Subject index

AAA syndrome, Allgrove or 4 "A" syndrome: an autosomal recessive syndrome causing multisystem neurological disease, 654
abdominal reflex, The deep tendon and the abdominal reflexes, 150
ABN Abstracts, Joint congress Association of British Neurologists and the Neurological Association of South Africa, University of Cape Town, 29 January – 1 February 2003, 1166
Proceedings of the Association of British Neurologists and the British Neuropsychiatry Association, Royal College of Physicians, 2–4 October 2002, 397
Proceedings of the Association of British Neurologists, Cardiff City Hall, Cathays Park, 2 April–4 April 2003, 1448
Proceedings of the Head Injury Conference and Annual Meeting of the British Neuropsychiatry Association, the Institute of Child Health, central London, 12–14 February 2003, 830
acetylcholine receptors, Autoimmune myasthenia gravis after cardiac surgery, 392
acetylcholinesterase, Brain acetylcholinesterase activity in mild cognitive impairment and early Alzheimer’s disease, 113
acetylcholinesterase inhibition, Acetylcholinesterase inhibition: a novel approach in the treatment of neurogenic orthostatic hypotension, 1294
Priority setting: learning to make tough decisions, 1185
acoustic neuroma, Gamma knife stereotactic radiosurgery for unilateral acoustic neuromas, 1536
ACTH, Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
active neuromuscular stimulation, Stroke motor recovery: active neuromuscular stimulation and repetitive practice schedules, 1562
activities of daily living, Behavioural abnormalities contribute to functional decline in Huntington’s disease, 120
acute neuropathy, A variant of multifocal motor neuropathy with acute generalised presentation and persistent conduction blocks, 1555
acute stroke, Clinical radiologic correlations in acute stroke: is the signal intensity at the end of the tunnel getting brighter quicker?, 840
acyclovir, Brain stem encephalitis caused by primary herpes simplex 2
adolescence, Cognitive dysfunction in young men following head injury in childhood and adolescence: a population study, 933
Neurological and cognitive decline in adolescence, 144
Transition from paediatric to adult medical services for young people with chronic neurological problems, 1011
adrenoleukodystrophy, Improvement of central motor conduction after bone marrow transplantation in adrenoleukodystrophy, 373
adrenomyeloneuropathy, Clinical and electrophysiological improvement of adrenomyeloneuropathy with steroid treatment, 822
adult neuronal ceroid lipofuscinosis, Neuroleptic malignant syndrome in Kufs’ disease, 365
affect, Dissociation of affective modulation of recollective and perceptual experience following amygdala damage, 253
age, Onset age and severity of motor impairment are associated with reduction of myocardial 127I-MIBG uptake in Parkinson’s disease, 423
aging, fMRI studies of associative encoding in young and elderly controls and cognitive decline in Alzheimer’s disease, 788
aircraft, Economy class stroke syndromes: vertebral artery dissection revisited, 1594
Alexander’s disease, The clinicopathological spectrum of Rosenthal fibre encephalopathy and Alexander’s disease: a case report and review of the literature, 807
Allgrove’s syndrome, Allgrove or 4 "A" syndrome: an autosomal recessive syndrome causing multisystem neurological disease, 654
a motor neuron, The relation between Ashworth scale scores and the excitability of the α motor neurons in patients with post-stroke muscle spasticity, 646
ALS/AQ, Deriving summary indices of health status from the Amyotrophic Lateral Sclerosis Assessment Questionnaires (ALS/AQ-40 and ALS/AQ-5), 242
Alzheimer’s disease, Alzheimer’s disease: differences in technetium-99m HMPAO SPECT scan findings between early onset and late onset dementia, 715
A randomised placebo controlled study to assess the effects of cholinergic treatment on muscarinic receptors in Alzheimer’s disease, 1567
A study of stereotypic behaviours in Alzheimer’s disease and frontal and temporal variant frontotemporal dementia, 1398
Brain acetylcholinesterase activity in mild cognitive impairment and early Alzheimer’s disease, 113
Coexistence of CADASIL and Alzheimer’s disease, 790
Coexistent Lewy body disease in a case of “visual variant of Alzheimer’s disease”, 389
Dopales and dementia, 147
fMRI studies of associative encoding in young and elderly controls and mild Alzheimer’s disease, 44
Head injury and Alzheimer’s disease, 841
Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on; a partial replication, 857
Intrathecal inflammation preceedes development of Alzheimer’s disease, 1200
Limb length and dementia in an older Korean population, 427
Long term neuropsychological outcome after head injury: relation to APOE genotype, 1047
Low vitamin B-12 status in confirmed Alzheimer’s disease as revealed by serum holotranscobalamin, 959
Melissa officinalis extract in the treatment of patients with mild to moderate Alzheimer’s disease: a double blind, randomised, placebo controlled trial, 863
Neuroimaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371
Predictors of institutionalisation in people with dementia, 1315
Saitohin gene is not associated with Alzheimer’s disease, 362
Shifts in angiotensin I converting enzyme insertion allele frequency across Europe: implications for Alzheimer’s disease risk, 1159
Systemic infection, interleukin 1β, and cognitive decline in Alzheimer’s disease, 788
The topography of metabolic deficits in posterior cortical atrophy (the visual variant of Alzheimer’s disease) with FDG-PET, 1521
American trypanosomiasis, American trypanosomiasis (Chagas’ disease): an unrecognised cause of stroke, 516
amnesia, A case of frontal network amnesia, 106
Hypothalamic amnesia and frontal lobe function disorders after Langerhans cell histiocytosis, 1348
Limbic encephalitis presenting with topographical disorientation and amnesia, 110
amoebiasis, Identification of amoebae in the CSF in a patient with meningencephalitis, 1445
amygdala, Amygdala volumetry in “imaging-negative” temporal lobe epilepsy, 1245
Disassociation of affective modulation of recollective and perceptual experience following amygdala damage, 253
Similarity and disparity of obsessive-compulsive disorder and schizophrenia in MR volumetric abnormalities of the hippocampus-amygdala complex, 962
amyloid β protein, Association of neprilysin polymorphism with cerebral amyloid angiopathy, 749
amyotrophic lateral sclerosis, Deriving summary indices of health status from the Amyotrophic Lateral Sclerosis Assessment Questionnaires (ALS/AQ-40 and ALS/AQ-5), 242
Diffusion tensor imaging detects corticospinal tract involvement at multiple levels in amyotrophic lateral sclerosis, 1250

