neurosurgical training.

For information write:
Dr. Charles Fager,
Chairman, Department of Neurosurgery,
Lahey Clinic Foundation Medical Center,
45 Burlington Mall Rd.
Burlington, MA 01803

Neurosurgeon

A 450 bed general hospital is accepting applications for a neurosurgeon. We will also welcome applications for a neurosurgical team.

Applications and nominations should be forwarded immediately to:
Dr. R. A. Haliburton,
Chairman, Search Committee,
Hotel-Dieu Hospital,
1030 Ouellette Avenue,
Windsor, Ontario N9A 1E1
Canada.

WEST OF SCOTLAND COMMITTEE FOR POSTGRADUATE MEDICAL EDUCATION

Comprehensive Course in Electrophysiology
6th to 10th APRIL, 1981

to be held in the University Department of Neurology, at the Institute of Neurological Sciences, Southern General Hospital, Glasgow

This course of lectures and demonstrations is designed for newcomers and practising electrophysiologists. It will cover the routine techniques and the most recent advances in the subject.

Topics will include: basic principles and practical procedure; conduction velocity measurements; needle electromyography; nerve accommodation; the motor unit; cerebral evoked responses; reflexology; tremor; the autonomic nervous system; quantitative methods and single fibre EMG.

Lecturers will include Professor J A Simpson, Dr J P Ballantyne, Dr S Hansen, Dr A McInnes and Dr A I Weir.

Accommodation will be available in the Queen Margaret Hall of Residence at a charge of £40.40 from Monday to Friday (Dinner, Bed and Breakfast for four nights).

The course fee will be £85.

Further details and application forms may be obtained from:
