The Editorial Committee welcomes original papers, which should be addressed to the Editor, Journal of Neurology, Neurosurgery, and Psychiatry, BMA House, Tavistock Square, London WC1H 9JR. Papers are accepted on the understanding that the subject matter has not been and will not be published in any other journal. Papers should deal with original matter and the discussion should be closely relevant to this. Manuscripts should be typewritten in double spacing on one side of the paper only. Two copies (including figures and tables) should be submitted of which only one need be a top copy. A summary of about 50 words should appear at the beginning of each paper. The name(s) of the hospital or laboratory should also appear. Full postal address for correspondence and reprints should be supplied. Receipt of manuscripts will be acknowledged.

The Editor will welcome Short Reports or Preliminary Communications limited to about 1000 words and with no more than one figure and one table. Also welcome are Letters to the Editor.

Ethics Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council’s publications on the ethics of human experimentation, and the World Medical Association’s code of ethics, known as the Declaration of Helsinki (see British Medical Journal 1964;2:177)).

Illustrations Photographs Unmounted photographs on glossy paper should be provided together with magnification scales when appropriate. Diagrams will be reduced to 2¾ inches (68 mm) wide, occasionally to 3¼ inches (145 mm). Lettering should be in either Letraset or stencil and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text. They should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet. The format used in this issue of the Journal should be noted. Vertical lines will not be printed and usually there are only three horizontal lines in each table.

References should be in the Vancouver style as in this issue. They should appear in the text by number only in the order in which they occur and should be listed on a separate sheet in the same order. Punctuation must be correct and journal titles should be in full or abbreviated in accordance with the Index Medicus. Thus:

A reference to unpublished work should not appear in the list but work “in press” may be included provided the name of the journal appears. The author is responsible for the accuracy of references.

Reprints Twenty-five reprints will be supplied free of charge. Additional reprints are available at cost if they are ordered when the proof is returned.

Corrections other than printer’s errors may be charged to the author.

No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means—electronic, mechanical photocopying, recording, or otherwise—without the prior permission of the Journal of Neurology, Neurosurgery, and Psychiatry.

Notice to Advertisers Applications for advertisement space and rates should be addressed to the Advertisement Manager, JOURNAL OF NEUROLOGY, NEUROSURGERY, AND PSYCHIATRY, BMA House, Tavistock Square, London WC1H 9JR.

Notice to Subscribers The Journal is published monthly. The annual subscription rate is £44 in the United Kingdom and Republic of Ireland, and US $109 in all countries overseas. Payments for overseas subscriptions should be made in US dollars, or in other currency based on the prevailing exchange rate to the US dollar of that currency payable to the British Medical Association and addressed to the Subscription Manager, Journal of Neurology, Neurosurgery, and Psychiatry, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: British Medical Journal, Box 560B, Kennebunkport, Maine 04046, USA. All enquiries, however, must be addressed to the Publisher in London).

No 1 JANUARY 1982

Amaurosis fugax: some aspects of management PJ PARKIN, BE KENDALL, J MARSHALL, WI MCDONALD .......................... 1
Auditory evoked phosphens in optic nerve disease NGR PAGE, JP BOLGER, MD SANDERS ................................. 7
Swelling of the optic nerve head: a staging scheme LARS FRISÉN ............................................................................. 13
Spontaneous rhythmic motor unit potentials in the carpal tunnel syndrome F SPAANS ......................................................... 19
The clinical picture of ectasia of the intracerebral arteries YL YU, IF MOSELEY, P PULLICINO, WI MCDONALD ............. 29
Familial cerebral amyloidosis and spongiform encephalopathy JANE ADAM, TJ CROW, LW DUCHEN, F SCARAVILLI, E SPOKES ............................................. 37
A study of posterior column function in familial spastic paraplegia MR DIMITRIJEVIC, JAR LENMAN, T PREVEC, K WHEALTY ............................................................................. 46
Computed tomography findings in senile dementia and normal aging H SOININEN, M PURANEN, PJ RIEKKINEN ......... 50
A comparison of phenytoin and valproate in previously untreated adult epileptic patients DM TURNBULL, MD RAWLINS, D WEIGHTMAN, DW CHADWICK ............................................. 55
Transoral approach to the cervical spine: report of four cases SA O'LAIOIRE, DGT THOMAS ........................................... 60
The clinical effect of lumbar puncture in normal pressure hydrocephalus C WIKKELSØ, H ANDERSSON, C BLOMSTRAND, G LINDQVIST ........................................................................... 64
Differences in the interaction of acetylcholine receptor antibodies with receptor from normal, denervated and myasthenic human muscle ANN KARI LEFVERT ............................................................... 70

