Subject index

AAA syndrome, Allgrove or 4 “A” syndrome: an autosomal recessive syndrome causing multisystem neurological disease, 654
abdominal reflex, The deep tendon and the abdominal reflexes, 150
ABN Abstracts, Joint congress Association of British Neurologists and the Neurological Association of South Africa, University of Cape Town, 29 January – 1 February 2003, 1166
Proceedings of the Association of British Neurologists and the British Neuropsychiatry Association, Royal College of Physicians, 2-4 October 2002, 397
Proceedings of the Association of British Neurologists, Cardiff City Hall, Cathays Park, 2 April–4 April 2003, 1448
Proceedings of the Head Injury Conference and Annual Meeting of the British Neuropsychiatry Association, the Institute of Child Health, central London, 12-14 February 2003, 830
acetylcholine receptors, Autoimmune myasthenia gravis after cardiac surgery, 392
acetylcholinesterase, Brain acetylcholinesterase activity in mild cognitive impairment and early Alzheimer’s disease, 113
acetylcholinesterase inhibition, Acetylcholinesterase inhibition: a novel approach in the treatment of neurogenic orthostatic hypotension, 1294
Priority setting: learning to make tough decisions, 1185
acoustic neuroma, Gamma knife stereotactic radiosurgery for unilateral acoustic neuromas, 1536
ACTH, Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
active neuromuscular stimulation, Stroke motor recovery: active neuromuscular stimulation and repetitive practice schedules, 1562
activities of daily living, Behavioural abnormalities contribute to functional decline in Huntington’s disease, 120
acute neuropathy, A variant of multifocal motor neuropathy with acute, generalised presentation and persistent conduction blocks, 1555
acute stroke, Clinical radiologic correlations in acute stroke: is the signal intensity at the end of the tunnel getting brighter quicker?, 840
acyclovir, Brain stem encephalitis caused by primary herpes simplex 2 infection in a young woman, 1323
ADHD, Interface between neurology and psychiatry in childhood, 117
New evidence for an association between the CSF HVA:5-HIAA ratio and psychopathic traits, 918
adhesion molecules, Human cellular inflammation in the pathology of acute cerebral ischaemia, 1476
adolescence, Cognitive dysfunction in young men following head injury in childhood and adolescence: a population study, 933
Neurological and cognitive decline in adolescence, 19
Transition from paediatric to adult medical services for young people with chronic neurological problems, 1011
adrenoleukodystrophy, Improvement of central motor conduction after bone marrow transplantation in adrenoleukodystrophy, 373
adrenomyeloneuropathy, Clinical and electrophysiological improvement of adrenomyeloneuropathy with steroid treatment, 822
adult neuronal ceroid lipofuscinosis, Neuroleptic malignant syndrome in Kuf’s disease, 365
affect, Dissociation of affective modulation of recollective and perceptual experience following amygdala damage, 253
age, Onset age and severity of motor impairment are associated with reduction of myocardial 123I-MIBG uptake in Parkinson’s disease, 423
aging, fMRI studies of associative encoding in young and elderly controls and mild Alzheimer’s disease, 44
AIDS, Progressive multifocal leukoencephalopathy with unusual inflammatory response during antiretroviral treatment, 1142
The clinicopathological spectrum of Rosenthal fibre encephalopathy and Alexander’s disease: a case report and review of the literature, 807
aircraft, Economy class stroke syndromes: vertebral artery dissection revisited, 1594
Alexander’s disease, The clinicopathological spectrum of Rosenthal fibre encephalopathy and Alexander’s disease: a case report and review of the literature, 807
Allgrove’s syndrome, Allgrove or 4 “A” syndrome: an autosomal recessive syndrome causing multisystem neurological disease, 654
a motor neurone, The relation between Ashworth scale scores and the excitability of the a motor neurones in patients with post-stroke muscle spasticity, 646
ALSAQ, Deriving summary indices of health status from the Amyotrophic Lateral Sclerosis Assessment Questionnaires (ALSAQ-40 and ALSAQ-5), 242
Alzheimer’s disease, Alzheimer’s disease: differences in technetium-99m HMPAO SPECT scan findings between early onset and late onset dementia, 715
A randomised placebo controlled study to assess the effects of cholinergic treatment on muscarinic receptors in Alzheimer’s disease, 1567
A study of stereotypic behaviours in Alzheimer’s disease and frontal and temporal variant frontotemporal dementia, 1398
Brain acetylcholinesterase activity in mild cognitive impairment and early Alzheimer’s disease, 113
Coexistence of CADASIL and Alzheimer’s disease, 790
Coexistent Lewy body disease in a case of “visual variant of Alzheimer’s disease”, 389
Dopas and dementia, 147
fMRI studies of associative encoding in young and elderly controls and mild Alzheimer’s disease, 44
Head injury and Alzheimer’s disease, 841
Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on; a partial replication, 857
Intrathecal inflammation precedes development of Alzheimer’s disease, 1200
Limb length and dementia in an older Korean population, 427
Long term neuropsychological outcome after head injury: relation to APOE genotype, 1047
Low vitamin B-12 status in confirmed Alzheimer’s disease as revealed by serum holotranscobalamin, 959
Melissa officinalis extract in the treatment of patients with mild to moderate Alzheimer’s disease: a double blind, randomised, placebo controlled trial, 863
Neuroimaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371
Predictors of institutionalisation in people with dementia, 1315
Saitohin gene is not associated with Alzheimer’s disease, 362
Shifts in angiotensin I converting enzyme insertion allele frequency across Europe: implications for Alzheimer’s disease risk, 1159
Systemic infection, interleukin 1β, and cognitive decline in Alzheimer’s disease, 788
The topography of metabolic deficits in posterior cortical atrophy (the visual variant of Alzheimer’s disease) with FDG-PET, 1521
American trypanosomiasis, American trypanosomiasis (Chagas’ disease): an unrecognised cause of stroke, 516
amnesia, A case of frontal network amnesia, 106
Hypothalamic amnesia and frontal lobe function disorders after Langherhans cell histiocytosis, 1348
Limbic encephalitis presenting with topographical disorientation and amnesia, 110
amoebiasis, Identification of amoeba in the CSF in a patient with meningepencaphalitis, 1445
amygdala, Amygdala volumetry in “imaging-negative” temporal lobe epilepsy, 1245
Disassociation of affective modulation of recollective and perceptual experience following amygdala damage, 253
Similarity and disparity of obsessive-compulsive disorder and schizophrenia in MR volumetric abnormalities of the hippocampus-amygnda complex, 962
amyloid β protein, Association of neprilysin polymorphism with cerebral amyloid angiopathy, 749
amyotrophic lateral sclerosis, Deriving summary indices of health status from the Amyotrophic Lateral Sclerosis Assessment Questionnaires (ALSAQ-40 and ALSAQ-5), 242
autosomal dominant partial epilepsy with auditory features, Genetics of temporal lobe epilepsy, 1359
awareness, Regional cerebral glucose metabolism in akinetic catatonia and after remission, 1003
axonal neurotoxicity, An unusual phenotype of McLeod syndrome with late onset axonal neuropathy, 1697
axons, Axonal injury in multiple sclerosis, 695
azathioprine, Lymphocytic hypophysitis successfully treated with azathioprine: first case report, 1581
bacterial infection, Aetiologic diagnosis of brain abscesses and spinal infections: application of broad range bacterial polymerase chain reaction analysis, 728
balance, Brain white matter lesions detected by magnetic resonance imaging are associated with balance and gait speed, 94
basal cell carcinoma, Ulcer terebrans: an unusual cause of paraparesis, 1643
basal ganglia, Childhood onset generalised dystonia can be modelled by increased gain in the indirect basal ganglia pathway, 1509
basilar artery, Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621
basilar thrombosis, Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621
behavioural dysfunction, Behavioural abnormalities contribute to functional decline in Huntington's disease, 120
Behcet's disease, Prevalence and patterns of neurological involvement in Behcet's disease: a prospective study from Iraq, 608
benign sensory changes, Hemisensory syndrome is associated with a low diagnostic yield and a nearly uniform benign prognosis, 1113
β adrenergoceptor expression, Expression of β2 adrenergoceptors on peripheral blood mononuclear cells in patients with primary and secondary progressive multiple sclerosis: a longitudinal six month study, 197
β endorphin, β endorphin concentrations in PBMC of patients with different clinical phenotypes of multiple sclerosis, 495
Bickerstaff's brain stem encephalitis, Recurrent anti-GQ1b IgG antibody syndrome showing different phenotypes in different periods, 1350
bilateral ataxia, Bilateral cerebellar ataxia as the sole manifestation of a unilateral rostral pontine tegmental infarct, 1445
bilateral hearing loss, Sudden bilateral simultaneous deafness with vertigo as a sole manifestation of vertebrobasilar insufficiency, 539
bilateral medullary infarction, Isolated total tongue paralysis as a manifestation of bilateral medullary infarction, 1698
bilateral subthalamic deep brain stimulation, Defining a role for the subthalamic nucleus within operative theoretical models of subcortical participation in language, 1543
blepharospasm, Botulinum toxin type B in blepharospasm and hemifacial spasm, 687
Eyelid tremor in a patient with a unilateral paramedian thalamic lesion, 356
blood-brain barrier, Blood-brain barrier permeability in type II diabetes, 6
Increased blood-brain barrier permeability in type II diabetes demonstrated by gadolinium magnetic resonance imaging, 70
BOLD fMRI, BOLD fMRI activation induced by vagus nerve stimulation in seizure patients, 811
bone conduction, Vestibular activation by bone conducted sound, 771
bone marrow transplantation, Improvement of central motor conduction after bone marrow transplantation in adrenoleukodystrophy, 373
botulinum toxins, Botulinum toxin type B in blepharospasm and hemifacial spasm, 687
brain, Coccidioidomycosis of the brain, mimicking en plaque meningioma, 806
brain abscess, Detection of Staphylococcus aureus by 16S rRNA directed in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000
brain atrophy, MRI lesion volume heterogeneity in primary progressive MS in relation with axonal damage and brain atrophy, 950
The longitudinal relation between brain lesion load and atrophy in multiple sclerosis: a 14 year follow up study, 1551
brain cysts, Brain cysts associated with mutation in the Aristless related homeobox gene, ARX, 536
brain function, Oxytocin, brain function, and neuropsychiatric disorders, 837
brain haemorrhage, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388
brain infarction, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359
brain injection, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359
brain injury, Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on: a partial replication, 857
Normal jugular bulb oxygen saturation, 784
brain lesion load, The longitudinal relation between brain lesion load and atrophy in multiple sclerosis: a 14 year follow up study, 1551
