A new era in the treatment of Parkinson’s disease begins... 

In 1970, the arrival of L-dopa revolutionised the treatment of Parkinson’s disease. This was followed, in 1973 and 1979, by the highly successful combinations with peripheral decarboxylase inhibitors.

Now, in 1983, there is Eldepryl. Eldepryl is a new, selective inhibitor of the enzyme responsible for dopamine breakdown in the brain. Used in conjunction with L-dopa preparations, it provides the next logical step in treatment—dopamine conservation.

The patient benefits of Eldepryl are substantial. Daily L-dopa intake can be immediately cut by 20% in most cases,

reducing unwanted side effects and extending the useful life of L-dopa. Eldepryl significantly reduces akinesia, and has been shown to smooth out “off” effects.

With Eldepryl, there is no complicated dosage regime to remember, simply one tablet daily, together with a 20% reduction of L-dopa on the first day of treatment, is usually all that is required.

ELDEPRYL

selegiline hydrochloride

Conserves cerebral dopamine
MACROM
NEUROSURGICAL PATTIES

British Made
100% Cotton
Fast High Absorption
Non Toxic
Soft Texture
Plain or X-Ray Opaque
Range of Sizes

Double Wrapped in See Through Envelopes.
Ready For Immediate Sterilisation

Packed in Boxes of 200 either 20 to an envelope, 10 envelopes to a box or 10 on a
count card in an envelope, 20 envelopes in a box.

Special Training Fellowship in Neuropathology

Applications are invited from clinicians, post registration to Senior Registrar level, who wish to undertake research training within the UK in the field of Neuropathology.
The Fellowship is available for a period of six months to three years.

Candidates who have not been ordinarily resident in the UK throughout the three years immediately preceding the date of application may not be eligible and should consult the MRC.

Further details and application forms are available from the Training Awards Group, Medical Research Council, 20 Park Crescent, London, W1N 4AL (tel. 01-636 5422 Ext. 448)

Closing date for receipt of applications: 15th August, 1983.

THE BRITISH COUNCIL
INTERNATIONAL MEDICAL COURSE

Head Injuries
9–21 October 1983 in Glasgow

The aim of this course is to review current knowledge concerning head injuries. It will be held at the University of Glasgow's Institute of Neurological Sciences, the head injury centre for the West of Scotland. Discussion and debate will be encouraged and members of the course will be expected to contribute their views and experience. The Directors of Studies will be PROFESSOR B.J. JENNET and PROFESSOR G.M. TEASDALE of the Department of Neurosurgery.
The course is intended for experienced surgeons as well as for anaesthetists and others who have a major responsibility for the care of patients with head injuries. There are 30 vacancies.

Fee £695 (Residential), £405 (Non-residential)

FURTHER INFORMATION AND APPLICATION FORM CAN BE OBTAINED FROM YOUR LOCAL OVERSEAS REPRESENTATIVE OF THE BRITISH COUNCIL OR FROM COURSES DEPARTMENT, THE BRITISH COUNCIL, 65 DAVIES STREET, LONDON W1Y 2AA.

ABC OF BRAIN STEM DEATH

The subject of brain stem death still arouses misconceptions—witness the response to the BBC Panorama programme on transplantation and brain death. In a series of articles in the BMJ Dr Christopher Pallis dispelled some of the misconceptions, examined the concepts underlying our ideas of death, and described the practical aspects of diagnosing brain stem death. These articles have now been collected into a book together with additional material on the wider aspects of the subject, including some of the neurological controversies.

Journal of Mental Deficiency Research

Published on behalf of the Royal Society for Mentally Handicapped Children and Adults

In 1982, Journal of Mental Deficiency Research celebrated its twenty-fifth anniversary. These years have seen remarkable developments: identification of Down's anomaly; behavioural techniques; screening methods; infant intervention programmes; normalization philosophy and community care; errorless learning; verbal and non-verbal communication approaches; amniocentesis; the sex chromosome disorders; the Fragile X chromosome disorders; secondary prevention; demographic changes; and enlightenment.

The pace of change in the next twenty-five years will increase. This journal will continue to evaluate and record important medical, social and educational advances.

Manuscripts for publication should be submitted to the Editor, Dr W.I. Fraser, Blackwell Scientific Publications Ltd, 8 John Street, London WC1N 2ES, England.

Subscription Information

Journal of Mental Deficiency Research is published quarterly. Subscription rates for 1983 are:

- £25.00 (U.K.)
- £30.00 (overseas)
- $62.50 (U.S.A. & Canada)
- post free