Dysphagia due to Chiari I malformation mimicking ALS, 549

Early or late appearance of “dropped head syndrome” in amyotrophic lateral sclerosis, 683

Effect of a multidisciplinary amyotrophic lateral sclerosis (ALS) clinic on ALS survival: a population based study, 1996–2000, 1258

Persistent bitter taste as an initial symptom of amyotrophic lateral sclerosis, 687

Polymerisms of toxicifying and detoxifying hepatic enzymes in amyotrophic lateral sclerosis, 1161

Predictors of successful self control during brain-computer communication, 1117

Prolonged survival in motor neuron disease: a descriptive study of the King’s database 1990–2002, 995

Quality of life in motor neurone disease—from a more practical assessment tool?, 287

Transcutaneous cervical root stimulation in the diagnosis of multifocal motor neuropathy with conduction block, 1329

aneurysm, Central and peripheral fusiform aneurysms six years after left atrial myxoma resection, 280

Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680

angiography, Measuring carotid stenosis, 140

Reappraisal of early CT signs to predict the arterial occlusion site in acute embolic stroke, 649

angioplasty, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586

angiotensin I converting enzyme, Shifts in angiotensin I converting enzyme insertion allele frequency across Europe: implications for Alzheimer’s disease risk, 1159

ankle reflex, Comparison of the tendon and plantar strike methods of eliciting the ankle reflex, 1351

anorexia nervosa, Central pontine myelinolysis associated with hypokalaemia in anorexia nervosa, 353

anterior canal failure, Anterior canal failure: ocular torsion without

anterior radiculitis, Acute paraneoplastic opsoclonus-myoclonus syndrome associated with antimitochondrial autoantibodies, 649

Auditory disturbance as a prodrome of anterior inferior cerebellar artery, 273

Axial dystonia, Administration of trihexyphenidyl to treat axial dystonia in the treatment of early Parkinson’s disease, 137

Axial tremor, Axial arm movements after thalamotomy for Parkinsonian tremor, 258

Ayala, Ataxia, Frontal lobe atrophy in Wilson’s disease, 878

Autoimmune myasthenia, Antithyroid antibodies in patients with autoimmune thryroiditis, 683

Autonomic diseases: clinical features and laboratory evaluation, iii31

Autonomic diseases: management, ii42

autonomic nervous system, Autonomic nervous system testing may not distinguish multiple system atrophy from Parkinson’s disease, 1461

Autosomal dominant cerebellar ataxia, Task specific focal dystonia: a presentation of spino cerebellar ataxia type 6, 1444

Debrisoquine hydroxylase gene polymorphism (CYP2D64) in dementia with Lewy bodies, 135

Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on; a partial replication, 857

Long term neuropsychological outcome after head injury: relation to APOE genotype, 1047

Mental deterioration later after head injury—does it happen?, 1014

apomorphine, Deep brain stimulation of the subthalamic nucleus: effectiveness in advanced Parkinson’s disease patients previously reliant on apomorphine, 170

aqueduct stenosis, Effect of endoscopic third ventriculostomy on neuropsychological outcome in late onset idiopathic aqueduct stenosis: a prospective study, 222

arachnoid granulations, Intracranial hypertension secondary to giant arachnoid granulations, 418

arousal, Lack of hemispheric dominance for consciousness in acute ischaemic stroke, 889

arterial hypertension, Influence of age on the association between primary hemifacial spasm and arterial hypertension, 979

ARX gene, Brain cysts associated with mutation in the ARX gene, 536

aseptic meningoencephalitis, Lymphocytic hypophysitis successfully treated with azathioprine: first case report, 1581

Ashworth scale, The relation between Ashworth scale scores and the excitability of the motor neurones in patients with post-stroke muscle spasticity, 646

aspirin, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452

association study, Role of the dopamine D5 receptor (DR5) as a susceptibility gene for cervical dystonia, 665

asthma, Pseudozeuses and asthma, 639

asymmetrical signs, Mirror movements of the non-affected hand in hemiparkinsonian patients: a reflection of ipsilateral motor overactivity?, 1352

ataxia, Ataxic arm movements after thalamotomy for Parkinsonian tremor, 258

ATPase, Reversible acute axonal polyneuropathy associated with Wernicke-Korsakoff syndrome: impaired physiological nerve conduction due to thiamine deficiency?, 674

atrophy, Corticosteroids do not prevent optic nerve atrophy following optic neuritis, 1139

Neuromaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371

Atypical Pick’s disease, Alterations of muscarinic acetylcholine receptors in atypical Pick’s disease without Pick bodies, 965

augmentation index, Measurement of pulse pressure profiles in patients with trigeminal neuralgia, 333

autobodies, Adult paraneoplastic opsoclonus-myoclonus syndrome associated with antimitochondrial autoantibodies, 1595

autimmune myasthenia, Autoimmune myasthenia gravis after cardiac surgery, 392

autonomic disease, Autonomic diseases: clinical features and laboratory evaluation, iii31

Autonomic diseases: management, ii42

Constipation in neurological diseases, 13

autonomic nervous system, Autonomic diseases: clinical features and laboratory evaluation, iii31

Autonomic diseases: management, ii42

Autonomic nervous system testing may not distinguish multiple system atrophy from Parkinson’s disease, 56

Intensive care neurology and the autonomic nervous system, iii1

Organisation of the sympathetic skin response in spinal cord injury, iii7

autoregulation, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765

Autosomal dominant cerebellar ataxia, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444

www.jnnp.com
autosomal dominant partial epilepsy with auditory features, Genetics of temporal lobe epilepsy, 1359

awareness, Regional cerebral glucose metabolism in akineti catatonia and after remission, 1003

axonal neurotoxicity, An unusual phenotype of McLeod syndrome with late onset axonal neuropathy, 1697

axons, Axonal injury in multiple sclerosis, 695

azathioprine, Lymphocytic hypophysitis successfully treated with azathioprine: first case report, 1581

bacterial infection, Aetiologic diagnosis of brain abscesses and spinal infections: application of broad range bacterial polymerase chain reaction analysis, 728

balance, Brain white matter lesions detected by magnetic resonance imaging are associated with balance and gait speed, 94

basal cell carcinoma, Ulcerus terebrans: an unusual cause of paraparesis, 1643

basal ganglia, Childhood onset generalised dystonia can be modelled by increased gain in the indirect basal ganglia pathway, 1509

basilar artery, Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621

basilar thrombosis, Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621

behavioural dysfunction, Behavioural abnormalities contribute to functional decline in Huntington’s disease, 120