brain metastases, Cerebral metastasis after primary renal cell carcinoma, 141
Spontaneous haemorrhage into metastatic brain tumours after stereotactic radiosurgery using a linear accelerator, 908
brain oedema, Hemisphericity for large middle cerebral artery territory infarction: outcome in 19 patients, 800
brain sagging, Brain stem and cerebellar dysfunction after lumbar spinal fluid drainage: case report, 992
brain stem, Brain stem encephalitis caused by primary herpetic simplex 2 infection in a young woman, 1323
New onset migraine with a brain stem cavernous angioma, 680
brain tissue, Brain tissue oxygen guided treatment supplementing ICP/CPP therapy after traumatic brain injury, 760
Effects of decompressive craniectomy on brain tissue oxygen in patients with intracranial hypertension, 513
Intracerebral microanalysis and CSF hydrodynamics in idiopathic adult hydrocephalus syndrome, 217
brain tumour, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359
Magnetoencephalographic representation of the sensorimotor hand area in cases of intracerebral tumour, 1649
Second harmonic imaging: a new ultrasound technique to assess human brain tumour perfusion, 333
The effect of brain tumour latensity on anxiety levels among neurosurgical patients, 1278
brain-computer communication, Predictors of successful self control during brain-computer communication, 1117
breast cancer, Anti-Ma2 antibody related paraneoplastic limbic/brain stem encephalitis associated with breast cancer expressing Ma1, Ma2, and Ma3 mRNAs, 1332
CACNA1A, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444
CADASIL, Coexistence of CADASIL and Alzheimer’s disease, 790
CADASIL syndrome, “CADASIL coma”: an underdiagnosed acute encephalopathy, 249
callosum connection, Reversible callosum disconnection syndrome in internal hydrocephalus, 389
camptocormia, Head drop and camptocormia, 692
The naming of parts, 692
cardiomyopathy, Association of cardiomyopathy caused by autonomic nervous system impairment with the Miller Fisher syndrome, 689
carotid artery, Measuring carotid stenosis, 140
Meningioma presenting as stroke: report of two cases and estimation of incidence, 136
carpal tunnel syndrome, Clinical surveillance of carpal tunnel syndrome in two areas of the United Kingdom, 1991–2001, 1674
Splitting for carpal tunnel syndrome: prognostic indicators of success, 1342
cassava, Incidence of endemic ataxic polynuropathy and its relation to exposure to cyanide in a Nigerian community, 1417
cataplexy, CSF hypocretin-1 levels in narcolepsy, Kleine-Levin syndrome, and other hypersomnias and neurological conditions, 1667
catatonia, Regional cerebral glucose metabolism in akinetic catatonia and after remission, 1003
catecholamine, New evidence for an association between the CSF HVA:5-HIAA ratio and psychopathic traits, 918
caveolin-3, Immunohistochemical study of caveolin-3 in idiopathic hypertrophic cardiomyopathy, 547
cavernous angioma, New onset migraine with a brain stem cavernous angioma, 680
cavernous haemangioma, Hypertrophic olivary degeneration following pontine haemorrhage: hypertensive crisis or cavernous haemangioma bleeding?, 797
CD45, The role of the PTPRC (CD45) mutation in the development of multiple sclerosis in the North West region of the United Kingdom, 944
central nervous system, Brain lesions in the course of generalised tetanus, 1432
Congenital abnormalities of the central nervous system, i3
Linear scleroderma “en coup de sabre” coexisting with plaque-morphea: neuroradiological manifestation and response to corticosteroids, 661
Molecular pathogenesis of neuroinflammation, 1364
cerebral venous thrombosis, 1364
cerebral palsy, 1244
Cerebral vasomotor reactivity testing in head injury: the link between pressure and flow, 1053
cerebral blood flow, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
Long term treatment and disease severity change brain responses to levodopa in Parkinson’s disease, 844
Cerebral cortex, Cognitive presentation of multiple sclerosis: evidence for a cortical variant, 872
cerebral atrophy, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
cerebral autoregulation, Cerebral vasomotor reactivity testing in head injury: the link between pressure and flow, 1053
cerebral blood flow, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
Long term treatment and disease severity change brain responses to levodopa in Parkinson’s disease, 844
Cerebral cortex, Cognitive presentation of multiple sclerosis: evidence for a cortical variant, 872
cerebral atrophy, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
Cerebral haemorrhage, Should asymptomatic patients with hereditary haemorrhagic telangiectasia (HHT) be screened for cerebral vascular malformations? Data from 22 061 years of HHT patient life, 743
cerebral atrophy, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
cerebral hypoxia, Brain tissue oxygen guided treatment supplementing ICP/CP pressure therapy after traumatic brain injury, 760
cerebral infarction, A case of gliosarcoma appearing as ischaemic stroke, 364
Hemicraniectomy for large middle cerebral artery territory infarction: do these patients really benefit from this procedure?, 1600
Hemicraniectomy for large middle cerebral artery territory infarction: outcome in 19 patients, 800
Raised plasma oxidised LDL in acute cerebral infarction, 312
Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
Cerebral ischaemia, Clinical radiologic correlations in acute stroke: is the signal intensity at the end of the tunnel getting brighter quicker?, 840
S100B as a surrogate marker for successful clot lysis in hyperacute middle cerebral artery occlusion, 322
Cerebral oxygen metabolism, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
cerebral polsy, The cerebral palsies: a physiological approach, 123
cerebral perfusion, Second harmonic imaging: a new ultrasound technique to assess human brain tumour perfusion, 333
cerebral trauma, High concentrations of procollagen propeptides in chronic subdural haematoma and effusion, 522
cerebral venous thrombosis, Recanalisation of cerebral venous thrombosis, 459
Cerebrospinal fluid, A prospective study of CSF markers in 250 patients with possible Creutzfeldt–Jakob disease, 1210
Hypothesis on the pathophysiology of amyloidosis based on simulation of cerebrospinal fluid dynamics, 344
Identification of amyloids in the CSF in a patient with meningoencephalitis, 1445
Intracranial hypertension after chiropractic manipulation of the cervical spine, 821
Cerebrovascular disease, Neuroimaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371
Reliability of the variables in a new set of models that predict outcome after stroke, 447
Cerebrovascular disorders, Association of neprilysin polymorphism with cerebral amyloid angiopathy, 749
Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
Cerebrovascular reactivity, Cerebral vasomotor reactivity testing in head injury: the link between pressure and flow, 1053
cervical dystonia, Role of the dopamine D5 receptor (DRD5) as a susceptibility gene for cervical dystonia, 665
cervical headache, Radiofrequency neurotomy for the treatment of third occipital headache, 88
cervical spine, Intracranial hypertension after chiropractic manipulation of the cervical spine, 821
Chagas’ disease, American trypanosomiasis (Chagas’ disease): an unrecognised cause of stroke, 516
Channelomics, Nanotechnology for neuronal ion channels, 1466
Charcot-Marie-Tooth, Clinical evaluation and investigation of neuropathy, i3
Chemokines, Human cellular inflammation in the pathology of acute cerebral ischaemia, 1476
Chemotherapy, Meningioma of the optic nerve sheath: treatment with hydroxyurea, 1348
Chiari I malformation, Chiari I malformation mimicking myasthenia gravis, 393
Dysphagia due to Chiari I malformation mimicking ALS, 549
child, Surgery for drug resistant partial epilepsy in children with focal cortical dysplasia: anatomical–clinical correlations and neurophysiological data in 10 patients, 1493
Childhood, Cognitive dysfunction in young men following head injury in childhood and adolescence: a population study, 933
childhood hemiplegia, Acute childhood hemiplegia, 1244
Chiropractic manipulation, Intracranial hypertension after chiropractic manipulation of the cervical spine, 821
Chlamydia pneumoniae, Failure to detect Chlamydia pneumoniae DNA in cerebral aneurysmal sac tissue with two different polymerase chain reaction methods, 756
Cholesterol, Serum lipids and memory in a population based cohort of middle age women, 1530
Cholesterol reduction, Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
Chronic fatigue syndrome, Enterovirus related metabolic myopathy: a postviral fatigue syndrome, 1382
Enteroviruses in chronic fatigue syndrome: “now you see them, now you don’t”, 1361
Observe independent analysis of cerebral glucose metabolism in patients with chronic fatigue syndrome, 922
Chronic inflammatory demyelinating polyradiculoneuropathy, Clinical evaluation and investigation of neuropathy, i3
Management of inflammatory neuropathies, i9
Chronic neurological disease, Transition from paediatric to adult medical services for young people with chronic neurological problems, 1011
Classification, Diagnostic criteria and the use of ICD-10 codes to define and classify minor head injury, 351
Clinical examination, Interlocking finger test: a bedside screen for parietal lobe dysfunction, 530
Clinical features, Non-convulsive status epilepticus: usefulness of clinical features in selecting patients for urgent EEG, 189
Clinical outcome, Is a combination of Tc-SPECT or perfusion weighted magnetic resonance imaging with spinal tap test helpful in the diagnosis of normal pressure hydrocephalus?, 479
Clinical practice, Clinical application of neuroimaging in epilepsy, 466
Spas tic movement disorder: what is the impact of research on clinical practice?, 820
Clinical signs, Comparison of the tendon and plantar strike methods of eliciting the ankle reflex, 1351
Clinical spectrum, Features involved in the diagnostic delay of cluster headache, 1123
clinical trial, Informed consent in trials for neurological emergencies: the example of subarachnoid haemorrhage, 988
Surgery for Parkinson’s disease: lack of reliable clinical trial evidence, 519
closed head trauma, Visual prognosis after indirect traumatic optic neuropathy, 246
cluster headache, Features involved in the diagnostic delay of cluster headache, 1123
coccidioidomycosis, Coccidioidomycosis of the brain, mimicking en plaque meningioma, 806
coelectic disease, Neuro muscular and sensory disturbances in patients with well treated coeliac disease. 490
cognition, Cachexia and impairment in probable multiple sclerosis, 443
Mental deterioration late after head injury—does it happen?, 1014
Moderate hypoglycaemia obliterates working memory in humans with and without insulin treated diabetes, 278
Mood changes with deep brain stimulation of STN and GPI: results of a pilot study, 1584
MRI directed bilateral stimulation of the subthalamic nucleus in patients with Parkinson’s disease, 1631
Performing a dementia rating scale in Parkinson’s disease with dementia and dementia with Lewy bodies: comparison with progressive supranuclear palsy and Alzheimer’s disease, 1215
Serum lipids and memory in a population based cohort of middle age women, 1530
cognitive decline, Neurological and cognitive decline in adolescence, 19