SHORT REPORTS

Neurological involvement in hereditary transcobalamin II deficiency PK THOMAS, AV HOFFBRAND, IS SMITH .......... 74
Sleep and dreaming disturbances in closed head injury patients GEORGE P PRIGATANO, MONTE-L STAHL, WILLIAM C ORR, HARRIET K ZEINER ................................................................. 78
Increased serum phospholipids in epileptic children treated with phenobarbitalone L PAVONE, G KLOSE, F MOLLICA, M LA ROSA, H GREVEN .......................................................... 81
Subacute sensory neuropathy with remission: an association with lymphoma HJ SAGAR, DJ READ ..................................... 83
Vertical supranuclear gaze palsy with secondary syphilis NGR PAGE, IS LEAN, MD SANDERS .................................. 86
Rapid correction by 1-α-hydroxycholecalciferol of hemichorea in surgical hypoparathyroidism IBRAHIM SALTI, AMIN FARIS, NIZAR TANNIR, KHALIL KHOURI ......................................................... 89
Vertebro-basilar ischaemia with thrombosis of the vertical artery: report of two cases with embolism B GEORGE, C LAURIAN .............................................................................. 91

LETTERS

Herpes zoster myelitis treated with vidarabine PA CULLIS, J GILROY, R CUSHING ................................................. 94
Alpha coma in a child WALTER J MOLOFSKY .......................................................... 95
Book reviews .................................................................................................................. 96
Notices .................................................................................................................................. 96

No 2 FEBRUARY 1982

Clinical factors associated with dementia in ischaemic stroke G LADURNER, LD ILIFF, H LECHNER ................. 97
Relationships between perfusion defects and static brain scan positivity in patients with ischaemic completed stroke: considerations about the origin of the increased uptake ALFREDO BARTOLINI ...................................................................................... 102
Transcortical aphasia from ischaemic infarcts of the thalamus: a report of two cases DAVID McFARLING, LESLIE J ROTHI, KENNETH M HEILMAN ........................................................................ 107
The noradrenergic system in Alzheimer and multi-infarct dementias DAVID MA MANN, PETER O YATES, JANET HAWKES ............................................................................................................ 113
Ultrastuctural characteristics of spasm in intracerebral arterioles WOLFGANG ROGGENDORF, JORGE CERVOS-NAVARRO ........................................................................................................... 120
Physiological basis for enduring vestibular symptoms R RUDGE, BR CHAMBERS ............................................. 126
The lateralizing significance of hypergraphia in temporal lobe epilepsy JKA ROBERTS, M ROBERTSON, MR TRIMBLE .............................................................................................................. 131
Cerebral ganglioglio-neuroblastoma: an unusual brain tumour of the neurone series DARAB K DASTUR ............ 139
Blood pressure does not predict lacunar infarction J VAN GJIN, CL KRAAIJEVELD .............................................. 147
Acute haemorrhagic leucoencephalitis localised to the brainstem and cerebellum: a report of two cases JEAN MICHAUD, TODD L HELLE .................................................................................. 151
Lymphocyte subpopulations and surface membrane immunoglobulins in myasthenia gravis GIANLUCA LANDI, MASSIMO GALLI, GIANFRANCO CIRODDO, GISELDA COLOMBO, GUGLIELMO SCARLATO ...................................................................... 158

SHORT REPORTS

Dysaesthesias and dysautonomia: a self limited syndrome of painful dysaesthesias and autonomic dysfunction in childhood RUTH NASS, ABE CHUTORIAN ..................................................... 162