Behcet’s disease, Prevalence and patterns of neurological involvement in Behcet’s disease: a prospective study from Iraq, 608

benign sensory changes, Hemisensory syndrome is associated with a low diagnostic yield and a nearly uniform benign prognosis, 1113

β-adrenoceptor expression, Expression of β2 adrenoceptors on peripheral blood mononuclear cells in patients with primary and secondary progressive multiple sclerosis: a longitudinal six month study, 197

β-endorphin, β-endorphin concentrations in PBMC of patients with different clinical phenotypes of multiple sclerosis, 495

Bickerstaff’s brain stem encephalitis, Recurrent anti-GQ1b IgG antibody syndrome showing different phenotypes in different periods, 1350

bilateral ataxia, Bilateral cerebellar ataxia as the sole manifestation of a unilateral rostral pontine terminal infarct, 1445

bilateral hearing loss, Sudden bilateral simultaneous deafness with vertigo as a sole manifestation of vertebrobasilar insufficiency, 539

bilateral medullary infarction, Isolated total tongue paralysis as a manifestation of bilateral medullary infarction, 1698

bilateral subthalamic deep brain stimulation, Defining a role for the bilateral subthalamic deep brain stimulation, 1848

bilateral medullary infarction, Bilateral medullary infarction: a manifestation of bilateral medullary infarction, 1698

bilateral subthalamic deep brain stimulation, Defining a role for the bilateral subthalamic deep brain stimulation, 1848

BOLD fMRI, BOLD fMRI activation induced by vagus nerve stimulation in seizure patients, 811

bone conduction, Vestibular activation by bone conducted sound, 771

bone marrow transplantation, Improvement of central motor conduction by bone marrow transplantation in adrenoleukodystrophy, 373

botulinum toxins, Botulinum toxin type B in blepharospasm and hemifacial spasm, 687

brain, Coccidioidomycosis of the brain, mimicking en plaque meningioma, 806

brain abscess, Detection of Staphylococcus aureus by 16S rRNA directed in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000

brain atrophy, MRI lesion volume heterogeneity in primary progressive MS in relation with axonal damage and brain atrophy, 950

The longitudinal relation between brain lesion load and atrophy in multiple sclerosis: a 14 year follow up study, 1551

brain cysts, Brain cysts associated with mutation in the Aristaless related homeobox gene, ARX, 536

brain function, Oxytocin, brain function, and neuropsychiatric disorders, 837

brain haemorrhage, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388

brain infarction, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359

brain infection, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359

brain injury, Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on: a partial replication, 857

Normal jugular bulb oxygen saturation, 784

brain lesion load, The longitudinal relation between brain lesion load and atrophy in multiple sclerosis: a 14 year follow up study, 1551

brain metastases, Cerebral metastasis after primary renal cell carcinoma, 141

Spontaneous haemorrhage into metastatic brain tumours after stereotactic radiosurgery using a linear accelerator, 908

brain oedema, Hemicranieotony for large middle cerebral artery territory infarction: outcome in 19 patients, 800

brain sagging, Brain stem and cerebellar dysfunction after lumbar spinal fluid drainage: case report, 992

brain stem, Brain stem encephalitis caused by primary herpetic simplex 2 infection in a young woman, 1323

New onset migraine with a brain stem cavernous angioma, 680

brain tissue, Brain tissue oxygen guided treatment supplementation ICP/ CPP therapy after traumatic brain injury, 760

Effects of decompressive craniectomy on brain tissue oxygen in patients with intracranial hypertension, 513

Intracerebral microdialysis and CSF hydrodynamics in idiopathic adult hydrocephalus syndrome, 217

brain tumour, Is neurocysticercosis a risk factor in coexistent intracranial disease? An MRI based study, 359

Magnetoeencephalographic representation of the sensorimotor hand area in cases of intracerebral tumour, 1649

Second harmonic imaging: a new ultrasound technique to assess human brain tumour perfusion, 333

The effect of brain tumour laterality on anxiety levels among neurosurgical patients, 1278

brain-computer communication, Predictors of successful self control during brain-computer communication, 1117

breast cancer, Anti-Ma2 antibody related paraneoplastic limbic/brain stem encephalitis associated with breast cancer expressing Ma1, Ma2, and Ma3 mRNAs, 1332

CACNA1A, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444

CADASIL, Coexistence of CADASIL and Alzheimer’s disease, 790

CADASIL syndrome, “CADASIL coma”: an underdiagnosed acute encephalopathy, 249

callasal disconnection, Reversible callasal disconnection syndrome in internal hydrocephalus, 389

campocormia, Head drop and campocormia, 692

The naming of parts, 692

cardiomyopathy, Association of cardiomyopathy caused by autonomic nervous system impairment with the Miller Fisher syndrome, 689

carotid artery, Measuring carotid stenosis, 1003

Meningioma presenting as stroke: report of two cases and estimation of incidence, 136

carpal tunnel syndrome, Clinical surveillance of carpal tunnel syndrome in two areas of the United Kingdom, 1991–2001, 1674

Splitting for carpal tunnel syndrome: prognostic indicators of success, 1342

cassava, Incidence of endemic ataxic polyneuropathy and its relation to exposure to cyanide in a Nigerian community, 1417

catalepsy, CSF hypocretin-1 levels in narcolepsy, Kleine-Levin syndrome, and other hypersomnias and neurological conditions, 1667

catatonia, Regional cerebral glucose metabolism in akineti catatonia and after remission, 1003

catecholamine, New evidence for an association between the CSF HVA:5-HIAA ratio and psychopathic traits, 918

caseolvin-3, Immunohistochemical study of caseolvin-3 in idiopathic hyperCaemio, 547

cavernous angioma, New onset migraine with a brain stem cavernous angioma, 680

cavernous haemangioma, Hypertrophic olivary degeneration following pontine haemorrhage: hypertensive crisis or cavernous haemangioma bleeding?, 797