cognitive dysfunction, Cognitive dysfunction in young men following head injury in childhood and adolescence: a population study, 933
Working memory deficits in multiple sclerosis: a controlled study with auditory P600 correlates, 1231
cognitive impairment, Blood–brain barrier permeability in type II diabetes, 6
Longitudinal study of cognitive dysfunction in multiple sclerosis: neuropsychological, neuroradiological, and neurophysiological findings, 878
Neuroimaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371
Predictors of cognitive impairment in advanced Parkinson’s disease, 793
cohort study, Predictors of institutionalisation in people with dementia, 1315
collaring, Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680
colonic transit time, Colonic transit time and rectaloid videomanometry in Parkinson’s disease, 268
coma, Favourable outcome of a brain trauma patient despite bilateral loss of cortical somatosensory evoked potential during thiopental sedation, 1157
comparative genomic hybridisation, Lack of chromosomal imbalances in adamantinomatous and papillary craniopharyngiomas, 260
complement, Peripheral neuropathy in hepatitis C virus infection with and without cryoglobulinaemia, 1267
computational model, Childhood onset generalised dystonia can be modelled by increased gain in the indirect basal ganglia pathway, 1508
computed tomography, Clinical application of neuroimaging in epilepsy, 466
Reappraisal of early CT signs to predict the arterial occlusion site in acute embolic stroke, 649
The impact of delays in computed tomography of the brain on the accuracy of diagnosis and subsequent management in patients with minor stroke, 77
Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
computer communication networks, Internet resources for neurologists, 699
computerised tomography, The prevalence of frontal variant frontotemporal dementia and the frontal lobe syndrome in a population based sample of 85 year olds, 867
COMT inhibition, Entacapone is beneficial in both fluctuating and non-fluctuating patients with Parkinson’s disease: a randomised, placebo controlled, double blind, six month study, 1071