Electrophysiologic recordings in a patient with a discrete unilateral thalamic infarction  EJ Hammond, BJ Wilder, WE Ballinger, JR 640
SHORT REPORTS
A case of receptive amusia with prominent timbre perception defect  A Mazzucchi, C Marchini, R Budai, M Parma ................................................................. 644
Periodic EEG complexes in infectious mononucleosis encephalitis  David A Greenberg, Dana J Weinkle, Michael J Aminoff 648
Concurrent Bell's palsy and diabetes mellitus: a diabetic mononeuropathy?  P Pecket, A Schattner ................................................. 652
LETTERS
Severe peripheral neuropathy due to lithium intoxication  Roger S Pamphlett, Roderick A Mackenzie ............................................ 656
Acute autonomic and sensory neuropathy associated with elevated Epstein-Barr virus antibody titre  Naoki Fujii, Takeshi Tabira, Hiroshi Shibasaki, Yoshigorou Kuroiwa, Akio Ohnishi, Joji Nagaki 656
Multiple sclerosis in association with dialysis encephalopathy syndrome  Roy Freeman, Michael Lazarus, William Hickey, David M Dawson ........................................ 658
Circling movements in human viral encephalitis  JS Chopra, K Radhakrishnan, S Razdan 659
Opsoclonus in a confirmed case of St Louis Encephalitis  Randolph W Evans, Kwa Welch 660
MATTERS ARISING
Asymmetry of the aura and pain in migraine  Liam Bannan .................................................. 661
Multiple Sclerosis and Rheumatoid Arthritis  MS Derini .......................................................... 661
Book Reviews ................................................................................................................. 662
Notices ...................................................................................................................... 668
Correction .................................................................................................................. 668

No 8 August 1982
Linkage of autosomal dominant type I hereditary motor and sensory neuropathy to the Duffy locus on chromosome 1  RJ Guiloff, PK Thomas, M Contreras, S Armitage, G Schwarz, Em Sedgwick ................................. 669
The treatment of inflammatory polyneuropathy by plasma exchange  MLP Gross, NJ Legg, MC Lockwood, C Pallis .............................................................. 675
Measles virus and subacute neurological disease: an unusual presentation of measles inclusion body encephalitis  DW Chadwick, S Martin, PH Buxton, AH Tomlinson 680
Zinc concentrations in the cerebrospinal fluid of normal adults and patients with neurological diseases  R Palm, G Hallmans .......................................................... 685
Zinc and copper in multiple sclerosis  R Palm, G Hallmans .................................................. 691
Control of soleus motoneuron excitability during muscle stretch in man  Karen L Robinson, AJ MeComas, AY Belanger ................................................................. 699
The relationship between the size of a muscle afferent volley and the cerebral potential it produces  Simon Gandevia, David Burke, Brian McKeon .................................................. 705
EEG and computed tomography in the investigation of patients with senile dementia  H Soininen, JV Partanen, M Puranen, PJ Riekkinen ........................................... 711
Incidental focal intracranial computed tomographic findings  Leon A Weisberg ...................................................... 715
Alexia and agraphia in Wernicke's aphasia  Howard S Kirshner, Wanda G Webb .......................... 719
SHORT REPORTS
Acute cerebral demyelination: clinical and pathological correlation with computed tomography  La Lozou, G Cole ................................................................. 725
Epilepsy and coeliac disease  JG Hanly, W Stassen, M Whelton, N Callaghan ......................... 729
Thiamine deficiency and cerebrospinal fluid 5-hydroxyindoleacetic acid: a preliminary study  Michael Botez, Simon N Young, Jocelyne Bachevalier, Serge Gauthier 731
Cerebrospinal fluid oestrone in pseudotumour cerebri  James O Donaldson, Eva Horak 734
Joubert-Boltshauser syndrome with polyactyly in siblings  J Egger, MH Bellman, EM Ross, M Baraitser 737
Periodic EEG discharges and status spongiosus of the cerebral cortex in anoxic encephalopathy: a necropsy case report  Yoshiyuki Kuroiwa, Gastone G Celestia, Hyung Do Chong .................................................. 740
Failure of postural manoeuvres to prevent postural punctate headache  D Hilton-Jones, RA Harrad, MW Gill, CP Warlow .......................................................................................... 743
Familial cerebellar ataxia and hypogonadotropic hypogonadism: evidence for hypothalamic LHRH deficiency  J Berclano, JA Amado, J Freijanes, M Rebollo, A Vaquero ........................................... 747

Contents

No 10 OCTOBER 1982

Page

Persisting nutritional neuropathy amongst former war prisoners GEOFFREY V GILL, DION R BELL .......................... 861
Chronic idiopathic polyneuropathy treated with azathioprine B PENTLAND, GWG MOWADSLY .................... 866
Macro EMG in healthy subjects of different ages ERIK STALBERG, PETER RW FAWCETT ............ 870
Birth injury: a possible contributory factor in the aetiology of primary basilar impression ROBERT DE BATTERSBY, BERNARD WILLIAMS .................. 879
Acute cervical cord injuries in patients with epilepsy JW ALLEN, BE KENDALL, RS KOCHEN, NM MULLIGAN 884
Controlled study of metoprolol and propranolol during prolonged administration in patients with essential tremor S CALZETTI, LJ FINDLEY, E PERUCCA, A RICHEWS 893
Leukoencephalopathy associated with extensive burns JOCELYN BRUCE GREGORIOS 898
Cranial computed tomography in the diagnosis of multiple sclerosis LA LOIZOU, EB ROLFE, H HEWAZY 905
Two cases of Van Buchem’s Disease JM DIXON, RE CULL, P GAMBLE .......................... 913