CD45, The role of the PTPRC (CD45) mutation in the development of multiple sclerosis in the North West region of the United Kingdom, 944

www.jnnp.com
central nervous system, Brain lesions in the course of generalised tetanus, 1432
Congenital abnormalities of the central nervous system, 13
Linear scleroderma “en coup de sabre” coexisting with plaque-morphae: neuroradiological manifestation and response to corticosteroids, 661
Molecular pathogenesis of neuroinflammation, 1364

central pontine myelinolysis, Central pontine myelinolysis associated with hypokalaemia in anorexia nervosa, 353
Central pontine myelinolysis temporarily related to hypophosphataemia, 820
cerebellum, Olfactory dysfunction in degenerative ataxias, 1435
cerebral amyloid angiopathy, Association of nephrin polymorphism with cerebral amyloid angiopathy, 749
cerebral aneurysm, Failure to detect Chlamydia pneumoniae DNA in cerebral aneurysmal sac tissue with two different polymerase chain reaction methods, 756
Pituitary deficiency following aneurysmal subarachnoid haemorrhage, 1133
cerebral angiography, A case of gliosarcoma appearing as ischaemic stroke, 364
cerebral arteriovenous malformations, Should asymptomatic patients with hereditary haemorrhagic telangiectasia (HHT) be screened for cerebral vascular malformations? Data from 22 061 years of HHT patient life, 743

cerebral atrophy, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
cerebral autoregulation, Cerebral vasomotor reactivity testing in head injury: the link between pressure and flow, 1053
cerebral blood flow, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
Long term treatment and disease severity change brain responses to levodopa in Parkinson’s disease, 844
cerebral cortex, Cognitive presentation of multiple sclerosis: evidence for a cortical variant, 872
cerebral cyst, Expanding cerebral cysts (lacunae): a treatable cause of progressive midbrain syndrome, 393
cerebral embolism, Cerebral embolism in endocarditis: William Sentence Kirkes (1823–64), 1570
Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 1621

cerebral haemorrhage, Should asymptomatic patients with hereditary haemorrhagic telangiectasia (HHT) be screened for cerebral vascular malformations? Data from 22 061 years of HHT patient life, 743
cerebral hypoxia, Brain tissue oxygen guided treatment supplementing ICP/CPP therapy after traumatic brain injury, 760
cerebral infarction, A case of gliosarcoma appearing as ischaemic stroke, 364
Hemicraniectomy for large middle cerebral artery territory infarction: do these patients really benefit from this procedure?, 1600
Hemicraniectomy for large middle cerebral artery territory infarction: outcome in 19 patients, 800
Raised plasma oxidised LDL in acute cerebral infarction, 312
Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
cerebral ischaemia, Clinical radiologic correlations in acute stroke: is the signal intensity at the end of the tunnel getting brighter quicker?, 840
S100B as a surrogate marker for successful clot lysis in hyperacute middle cerebral artery occlusion, 322
cerebral oxygen metabolism, Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
cerebral palsy, The cerebral palsies: a physiological approach, 123
cerebral perfusion, Second harmonic imaging: a new ultrasound technique to assess human brain tumour perfusion, 333
cerebral trauma, High concentrations of procollagen propeptides in chronic subdural haematoma and effusion, 522
cerebral venous thrombosis, Recanalisation of cerebral venous thrombosis, 459
cerebrospinal fluid, A prospective study of CSF markers in 250 patients with possible Creutzfeldt–Jakob disease, 1210
Hypothesis on the pathophysiology of meningomyelitis based on simulation of cerebrospinal fluid dynamics, 344
Identification of amoebae in the CSF in a patient with meningoencephalitis, 1445

Intracranial hypotension after chiropractic manipulation of the cervical spine, 821
cerebrovascular disease, Neuroimaging tools to rate regional atrophy, subcortical cerebrovascular disease, and regional cerebral blood flow and metabolism: consensus paper of the EADC, 1371
Reliability of the variables in a new set of models that predict outcome after stroke, 447
cerebrovascular disorders, Association of nephrin polymorphism with cerebral amyloid angiopathy, 749
Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
cerebrovascular reactivity, Cerebral vasomotor reactivity testing in head injury: the link between pressure and flow, 1053
cervical dystonia, Role of the dopamine D5 receptor (DRD5) as a susceptibility gene for cervical dystonia, 665
cervical headache, Radiofrequency neurotomy for the treatment of third occipital headache, 88
cervical spine, Intracranial hypotension after chiropractic manipulation of the cervical spine, 821