counterfactual thinking, Counterfactual cognitive deficit in persons with Parkinson’s disease, 1065
cranioopharyngioma, Lack of chromosomal imbalances in adamantinomatous and papillary craniopharyngiomas, 260
Creutzfeld-Jakob disease, A prospective study of CSF markers in 250 patients with possible Creutzfeldt-Jakob disease, 1210
Early cognitive decline in Creutzfeldt-Jakob disease associated with human growth hormone treatment, 1412
Neuropathology of Hashimoto’s encephalopathy, 1009
critical care, Access to intensive care unit beds for neurosurgery patients: a qualitative case study, 1299
critical illness myopathy, Neurological consultations in the medical intensive care unit, ii16
critical illness polyneuropathy, Neurological consultations in the medical intensive care unit, iii6

crohn’s disease, Crohn’s disease, 1299
Crohn’s disease, Crohn’s associated NOD2 gene variants are not involved in determining susceptibility to multiple sclerosis, 1157
cryoglobulinaemia, Peripheral neuropathy in hepatitis C virus infection with and without cryoglobulinaemia, 1267
CSF cell count, Early diagnosis of external ventricular drainage infection: results of a prospective study, 929
CSF hypovolaemia, Brain stem and cerebellar dysfunction after lumbar spinal fluid drainage: case report, 992
CSF infection, Failure of regular external ventricular drain exchange to reduce CSF infection, 1598
CSF outflow, Calculation of the resistance to CSF outflow, 1354
CT, Visible infarction on CT after stroke—what does it tell?, 413
CT scan, Pseudosubarachnoid haemorrhage in subdural haematoma, 1131
Cuba, Letter from Cuba, 285
cyanogens, Incidence of endemic ataxic polyneuropathy and its relation to exposure to cyanide in a Nigerian community, 1417
CYP2D64 allele, Debrisoquine hydroxylase gene polymorphism [CYP2D64] in dementia with Lewy bodies, 135
cytokine, Intrathecal inflammation precedes development of Alzheimer’s disease, 1200
Systemic infection, interleukin 1β, and cognitive decline in Alzheimer’s disease, 788
database, Prolonged survival in motor neuron disease: a descriptive study of the King’s database 1990–2002, 995
debrisoquine hydroxylase gene, Debrisoquine hydroxylase gene polymorphism [CYP2D64] in dementia with Lewy bodies, 135
decompressive craniectomy, Effects of decompressive craniectomy on brain tissue oxygen in patients with intracranial hypertension, 513

Decompressive hemicraniectomy, Hemispherectomy for large middle cerebral artery territory infarction: do these patients really benefit from this procedure?, 1600

deep brain stimulation, A novel quality of life instrument for deep brain stimulation in movement disorders, 1023

Chronic deep brain stimulation for the treatment of tremor in multiple sclerosis: review and case reports, 1392

Deep brain stimulation of the subthalamic nucleus: effectiveness in advanced Parkinson’s disease patients previously reliant on amphetamine, 170

Deep brain stimulation of the subthalamic nucleus in Parkinson’s disease: evaluation of active electrode contacts, 1036

Identification of target areas for deep brain stimulation in human basal ganglia substructures based on median nerve sensory evoked potential criteria, 1031

Mood changes with deep brain stimulation of STN and GPI: results of a pilot study, 1584

MRI directed bilateral stimulation of the subthalamic nucleus in patients with Parkinson’s disease, 1631

Multicentre European study of thalamic stimulation in essential tremor, 1362

Neuropsychological and quality of life outcomes 12 months after unilateral thalamic stimulation for essential tremor, 305

Subthalamic deep brain stimulation for advanced Parkinson’s disease: all that glitters is not gold, 827

deep tendon reflex, The deep tendon and the abdominal reflexes, 150

definition, Diagnostic criteria and the use of ICD-10 codes to define and classify minor head injury, 351

dementia, Brain acetylcholinesterase activity in mild cognitive impairment and early Alzheimer’s disease, 113

Cognitive presentation of multiple sclerosis: evidence for a cortical variant, 872

Current research on diagnosing dementia, 413

Dementia with Lewy bodies according to the consensus criteria in a general population aged 75 years or older, 720

Dipoles and dementia, 147

Do cognitive patterns of brain magnetic activity correlate with hippocampal atrophy in Alzheimer’s disease?, 208

Familial motor neurone disease with dementia: phenotypic variation and cerebellar pathology, 1516