SHORT REPORTS

Syncope as a presenting feature of hindbrain herniation with syringomyelia F HAMPTON, BERNARD WILLIAMS, L LOIZOU .......................... 919
Action of cyproheptadine in spastic paraparetic patients H BARBEAU, CL RICHARDS, P BEDARD 923
Combined medical and surgical treatment of spinal hydatid disease: A action of cyproheptadine in spastic paraparetic patients H BARBEAU, CL RICHARDS, P BEDARD 923
Insulin-induced hypoglycaemia does not abolish chorea NP QUINN, AE LANG, CD MARSDEN 936
Periodic alternating nystagmus in a case of hereditary ataxia and its treatment with baclofen GT PLANT 937
Painless cauda equina schwannoma simulating Charcot-Marie-Tooth Disease F ROHOI, AW COOK, H CLARKE, R TORN, M ZANDEH 938
Use and misuse of the Roussy-Levy eponym P SALISACHS, LJ FINDLEY, M CODINA, P LA TORRE, JM MARTINEZ-LAGE .......................... 938

LETTERS

Is the loss of cerebral cortical choline acetyl transferase activity in Alzheimer’s disease due to degeneration of ascending cholinergic nerve cells? DAVID MA MANN, PETER O YATES .......................... 936
Insulin-induced hypoglycaemia does not abolish chorea NP QUINN, AE LANG, CD MARSDEN 936
Periodic alternating nystagmus in a case of hereditary ataxia and its treatment with baclofen GT PLANT 937
Painless cauda equina schwannoma simulating Charcot-Marie-Tooth Disease F ROHOI, AW COOK, H CLARKE, R TORN, M ZANDEH 938
Use and misuse of the Roussy-Levy eponym P SALISACHS, LJ FINDLEY, M CODINA, P LA TORRE, JM MARTINEZ-LAGE .......................... 938

No 11 NOVEMBER 1982

Treatment of acquired aphasia: speech therapists and volunteers compared RACHEL DAVID, PAM ENDERBY, DAVID BAINTON .......................... 957
Mild senile dementia of Alzheimer type: research diagnostic criteria, recruitment, and description of a study population L BERG, CP HUGHES, LA COBEN, WL DIZENGER, RL MARTIN, JK NEVE VICHI .......................... 962
A controlled study of dementia in Parkinson’s disease RHS MINDHAM, SWA AHMED, CG CLOUGH .......................... 969
Summation of rapid tactile stimuli in parietal lobe disease RICHARD TEGNER .......................... 975
Evaluation of infratentorial atrophy by computed tomography DEITEL CLAUS, JÖRGEN C ASCHOFF 979
The relationship between brain and liver damage in chronic alcoholic patients W ACKER, EJ APS, SISR K MAJUMDAR, GJ SHAW, ALLAN D THOMSON .......................... 984
Primary writing tremor treated by stereotactic selective thalamotomy COHYE, M MIYAZAKI, T HIRAI TSHIBAZAKI, H NAKAJIMA, Y NAGASEKI .......................... 988
Effects of fixation and optokinetic stimulation on vestibulo-ocular reflex suppression BR CHAMBERS, MA GRESTY .......................... 998
The effects of the pyrethroids deltamethrin and cismethrin on nerve excitability in rats MITSUO TAKAHASHI, PAMELA M LE QUESENE .......................... 1005
X-linked recessive bulbospinal neuronopathy: a report of ten cases AE HARDING, PK THOMAS, M BARAITSER, PG BRADBURY, JA MORGAN-HUGHES, JR PONSFORD .......................... 1012
The treatment of trigeminal neuralgia by posterior fossa microsurgery CBT ADAMS, ANDREW H KAYE, PJ TEDDY .......................... 1020
Axillary nerve palsy following blunt trauma to the shoulder region: a clinical and electrophysiological review HENRY BERRY, VERA BRIL .......................... 1027
Effect of epoprostenol (prostacyclin, PG1,) on cerebral blood flow in man MM BROWN, HILARY PICKLES .......................... 1033