Penumbra, Differences in the diagnostic accuracy of acute stroke clinical subtypes defined by multimodal magnetic resonance imaging, 886
Perfusion weighted MRI, A combination of Tc-SPECT or perfusion weighted magnetic resonance imaging with spinal tap test helpful in the diagnosis of normal pressure hydrocephalus?, 479
Perimetry, Spatial vision in visually asymptomatic subjects at high risk for multiple sclerosis, 1145
Peripheral neuropathy, Serum IgG antibodies to PO dimer and 35 kDa PO related protein in neuropathy associated with monoclonal gammopathy, 1262
Perirhinal cortex, Medial temporal lobe atrophy in patients with refractory temporal lobe epilepsy, 1627
Periventricular leucomalacia, The cerebral palsies: a physiological approach, 123
Persistent conduction blocks, A variant of multifocal motor neuropathy with acute, generalised presentation and persistent conduction blocks, 1555
Persistent vegetative state, Awakenings from persistent vegetative state: report of three cases with parkinsonism and brain stem lesions on MRI, 1571 Thalamic proton magnetic resonance spectroscopy in vegetative state induced by traumatic brain injury, 33
PET, A study of persistent post-concussion symptoms in mild head trauma using positron emission tomography, 326 “Bottom-up” and “top-down” effects on reading saccades: a case study, 1423 Long term treatment and disease severity change brain responses to levodopa in Parkinson’s disease, 844 Objective measures for the progression of Parkinson’s disease, 287 Preoperative motor system brain mapping using positron emission tomography and statistical parametric mapping: hints on cortical reorganisation, 471 Regional cerebral glucose metabolism in akinetic catatonia and after remission, 1003 Phenotype, Genetically confirmed clinical Huntington’s disease with no observable cell loss, 968 Two clinicopathological cases of a dominantly inherited, adult onset orthochromatic leucodystrophy, 671 Phobia, Specific phobia is a frequent non-motor feature in stiff man syndrome, 462 Phosphates, Increased visual cortical excitability in ecstasy users: a transcranial magnetic stimulation study, 1136
Physical anhedonia, Physical anhedonia in Parkinson’s disease, 1308
Physical Anhedonia Scale, Physical anhedonia in Parkinson’s disease, 1308
Physical practice, Prevalence and impact of depression and pain in neurology outpatients, 1587
Physiotherapy, A randomised controlled trial comparing rehabilitation against standard therapy in multiple sclerosis patients receiving associated steroid treatment, 1225
Pick bodies, Alterations of muscarinic acetylcholine receptors in atypical Pick’s disease without Pick bodies, 965
Pick’s disease, Pick’s disease, 169
Pituitary neoplasms, SUNCT syndrome secondary to prolactinoma, 1590
Plaque-morphea, Linear scleroderma “en coup de sabre” coexisting with plaque-morphea: neuroradiological manifestation and response to corticosteroids, 661
Plasticity, Functional recovery after surgical resection of low grade gliomas in eloquent brain: hypothesis of brain compensation, 901
Polymorphism, Association of neprilysin polymorphism with cerebral amyloid angiopathy, 749
Polymyositis, Diagnosis and treatment of inflammatory muscle diseases, 1125
Polynuropathy, Reversible acute axonal polyneuropathy associated with Wernicke-Korsakoff syndrome: impaired physiological nerve conduction due to thiamine deficiency?, 674 Treatment of IgM antibody associated polynuropathies using rituximab, 485
Pons, Faces of the giant panda and her cub: MRI correlates of Wilson’s disease, 657
Pontine tumour, Trigeminal autonomic cephalogia-tic-like syndrome associated with a pontine tumour in a one year old girl, 391
Population based studies, Incidence, risk, and case fatality of first ever stroke in the elderly population. The Rotterdam Study, 317
Population study, The prevalence of frontal variant frontotemporal dementia and the frontal lobe syndrome in a population based sample of 85 year olds, 867
Positional manoeuvres, Vestibular reflexes and positional manoeuvres, 289
Post-concussion syndrome, A study of persistent post-concussion symptoms in mild head trauma using positron emission tomography, 326
Posterior cortical atrophy, Coexistent Lewy body disease in a case of “visual variant of Alzheimer’s disease”, 389 The topography of metabolic deficits in posterior cortical atrophy (the visual variant of Alzheimer’s disease) with FDG-PET, 1521
Posterior fossa surgery, Supratentorial papilloma and meningioma in the posterior fossa: a study of 300 cases, 1136
Post-marketing study, A post-marketing study on interferon beta-1a in patients with multiple sclerosis: results from a 2 year, 1521
Posterior fossa syndrome, Endplate dysfunction causing respiratory failure in a patient with prior paralytic poliomyelitis, 370
Postpolio syndrome, Postpolio syndrome, 918
Post-traumatic hyperthermia, Neurogenic fever after traumatic brain injury: an epidemiological study, 614
Posture, Effects of light fingertip touch on postural responses in subjects with diabetic neuropathy, 620
reliability, Comparison of the tendon and plantar strike methods of eliciting the ankle reflex, 1351

Reliability of the variables in a new set of models that predict outcome after stroke, 447

renal cell cancer, Cerebral metastasis after primary renal cell carcinoma, 141

reperfusion, S100B as a surrogate marker for successful clot lysis in hyperacute middle cerebral artery occlusion, 322

repetitive nerve stimulation, Repetitive stimulation of the long thoracic nerve in myasthenia gravis: clinical and electrophysiological correlations, 379

resource allocation, Priority setting: learning to make tough decisions, 1185

respiratory chain, Mitochondria, 1188

respiratory failure, Long term ventilation in neurogenic respiratory failure, ii24

retina, A controlled study comparing visual function in patients treated with vigabatrin and tegabine, 339

retinal vein, Spontaneous retinal venous pulsation: aetiology and significance, 7

reversible dementias, Reversible dementias, 1008

rigidity, Velocity dependent passive muscle stiffness, 283

risk, Incidence, risk, and case fatality of first ever stroke in the elderly population. The Rotterdam Study, 317

risk factors, Head injury as a risk factor for Alzheimer’s disease: the evidence 10 years on; a partial replication, 857

Medical and environmental risk factors for sporadic frontotemporal dementia: a retrospective case-control study, 1574

rihuimab, Treatment of IgM antibody associated polyneuropathies using rituximab, 485

root stimulation, Transtamal cervical root stimulation in the treatment of hyperreflexia, 1329

Rosenthal fibre, The clinicopathological spectrum of Rosenthal fibre encephalopathy and Alexander’s disease: a case report and review of the literature, 807

rostral ponts, Bilateral cerebellar ataxia as the sole manifestation of a unilateral rostral pontine tegmental infarct, 1445

ruptured intracranial aneurysms, Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680

saccades, “Bottom-up” and “top-down” effects on reading saccades: a case study, 1423

saitohin, Saitohin gene is not associated with Alzheimer’s disease, 362

salt wasting, Cerebral salt wasting syndrome in meningococcal meningitis: a case report, 277

SCA 6, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444

schizophrenia, Schizophrenia and episodic ataxia type 2, 688

Similarity and disparity of obsessive-compulsive disorder and schizophrenia in MR volumetric abnormalities of the hippocampus-amygdala complex, 962

screening, Screening for variant Creutzfeldt-Jakob disease, 828

second somatosensory area (SII), Seizures arising from the inferior parietal lobule can show ictal semiology of the second sensory seizure (SII seizure), 367

secondary dystonia, Focal hand dystonia after cervical whiplash injury, 134

secondary prevention, Antithrombotic drugs in secondary stroke prevention among a community dwelling older population, 1100

section bias, Outcome after mild traumatic brain injury: an examination of recruitment bias, 39

seizure, Non-convulsive status epilepticus: usefulness of clinical features in selecting patients for urgent EEG, 189

Psychopathology in people with epilepsy and intellectual disability; an investigation of potential explanatory variables, 1485

sensorimotor cortex, Magnetoencephalographic representation of the sensorimotor hand area in cases of intracerebral tumour, 1649

sensory disturbance, The 12 year prognosis of unilateral functional weakness and sensory disturbance, 591

sensory evoked potential, Identification of target areas for deep brain stimulation in human basal ganglia substructures based on median nerve sensory evoked potential criteria, 1031

sensory neuropathy, Sjögren’s syndrome associated painful sensory neuropathy without sensory ataxia, 1320

sentinel bleed, “Sentinel” or “early warning” bleed, 284

serotonin uptake inhibitors, Parkinsonism associated with a serotonin noradrenaline reuptake inhibitor, milnacipran, 137

sex, Does sex influence age at onset in cranial-cervical and upper limb dystonia?, 265