Hereditary diffuse leuкоencephalopathy with spheroids, 1345

How common is dementia with Lewy bodies?, 697

“CADASIL coma”: an underdiagnosed acute encephalopathy, 249

Lewy body cortical involvement may not always predict dementia in Parkinson’s disease, 852

Limb length and dementia in an older Korean population, 1256

Neuropsychological assessment in HTLV-1 infection: a comparative study among TSP/HAM, asymptomatic carriers, and healthy controls, 1085

Neuropsychological prediction of conversion to dementia from questionable dementia: statistically significant but not yet clinically useful, 433

Performance on the dementia rating scale in Parkinson’s disease with dementia and dementia with Lewy bodies: comparison with progressive supranuclear palsy and Alzheimer’s disease, 1215

Predictors of institutionalisation in people with dementia, 1315

Prospective Belgian study of neurodegenerative and vascular dementia: APOE genotype effects, 1148

The prevalence and causes of dementia in people under the age of 65 years, 1206

dementia with Lewy bodies, Debrisoquine hydroxylase gene polymorphism (CYP2D64) in dementia with Lewy bodies, 135

Dementia with Lewy bodies according to the consensus criteria in a general population aged 75 years or older, 720

Performance on the dementia rating scale in Parkinson’s disease with dementia and dementia with Lewy bodies: comparison with progressive supranuclear palsy and Alzheimer’s disease, 1215

demispan, Limb length and dementia in an older Korean population, 427

demographics, Clinical surveillance of carpal tunnel syndrome in two areas of the United Kingdom, 1991–2001, 1674

demyelination, Spatial vision in visually asymptomatic subjects at high risk for multiple sclerosis, 1145

depression, A comparative study into the one year cumulative incidence of depression after stroke and myocardial infarction, 581

Cognitive presentation of multiple sclerosis: evidence for a cortical variant, 872

Prevalence and impact of depression and pain in neurology outpatients, 1587

The outcome of depressive disorders in neurology patients: a prospective cohort study, 893

The outcome of depressive disorders in the setting of neurological illness, 842

depressive disorder, Mental illness in new neurological patients, 817

depth electrode, Intraventricular monitoring for temporal lobe epilepsy: report on technique and initial results in eight patients, 561

dermatomyositis, Diagnosis and treatment of inflammatory muscle diseases, ii25

diabetes, Increased blood-brain barrier permeability in type II diabetes demonstrated by gadolinium magnetic resonance imaging, 70

Moderate hypoglycaemia abolishes working memory in humans with and without insulin treated diabetes, 278

diabetes mellitus, Blood-brain barrier permeability in type II diabetes, 6

Effects of light fingertips touch on postural responses in subjects with diabetic neuropathy, 620

The diabetic neuropathies: types, diagnosis and management, ii15

diabetic neuropathy, Mononeuritis multiplex in diabetes mellitus: evidence for underlying immune pathogenesis, 803

The diabetic neuropathies: types, diagnosis and management, ii15

The topography of metabolic deficits in posterior cortical atrophy (the visual variant of Alzheimer’s disease) with FDG-PET, 1521
Posterior fossa surgery, Superficial siderosis of the central nervous system many years after neurosurgical procedures, 1326
Post-marketing study, A post-marketing study on interferon β1b and 1a treatment in relapsing-remitting multiple sclerosis: different response in drop-outs and treated patients, 1689
Postpolio syndrome, Endplate dysfunction causing respiratory failure in a patient with prior paralytic poliomylitits, 370
Postpolioymilits syndrome, Pyridostigmine in postpolio syndrome: no decline in fatigue and limited functional improvement, 1655
Post-stroke recovery, Deterioration of pre-existing hemiparesis brought about by subsequent ipsilateral lacunar infarction, 1152
Post-traumatic hyperthermia, Neurogenic fever after traumatic brain injury: an epidemiological study, 614
Posture, Effects of light fingertip touch on postural responses in subjects with diabetic neuropathy, 620
reliability, Comparison of the tendon and plantar strike methods of eliciting the ankle reflex, 1351
reliability, Reliability of the variables in a new set of models that predict outcome after stroke, 447
renal cell cancer, Cerebral metastasis after primary renal cell carcinoma, 141
reperfusion, S100B as a surrogate marker for successful clot lysis in hyperacute middle cerebral artery occlusion, 322
repetitive nerve stimulation, Repetitive stimulation of the long thoracic nerve in myasthenia gravis: clinical and electrophysiological correlations, 379
resource allocation, Priority setting: learning to make tough decisions, 1185
respiratory chain, Mitochondria, 1188
respiratory failure, Long term ventilation in neurogenic respiratory failure, ii24
retina, A controlled study comparing visual function in patients treated with vigabatrin and tegabine, 339
retinal vein, Spontaneous retinal venous pulsation: aetiology and significance, 7
reversible dementias, Reversible dementias, 1008
rigidity, Velocity dependent passive muscle stiffness, 283
risk, Incidence, risk, and case fatality of first ever stroke in the elderly population, The Rotterdam Study, 317
risk factors, Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on; a partial replication, 857
Medical and environmental risk factors for sporadic frontotemporal dementia: a retrospective case-control study, 1574
rituximab, Treatment of IgM antibody associated polymyelopathies using rituximab, 485
root stimulation, Transcutaneous cervical root stimulation in the diagnosis of multifocal motor neuropathy with conduction block, 1329
Rosenthal fibre, The clinicopathological spectrum of Rosenthal fibre encephalopathy and Alexander’s disease: a case report and review of the literature, 807
rostral pons, Bilateral cerebellar ataxia as the sole manifestation of a unilateral rostral pontine tegmental infarct, 1445
ruptured intracranial aneurysms, Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680
saccades, “Bottom-up” and “top-down” effects on reading saccades: a case study, 1423
saitohin, Saitohin gene is not associated with Alzheimer’s disease, 362
salt wasting, Cerebral salt wasting syndrome in meningoencephalitis: a case report, 277
SCA 6, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444
schizophrenia, Schizophrenia and episodic ataxia type 2, 688
Similarity and disparity of obsessive-compulsive disorder and schizophrenia in MR volumetric abnormalities of the hippocampus-amygdala complex, 962
screening, Screening for variant Creutzfeldt-Jakob disease, 828
second somatosensory area (SII), Seizures arising from the inferior parietal lobule can show ictal semiology of the second sensory seizure (SII seizure), 367
secondary dystonia, Focal hand dystonia after cervical whiplash injury, 134
secondary prevention, Antithrombotic drugs in secondary stroke prevention among a community dwelling elderly population, 1100
section bias, Outcome after mild traumatic brain injury: an examination of recruitment bias, 39
seizure, Non-convulsive status epilepticus: usefulness of clinical features in selecting patients for urgent EEG, 189
Psychopathology in people with epilepsy and intellectual disability; an investigation of potential explanatory variables, 1485
sensorimotor cortex, Magnetoencephalographic representation of the sensorimotor hand area in cases of intracerebral tumour, 1649
sensory disturbance, The 12 year prognosis of unilateral functional weakness and sensory disturbance, 591
sensory evoked potential, Identification of target areas for deep brain stimulation in human basal ganglia substrates based on median nerve sensory evoked potential criteria, 1031
sensory neuropathy, Sjögren’s syndrome associated painful sensory neuropathy without sensory ataxia, 1320
sentinel bleed, “Sentinel” or “early warning” bleed, 284
serotonin uptake inhibitors, Parkinsonism associated with a serotonin and noradrenaline reuptake inhibitor, milnacipran, 137
sex, Does sex influence age at onset in cranial-cervical and upper limb dystonia?, 265
SF-36, Using the SF-36 measure to compare the health impact of multiple sclerosis and Parkinson’s disease with normal population health profiles, 710
shunt surgery, CSF galactin and cognition after shunt surgery in normal pressure hydrocephalus, 1272
sibling risk, Genetic loading in familial migraine with aura, 1128
SII seizure, Seizures arising from the inferior parietal lobule can show ictal semiology of the second sensory seizure (SII seizure), 367
sinus venous thrombosis, Recanalisation of cerebral venous thrombosis, 459
size scaling, Discrete and dynamic scaling of the size of continuous graphic movements of parkinsonian patients and elderly controls, 299
Sjögren’s syndrome, Sjögren’s syndrome associated painful sensory neuropathy without sensory ataxia, 1320
skill, Predictors of successful self control during brain-computer communication, 1117
sleep apnoea syndrome, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642
sleepiness, The relation between daytime sleepiness, fatigue, and reduced motivation in patients with adult onset myotonic dystrophy, 138
slow cortical potentials, Predictors of successful self control during brain-computer communication, 1117
small cell lung cancer, Adult paraneoplastic opsoclonus-myoclonus syndrome associated with antimicrotubular autoantibodies, 1595
small colony variants, Detection of Staphylococcus aureus by 16S RNA directed in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000
smell, Olfactory dysfunction in degenerative ataxias, 1435
Sneddon syndrome, The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
social deprivation, Effect of deprivation on time to hospital in acute stroke, 545
Social deprivation and adult head injury: a national study, 1060
somatic marker hypothesis, Decision making in humans: the effect of manipulating the central noradrenergic system, 376
somatic nervous system, Organisation of the sympathetic skin response in spinal cord injury, 1008
somatoform disorders, Mental illness in new neurological patients, 817
somatosensory, Effects of light fingertip touch on postural responses in subjects with diabetic neuropathy, 620
somatosensory evoked potential, Application of time–frequency analysis to somatosensory evoked potential for intraoperative spinal cord monitoring, 82
Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama’s disease, 627
Two cases of quadriaparesis following anterior cervical discectomy, with normal perioperative somatosensory evoked potentials, 273
somnolence, Olfactory deficits and sleep disturbances in Parkinson’s disease: a case–control survey, 956
spastic gene, Motor system abnormalities in hereditary spastic paraparesis type 4 (SPG4) depend on the type of mutation in the spastin gene, 1109
spastic paresis, Spastic movement disorders: what is the impact of research on clinical practice?, 820
spasticity, Long term course of the H reflex after selective tibial neurotomy, 913
The relation between Ashworth scale scores and the excitability of the motor neurones in patients with post-stroke muscle spasticity, 646
Velocity dependent passive muscle stiffness, 283
spatial attention, Conflict and integration of spatial attention between disconnected hemispheres, 395
spatial memory, Loss of spatial learning in a patient with topographical disorientation in new environments, 61
spatial vision, Spatial vision in visually asymptomatic patients at high risk for multiple sclerosis, 1145
SPECT, A randomised placebo controlled study to assess the effects of cholinergic treatment on muscarinic receptors in Alzheimer’s disease, 1567
Alzheimer's disease: differences in technetium-99m HMPAO SPECT scan findings between early onset and late onset dementia, 715
Is a combination of Tc-SPECT or perfusion weighted magnetic resonance imaging with spinal tap test helpful in the diagnosis of normal pressure hydrocephalus?, 479
Objective measures for the progression of Parkinson's disease, 287
The harsh realities facing the use of SPECT imaging in monitoring disease progression in Parkinson's disease, 1447