SF-36, Using the SF-36 measure to compare the health impact of multiple sclerosis and Parkinson’s disease with normal population health profiles, 710

shunt surgery, CSF galanin and cognition after shunt surgery in normal pressure hydrocephalus, 1272

sibling risk, Genetic loading in familial migraine with aura, 1128

Sil seizure, Seizures arising from the inferior parietal lobule can show ictal semiology of the second sensory seizure (Sil seizure), 367

sinus venous thrombosis, Recanalisation of cerebral venous thrombosis, 459

size scaling, Discrete and dynamic scaling of the size of continuous graphic movements of parkinsonian patients and elderly controls, 299

Sjögren’s syndrome, Sjögren’s syndrome associated painful sensory neuropathy without sensory ataxia, 1320

skill, Predictors of successful self control during brain-computer communication, 1117

sleep apnoea syndrome, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642

sleepiness, The relation between daytime sleepiness, fatigue, and reduced motivation in patients with adult onset myotonic dystrophy, 138

slow cortical potentials, Predictors of successful self control during brain-computer communication, 1117

small cell lung cancer, Adult paraneoplastic apsocalidomyouson syndrome associated with antimitochondrial autoantibodies, 1595

small colony variants, Detection of Staphylococcus aureus by 16S rRNA directed in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000

smell, Olfactory dysfunction in degenerative ataxias, 1435

Sneddon syndrome, The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542

social deprivation, Effect of deprivation on time to hospital in acute stroke, 545

Social deprivation and adult head injury: a national study, 1060

somatic marker hypothesis, Decision making in humans: the effect of manipulating the central noradrenergic system, 376

somatic nervous system, Organisation of the sympathetic skin response in spinal cord injury, 1008

somatoform disorders, Mental illness in new neurological patients, 817

somatosensory, Effects of light fingertip touch on palmar responses in subjects with diabetic neuropathy, 620

somatosensory evoked potential, Application of time–frequency analysis to somatosensory evoked potential for intraoperative spinal cord monitoring, 82

Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama’s disease, 627

Two cases of quadriparesis following anterior cervical disectomy, with normal perioperative somatosensory evoked potentials, 273

somnolence, Olfactory deficits and sleep disturbances in Parkinson’s disease: a case–control survey, 956

spastic gene, Motor system abnormalities in hereditary spastic paraparesis type 4 (SPG4) depend on the type of mutation in the spastin gene, 1109

spastic paraparesis, Spastic movement disorder: what is the impact of research on clinical practice?, 820

spasticity, Long term course of the H reflex after selective tibial neurotomy, 913

The relation between Ashworth scale scores and the excitability of the motor neurones in patients with post-stroke muscle spasticity, 646

Velocity dependent passive muscle stiffness, 283

spatial attention, Conflict and integration of spatial attention between disconnected hemispheres, 395

spatial memory, Loss of spatial learning in a patient with topographical disorientation in new environments, 61

spatial vision, Spatial vision in visually asymptomatic subjects at high risk for multiple sclerosis, 1145