spectacular shrinking deficit, Middle cerebral artery territory infarction sparing the precentral gyrus: report of three cases, 510
speed/size trade-off, Parkinson's disease patients undershoot target size in handwriting and similar tasks, 1502
spinal bifida, Congenital abnormalities of the central nervous system, i3
spinal, Spinal dural arteriovenous fistulas: clinical features in 80 patients, 1438
spinal amyotrophy, Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama's disease, 627
spinal cord, Spinal cord MRI in clinically isolated optic neuritis, 1577
spinal cord atrophy, Neuroscience for neurologists, 1013
Spinal cord atrophy and disability in multiple sclerosis over four years: application of a reproducible automated technique in monitoring disease progression in a cohort of the interferon β-1a (Rebif) treatment trial, 1090
spinal cord injury, Organisation of the sympathetic skin response in spinal cord injury, 1008
Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama's disease, 627
spinal cord lipoma, Intramedullary migration of spinal cord lipoma, 1593
spinal cord monitoring, Two cases of quadriaparesis following anterior cervical disectomy, with normal perioperative somatosensory evoked potentials, 273
spinal cord sarcoidosis, Clinical MRI dissociation in myelopathy: a clue to sarcoidosis?, 1122
spinal infection, Aetiological diagnosis of brain abscesses and spinal infections: application of broad range bacterial polymerase chain reaction analysis, 728
spine, Ulcus terebrans: an unusual cause of paraparesis, 1643
spinocerebellar ataxia, Vestibulo-ocular arreflexia in families with spinocerebellar ataxia type 3 (Machado-Joseph disease), 1403
splints, Splinting for carpal tunnel syndrome: prognostic indicators of success, 1392
spontaneous intracranial hypotension, Subdural haematoma: a potentially serious consequence of spontaneous intracranial hypotension, 752
spontaneous venous pulsation, Spontaneous retinal venous pulsation: aetiology and significance, 7
Staphylococcus aureus, Detection of Staphylococcus aureus by 16S rRNA directed in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000
statistical parametric mapping, Preoperative motor system brain mapping using positron emission tomography and statistical parametric mapping: hints on cortical reorganisation, 471
status epilepticus, Admission to neurological intensive care: who, when, and why?, 112
stem cells, Stem cells and neurological disease, 553
stenosis, Measuring carotid stenosis, 140
stenting, Idiopathic intracranial hypertension: 12 cases treated by venous sinus stenting, 1662
Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
stereotactic radiosurgery, Clinical experience with gamma knife stereotactic radiosurgery in the management of vestibular schwannomas secondary to type 2 neurofibromatosis, 1288
steroid, Efficacy of methylprednisolone pulse therapy on neuroleptic malignant syndrome in Parkinson's disease, 574
steroid treatment, Clinical and electrophysiological improvement of adrenomyeloneuropathy with steroid treatment, 822
stiff man syndrome, Specific phobia is a frequent non-motor feature in stiff man syndrome, 462
straining, Colonic transit time and rectoanal videomannometry in Parkinson's disease, 268
streplococcal infection, Tourette's syndrome: a cross sectional study to examine the PANDAS hypothesis, 602
streplococcus, Sydenham's chorea may be a risk factor for drug induced parkinsonism, 1350
stroke, A comparative study into the one year cumulative incidence of depression after stroke and myocardial infarction, 581
Abnormalities on diffusion weighted magnetic resonance imaging performed several weeks after a minor stroke or transient ischaemic attack, 734
Admission to neurological intensive care: who, when, and why?, iii2
American trypanosomiasis (Chagas' disease): an unrecognised cause of stroke, 516
Antithrombotic drugs in secondary stroke prevention among a community dwelling older population, 1100
Auditory disturbance as a prodrome of anterior inferior cerebellar artery infarction, 1644
Conflict and integration of spatial attention between disconnected hemispheres, 395
Differences in the diagnostic accuracy of acute stroke clinical subtypes defined by multimodal magnetic resonance imaging, 886
Effect of deprivation on time to hospital in acute stroke, 545
Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621
Human cellular inflammation in the pathology of acute cerebral ischaemia, 1476
Incidence, risk, and case fatality of first ever stroke in the elderly population. The Rotterdam Study, 317
Intra-arterial thrombolysis in 24 consecutive patients with internal carotid artery T occlusions, 739
Isolated total tongue paralysis as a manifestation of bilateral medullary infarction, 1698
Lack of hemispheric dominance for consciousness in acute ischaemic stroke, 889
Long term risks of stroke, myocardial infarction, and vascular death in "low risk" patients with a non-recent transient ischaemic attack, 577
Meningioma presenting as stroke: report of two cases and estimation of incidence, 136
Middle cerebral artery territory infarction sparing the precentral gyrus: report of three cases, 510
Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
Placing nasogastric tubes in stroke patients with dysphagia: efficiency and tolerability of the reflex placement, 1429
Reappraisal of early CT signs to predict the arterial occlusion site in acute embolic stroke, 649
Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
Stroke care: the way forward, 411
Stroke: neuroplasticity and recent approaches to rehabilitation, 1465
The impact of delays in computed tomography of the brain on the accuracy of diagnosis and subsequent management in patients with minor stroke, 77
The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
Transoesophageal echocardiography: which stroke patients benefit most from this investigation?, 283
Visible infarction on CT after stroke—what does it tell?, 413
stroke assessment, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke motor recovery, Stroke motor recovery: active neuromuscular stimulation and repetitive practice schedules, 1562
stroke outcome, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke prevention, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
subarachnoid haemorrhage, Admission to neurological intensive care: who, when, and why?, iii2
Informed consent in trials for neurological emergencies: the example of subarachnoid haemorrhage, 988
Pituitary deficiency following aeurysmal subarachnoid haemorrhage, 1133
Ruptured intracranial aneurysms: the outcome of surgical treatment in American trypanosomiasis (Chagas' disease): an unrecognised cause of stroke, 516
Antithrombotic drugs in secondary stroke prevention among a community dwelling older population, 1100
Auditory disturbance as a prodrome of anterior inferior cerebellar artery infarction, 1644
Conflict and integration of spatial attention between disconnected hemispheres, 395
Differences in the diagnostic accuracy of acute stroke clinical subtypes defined by multimodal magnetic resonance imaging, 886
Effect of deprivation on time to hospital in acute stroke, 545
Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621
Human cellular inflammation in the pathology of acute cerebral ischaemia, 1476
Incidence, risk, and case fatality of first ever stroke in the elderly population. The Rotterdam Study, 317
Intra-arterial thrombolysis in 24 consecutive patients with internal carotid artery T occlusions, 739
Isolated total tongue paralysis as a manifestation of bilateral medullary infarction, 1698
Lack of hemispheric dominance for consciousness in acute ischaemic stroke, 889
Long term risks of stroke, myocardial infarction, and vascular death in "low risk" patients with a non-recent transient ischaemic attack, 577
Meningioma presenting as stroke: report of two cases and estimation of incidence, 136
Middle cerebral artery territory infarction sparing the precentral gyrus: report of three cases, 510
Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
Placing nasogastric tubes in stroke patients with dysphagia: efficiency and tolerability of the reflex placement, 1429
Reappraisal of early CT signs to predict the arterial occlusion site in acute embolic stroke, 649
Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
Stroke care: the way forward, 411
Stroke: neuroplasticity and recent approaches to rehabilitation, 1465
The impact of delays in computed tomography of the brain on the accuracy of diagnosis and subsequent management in patients with minor stroke, 77
The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
Transoesophageal echocardiography: which stroke patients benefit most from this investigation?, 283
Visible infarction on CT after stroke—what does it tell?, 413
stroke assessment, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke motor recovery, Stroke motor recovery: active neuromuscular stimulation and repetitive practice schedules, 1562
stroke outcome, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke prevention, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
subarachnoid haemorrhage, Admission to neurological intensive care: who, when, and why?, iii2