SPECT, A randomised placebo controlled study to assess the effects of cholinergic treatment on muscarinic receptors in Alzheimer’s disease, 1567
Alzheimer’s disease: differences in technetium-99m HMPAO SPECT scan findings between early onset and late onset dementia, 715
Is a combination of Tc-SPECT or perfusion weighted magnetic resonance imaging with spinal tap test helpful in the diagnosis of normal pressure hydrocephalus?, 479
Objective measures for the progression of Parkinson’s disease, 287
The harrealist facing the use of SPECT imaging in monitoring disease progression in Parkinson’s disease, 1447
spectacular shrinking deficit, Middle cerebral artery territory infarction sparing the precentral gyrus: report of three cases, 510
speed/size trade-off, Parkinson’s disease patients undershoot target size in handwriting and similar tasks, 1502
spinal bifida, Congenital abnormalities of the central nervous system, i3
spinal, Spinal dural arteriovenous fistulas: clinical features in 80 patients, 1438
spinal amyotrophy, Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama’s disease, 627
spinal cord, Spinal cord MRI in clinically isolated optic neuritis, 1577
spinal cord atrophy, Neuroscience for neurologists, 1013
Spinal cord atrophy and disability in multiple sclerosis over four years: application of a reproducible automated technique in monitoring disease progression in a cohort of the interferon β-1a (Rebiq) treatment trial, 1090
spinal cord injury, Organisation of the sympathetic skin response in spinal cord injury, 1008
Peripheral and segmental spinal abnormalities of median and ulnar somatosensory evoked potentials in Hirayama’s disease, 627
spinal cord lipoma, Intramedullary migration of spinal cord lipoma, 1593
spinal cord monitoring, Two cases of quadriaparesis following anterior cervical discectomy, with normal periphero somatosensory evoked potentials, 273
spinal cord sarcoidosis, Clinical MRI dissociation in myelopathy: a clue to sarcoidosis?, 1122
spinal infection, Aetiological diagnosis of brain abscesses and spinal infections: application of broad range bacterial polymerase chain reaction analysis, 728
spine, Ulcus terebrans: an unusual cause of paraparesis, 1643
spinocerebellar ataxia type 3 (Machado-Joseph disease), 1403
splints, Splinting for carpal tunnel syndrome: prognostic indicators of reaction analysis, 728
spontaneous intracranial hypotension, Subdural haematoma: a potentially serious consequence of spontaneous intracranial hypotension, 752
spontaneous venous pulsation, Spontaneous retinal venous pulsation: aetiology and significance, 7
Staphylococcus aureus, Detection of Staphylococcus aureus by 16S rRNA direct in situ hybridisation in a patient with a brain abscess caused by small colony variants, 1000
statistical parametric mapping, Preoperative motor system brain mapping using positron emission tomography and statistical parametric mapping: hints on cortical reorganisation, 471
status epilepticus, Admission to neurological intensive care: who, when, and why?, i12
stem cells, Stem cells and neurological disease, 553
stenosis, Measuring carotid stenosis, 140
stenting, Idiopathic intracranial hypertension: 12 cases treated by venous sinus stenting, 1662
Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
stereotactic radiosurgery, Clinical experience with gamma knife stereotactic radiosurgery in the management of vestibular schwannomas secondary to type 2 neurofibromatosis, 1288
steroid, Efficacy of methylprednisolone pulse therapy on neuroleptic treatment, 283
steroid treatment, Clinical and electrophysiological improvement of adrenomyleoneuropathy with steroid treatment, 822
stiff man syndrome, Specific phobia is a frequent non-motor feature in stiff man syndrome, 462
straining, Colonic transit time and rectoanal videomanometry in Parkinson’s disease, 268
streptococcal infection, Tourette’s syndrome: a cross sectional study to examine the PANDAS hypothesis, 602
streplococcus, Sydenham’s chorea may be a risk factor for drug induced parkinsonism, 1350
stroke, A comparative study into the one year cumulative incidence of depression after stroke and myocardial infarction, 581
Abnormalities on diffusion weighted magnetic resonance imaging performed several weeks after a minor stroke or transient ischaemic attack, 734
Admission to neurological intensive care: who, when, and why?, i12
American trypanosomiasis (Chagas’ disease): an unrecognised cause of stroke, 516
Antithrombotic drugs in secondary stroke prevention among a community dwelling older population, 1100
Auditory disturbance as a prodrome of anterior inferior cerebellar artery infarction, 1644
Conflict and integration of spatial attention between disconnected hemispheres, 395
Differences in the diagnostic accuracy of acute stroke clinical subtypes defined by multimodal magnetic resonance imaging, 886
Effect of deprivation on time to hospital in acute stroke, 545
Heralding manifestations of basilar artery occlusion with lethal or severe stroke, 649
Human cellular inflammation in the pathology of acute cerebral ischaemia, 1476
Incidence, risk, and case fatality of first ever stroke in the elderly population. The Rotterdam Study, 317
Intra-arterial thrombolyis in 24 consecutive patients with internal carotid artery T occlusions, 739
Isolated total tongue paralysis as a manifestation of bilateral medullary infarction, 1698
Lack of hemispheric dominance for consciousness in acute ischaemic stroke, 889
Long term risks of stroke, myocardial infarction, and vascular death in “low risk” patients with a non-recent transient ischaemic attack, 577
Meningioma presenting as stroke: report of two cases and estimation of incidence, 136
Middle cerebral artery territory infarction sparing the precentral gyrus: report of three cases, 510
Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
Placing nasogastric tubes in stroke patients with dysphagia: efficiency and tolerability of the reflex placement, 1429
Reappraisal of early CT signs to predict the arterial occlusion site in acute embolic stroke, 649
Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
Stroke care: the way forward, 411
Stroke: neuroplasticity and recent approaches to rehabilitation, 1465
The impact of delays in computed tomography of the brain on the accuracy of diagnosis and subsequent management in patients with minor stroke, 77
The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
Transoesophageal echocardiography: which stroke patients benefit most from this investigation?, 283
Visible infarction on CT after stroke—what does it tell?, i13
stroke assessment, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke motor recovery, Stroke motor recovery: active neuromuscular stimulation and repetitive practice schedules, 1562
stroke outcome, Visible infarction on computed tomography is an independent predictor of poor functional outcome after stroke, and not of haemorrhagic transformation, 452
stroke prevention, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
subarachnoid haemorrhage, Admission to neurological intensive care: who, when, and why?, i12
Informed consent in trials for neurological emergencies: the example of subarachnoid haemorrhage, 988
Pituitary deficiency following aneurysmal subarachnoid haemorrhage, 1133
Ruptured intracranial aneurysms: the outcome of surgical treatment in experienced hands in the period prior to the advent of endovascular coiling, 1680
Superficial siderosis of the central nervous system many years after neurosurgical procedures, 1326
subdural haematoma, Outcome of contemporary surgery for chronic subdural haematoma: evidence based review, 937
Pseudosubarachnoid haemorrhage in subdural haematoma, 1131
Subdural haematoma: a potentially serious consequence of spontaneous intracranial hypotension, 752
Surgery for chronic subdural haematoma: is there an evidence base?, 842
substance related disorder, Mental illness in new neurological patients, 817
subthalamic nucleus, Cognitive and behavioural effects of chronic stimulation of the subthalamic nucleus in patients with Parkinson’s disease, 175
Deep brain stimulation of the subthalamic nucleus: effectiveness in advanced Parkinson’s disease patients previously reliant on apomorphine, 170
Deep brain stimulation of the subthalamic nucleus in Parkinson’s disease: evaluation of active electrode contacts, 1036
Mood changes with deep brain stimulation of STN and GPI: results of a pilot study, 1584
MRI directed bilateral stimulation of the subthalamic nucleus in patients with Parkinson’s disease, 1631