Informed consent in trials for neurological emergencies: the example of subarachnoid haemorrhage, 988
Pituitary deficiency following aeurysmal subarachnoid haemorrhage, 1133
Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680
transcranial magnetic stimulation, Focused high frequency repetitive transcranial magnetic stimulation for localisation of the unexposed primary motor cortex during brain tumour surgery, 1283
Improvement of central motor conduction after bone marrow transplantation in adrenoleukodystrophy, 373
Increased visual cortical excitability in ecstasy users: a transcranial magnetic stimulation study, 1136
Reversible callosal disconnection syndrome in internal hydrocephalus, 389
The effect of transcranial magnetic stimulation on movement selection, 985
transient ischaemic attack, Abnormalities on diffusion weighted magnetic resonance imaging performed several weeks after a minor stroke or transient ischaemic attack, 734
Long term risks of stroke, myocardial infarction, and vascular death in “low risk” patients with a non-recent transient ischaemic attack, 577
Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
transient ischaemic attacks, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
transoesophageal echocardiography, Transoesophageal echocardiography: which stroke patients benefit most from this investigation?, 283
traumatic brain injury, Brain tissue oxygen guided treatment supplementing ICP/CPP therapy after traumatic brain injury, 760
Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
Outcome after mild traumatic brain injury: an examination of recruitment bias, 39
Thalamic proton magnetic resonance spectroscopy in vegetative state induced by traumatic brain injury, 33
traumatic optic neuropathy, Visual prognosis after indirect traumatic optic neuropathy, 246
treatment, Radionuclide venography for the treatment of third occipital headache, 88
tremor, Chronic deep brain stimulation for the treatment of tremor in multiple sclerosis: review and case reports, 1392
trigeminal neuralgia, Measurement of pulse pressure profiles in patients with trigeminal neuralgia, 533
trinucleotide repeat expansion, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444
TSH, Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
tuberous sclerosis, GABA$_A$ receptor active steroids are altered in epilepsy patients with tuberous sclerosis, 667
tumour, Cruevelhier and acoustic neuroma, 1015
tumour haemorrhage, Spontaneous haemorrhage into metastatic brain tumours after stereotactic radiosurgery using a linear accelerator, 908
ubiquitin, Attenuated nuclear shrinkage in neurons with nuclear inclusions of SCA1 brains, 597
Familial motor neuron disease with dementia: phenotypic variation and cerebellar pathology, 1516
ulcus terebrans, Ulcus terebrans: an unusual cause of paraparesis, 1643
ultrasonography, Second harmonic imaging: a new ultrasound technique to assess human brain tumour perfusion, 333
Unified Parkinson’s Disease Rating Scale, Physical handicadnia in Parkinson’s disease, 1308
untethering, Adult tethered cord syndrome presenting with refractory diarrhoea, 1396
upper airway, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642
upper limb, Effects of levodopa on upper limb mobility and gait in Parkinson’s disease, 1304
vagus nerve stimulation, BOLD fMRI activation induced by vagus nerve stimulation in seizure patients, 811
variant Creutzfeldt-Jakob disease, Screening for variant Creutzfeldt-Jakob disease, 828
vascular dementia, Coexistence of CADASIL and Alzheimer’s disease, 790
vasculitis, Peripheral neuropathy in hepatitis C virus infection with and without cryoglobulinemia, 1267
vasospastic amaurosis fugax, Vasospastic amaurosis fugax, 149
vein of Galen aneurysmal malformation, Vein of Galen malformations, i42
velocity dependent properties, Velocity dependent passive muscle stiffness, 283
venous sinus, Idiopathic intracranial hypertension: 12 cases treated by venous sinus stenting, 1662
ventricular drainage, Early diagnosis of external ventricular drainage infection: results of a prospective study, 929
Failure of regular external ventricular drain exchange to reduce CSF infection, 1598
ventriculomegally, Assessment of the impact of the removal of cerebrospinal fluid on cerebral tissue volumes by advanced volumetric 3D-MRI in posthaemorrhagic hydrocephalus in a premature infant, 658
verbal memory, Development of selective verbal memory impairment secondary to a left thalamic infarct: a longitudinal case study, 255
vertebral artery, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
vertebral artery dissection, Economy class stroke syndromes: vertebral artery dissection revisited, 1594
vertebrobasilar insufficiency, Sudden bilateral simultaneous deafness with vertigo as a sole manifestation of vertebrobasilar insufficiency, 539
vertigo, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388
vestibular cortex, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388
vestibular function, Vestibulo-ocular areflexia in families with spinocerebellar ataxia type 3 (Machado-Joseph disease), 1403
vestibular reflexes, Vestibular activation by bone conducted sound, 771
Vestibular reflexes and positional manoeuvres, 289
vestibular schwannoma, Clinical experience with gamma knife stereotactic radiosurgery in the management of vestibular schwannomas secondary to type 2 neurofibromatosis, 1288
video recording, Trigeminal autonomic cephalalgia-tic-like syndrome associated with a pontine tumour in a one year old girl, 391
videofluoroscopy, Vocal fold motion impairment in patients with multiple system atrophy: evaluation of its relationship with swallowing function, 982
vigabatrin, A controlled study comparing visual function in patients treated with vigabatrin and tiagabine, 339
Vigabatrin, tiagabine, and visual fields, 286
violence, New evidence for an association between the CSF HVA:5-HIAA ratio and psychopathic traits, 918
virology, Neurovirological methods and their applications, 1016
vision, A controlled study comparing visual function in patients treated with vigabatrin and tiagabine, 339
visual attention, “Bottom-up” and “top-down” effects on reading saccades: a case study, 1423
visual cortex, Increased visual cortical excitability in ecstasy users: a transcranial magnetic stimulation study, 1136
visual loss, Visual prognosis after indirect traumatic optic neuropathy, 246
visual prognosis, Visual prognosis after indirect traumatic optic neuropathy, 246
vitamin B-12, Low vitamin B-12 status in confirmed Alzheimer’s disease as revealed by serum holotranscobalamin, 959
vocal cord, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642
vocal fold motion impairment, Vocal fold motion impairment in patients with multiple system atrophy: evaluation of its relationship with swallowing function, 982
volumetric MRI, Assessment of the impact of the removal of cerebrospinal fluid on cerebral tissue volumes by advanced volumetric 3D-MRI in posthaemorrhagic hydrocephalus in a premature infant, 658
Development of selective verbal memory impairment secondary to a left thalamic infarct: a longitudinal case study, 255
volumetry, Amygdala volumetry in “imaging-negative” temporal lobe epilepsy, 1245
Medial temporal lobe atrophy in patients with refractory temporal lobe epilepsy, 1627
Von Recklinghausen, Neurofibromatosis, 384
wallerian degeneration, Wallerian degeneration of the inferior cerebellar peduncle depicted by diffusion weighted imaging, 977
wasp sting, Encephalomyeloradiculopathy associated with wasp sting, 134
Website, Internet resources for neurosurgeons and neuropathologists, 154
Wernicke encephalopathy, Reversible acute axonal polyneuropathy associated with Wernicke-Korsakoff syndrome: impaired physiological nerve conduction due to thiamine deficiency?, 674
West Nile virus infection, Acute anterior radiculitis associated with West Nile virus infection, 823
West Riding Lunatic Asylum, The West Riding Lunatic Asylum, 1141
whiplash injuries, Focal hand dystonia after cervical whiplash injury, 134
white matter disease, Brain white matter lesions detected by magnetic resonance imaging are associated with balance and gait speed, 94
white matter lesions, The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
whole cell mode, Nanotechnology for neuronal ion channels, 1466
William Senhouse Kirkes, Cerebral embolism in endocarditis: William Senhouse Kirkes (1823–64), 1570
Wilson’s disease, Faces of the giant panda and her cub: MRI correlates of Wilson’s disease, 657
working memory, Moderate hypoglycaemia obliterates working memory in humans with and without insulin treated diabetes, 278
Working memory deficits in multiple sclerosis: a controlled study with auditory P600 correlates, 1231
world wide web, Internet resources for neurosurgeons and neuropathologists, 154
xenobiotics, Polymorphisms of toxifying and detoxifying hepatic enzymes in amyotrophic lateral sclerosis, 1161
X-linked adrenoleucodystrophy, Clinical and electrophysiological improvement of adrenomyeloneuropathy with steroid treatment, 822
X-linked learning difficulties, Learning difficulties: what the neurologist needs to know, 130
X-linked mental retardation, Brain cysts associated with mutation in the Aristaless related homeobox gene, ARX, 536