subtype specific antibody, Alterations of muscarinic acetylcholine receptors in atypical Pick’s disease without Pick bodies, 965
SUNCT syndrome, SUNCT syndrome secondary to prolactinoma, 1590
superficial siderosis, Superficial siderosis of the central nervous system many years after neurosurgical procedures, 1326
superior canal dehiscence syndrome, Anterior canal failure: ocular torsion without perceptual tilt due to preserved otochina function, 1336
supranuclear palsy, Supranuclear gaze palsy and opaquelosus after Diazinon poisoning, 677
surgery, Surgery for drug resistant partial epilepsy in children with focal cortical dysplasia: anatomical–clinical correlations and neurophysiological data in 10 patients, 1493
surgical treatment, Outcome of contemporary surgery for chronic subdural haematoma: evidence based review, 957
Surgery for chronic subdural haematoma: is there an evidence base?, 842
survey technique, Lay versus expert interviewers for the diagnosis of migraine in a large sample of elderly people, 238
survival, Effect of a multidisciplinary amyotrophic lateral sclerosis (ALS) clinic on ALS survival: a population based study, 1996–2000, 1258
swallowing, Neurology of swallowing and oral feeding disorders: swallowing, 238
tardive syndrome, Adult onset Niemann-Pick disease type C presenting with psychosis, 528
tau gene, Satiolin gene is not associated with Alzheimer’s disease, 362
temporal cortex, Birth and laughter arising from human temporal cortex, 1004
temporal lobe epilepsy, Amygdala volumetry in “imaging-negative” temporal lobe epilepsy, 1245
Contralateral medial temporal lobe damage in right but not left temporal lobe epilepsy: a 1H magnetic resonance spectroscopy study, 1245
Genetics of temporal lobe epilepsy, 1359
Medial temporal lobe atrophy in patients with refractory temporal lobe epilepsy, 1627
Potentially misleading extratemporal lobe lesions in patients with temporal lobe epilepsy, 566
temporal lobectomy, Potentially misleading extratemporal lobe lesions in patients with temporal lobe epilepsy, 566
tetanus toxin, Brain lesions in the course of generalised tetanus, 1432
tethered cord syndrome, Adult tethered cord syndrome presenting with refractory diarrohoea, 175
tetrahidropregesterone, GABAA receptor active steroids are altered in epilepsy patients with tuberous sclerosis, 667
thalamic infarct, Development of selective verbal memory impairment secondary to a left thalamic infarct: a longitudinal case study, 255
thalamic stimulation, Multicentre European study of thalamic stimulation in essential tremor: a six year follow up, 1221
Multicentre European study of thalamic stimulation in essential tremor: a six year follow up, 1387
thalatomy, Ataxic arm movements after thalamotomy for Parkinsonism tremor, 258
thalamus, Multicentre European study of thalamic stimulation in essential tremor, 1362
Thalamic proton magnetic resonance spectroscopy in vegetative state induced by traumatic brain injury, 33
thiamine, Reversible acute axonal polyneuropathy associated with Wernicke-Korsakoff syndrome: impaired physiological nerve conduction due to thiamine deficiency?, 674
thiopental, Favourable outcome of a brain trauma patient despite bilateral loss of cortical somatosensory evoked potential during thiopental sedation, 1157
third occipital nerve, Radiofrequency neurotomy for the treatment of third occipital headache, 88
Thomas Clifford Allbutt, Sir Thomas Clifford Allbutt, 1443
thrombolytic therapy, Intra-arterial thrombolysis in 24 consecutive patients with internal carotid artery T occlusions, 739
thrombosis, Risk of recurrence of cerebral venous and sinus thrombosis during subsequent pregnancy and puerperium, 814
thyroid antibodies, Anti-thyroid antibodies are not associated with a specific thyroma histology, 282
thymin, Autoimmune myasthenia gravis after cardiac surgery, 392
thymid related antibodies, Thryotoxic autoimmune encephalopathy: a repeat positron emission tomography study, 504
tiagabine, A controlled study comparing visual function in patients treated with vigabatrin and tiagabine, 339
Vigabatrin, tiagabine, and visual fields, 286
time clots lysis, Clinical radiologic correlations in acute stroke: is the signal intensity at the end of the tunnel getting brighter quicker?, 840
time–frequency analysis, Application of time–frequency analysis to somatosensory evoked potential for intraoperative spinal cord monitoring, 82
tinnitus, Auditory disturbance as a prodom of anterior inferior cerebellar artery infarction, 1644
titin antibodies, Anti-titin antibodies are not associated with a specific thyroma histology, 282
tone burst, Vestibular activation by bone conducted sound, 771
tonic vibration reflex, The effect of fatigue on abnormal vibration induced illusion of movement in idiopathic focal dystonia, 1154
topographical disorientation, Limbic encephalitis presenting with topographical disorientation and amnesia, 110
loss of spatial learning in a patient with topographical disorientation in new environments, 61
torticollis, Botulinum toxin type B in blepharospasm and hemifacial spasm, 687
The effect of fatigue on abnormal vibration induced illusion of movement in idiopathic focal dystonia, 1154
Tourrette syndrome, Tourrette’s syndrome: a cross sectional study to examine the PANDAS hypothesis, 602
Tourrette’s syndrome, Sydenham’s chorea may be a risk factor for drug induced parkinsonism, 1350
tranexamic acid, Multifocal myoclonus secondary to tranexamic acid, 547
transcranial magnetic stimulation, Focused high frequency repetitive transcranial magnetic stimulation for localisation of the unexposed primary motor cortex during brain tumour surgery, 1283
Improvement of central motor conduction after bone marrow transplantation in adrenoleukodystrophy, 373
Increased visual cortical excitability in ecstasy users: a transcranial magnetic stimulation study, 1136
Reversible callosal disconnection syndrome in internal hydrocephalus, 389
The effect of transcranial magnetic stimulation on movement selection, 985
transient ischaemic attack, Abnormalities on diffusion weighted magnetic resonance imaging performed several weeks after a minor stroke or transient ischaemic attack, 734
Long term risks of stroke, myocardial infarction, and vascular death in “low risk” patients with a non-recent transient ischaemic attack, 577
Should I start all my ischaemic stroke and TIA patients on a statin, an ACE inhibitor, a diuretic and aspirin today?, 1461
transient ischaemic attacks, Transient ischaemic attacks are associated with increased rates of global cerebral atrophy, 213
transoesophageal echocardiography, Transoesophageal echocardiography: which stroke patients benefit most from this investigation?, 283
traumatic brain injury, Brain tissue oxygen guided treatment supplementing ICP/CPP therapy after traumatic brain injury, 760
Cerebrovascular pressure reactivity is related to global cerebral oxygen metabolism after head injury, 765
Outcome after mild traumatic brain injury: an examination of recruitment bias, 39
Thalamic proton magnetic resonance spectroscopy in vegetative state induced by traumatic brain injury, 33
traumatic optic neuropathy, Visual prognosis after indirect traumatic optic neuropathy, 246
treatment, Radial frequency neurotomy for the treatment of third occipital headache, 88
tremor, Chronic deep brain stimulation for the treatment of tremor in multiple sclerosis: review and case reports, 1392
trigeminal neuralgia, Measurement of pulse pressure profiles in patients with trigeminal neuralgia, 533
trinucleotide repeat expansion, Task specific focal dystonia: a presentation of spinocerebellar ataxia type 6, 1444
TSH, Neuroendocrine changes in patients with acute space occupying ischaemic stroke, 725
tuberculosis, GABA<sub>A</sub> receptor active steroids are altered in epilepsy patients with tuberculosis, 667
tumour, Cruralvillier and acoustic neuroma, 1015
tumour haemorrhage, Spontaneous haemorrhage into metastatic brain tumours after stereotatic radiosurgery using a linear accelerator, 908
ubiquitin, Attenuated nuclear shrinkage in neurones with nuclear inclusions of SCAT brains, 597
familial motor neuron disease with dementia: phenotypic variation and cerebellar pathology, 1516
ulcus terebrans, Ulcus terebrans: an unusual cause of paraparesis, 667
tumour, Cruralvillier and acoustic neuroma, 1015
tumour haemorrhage, Spontaneous haemorrhage into metastatic brain tumours after stereotatic radiosurgery using a linear accelerator, 908
Unified Parkinson’s Disease Rating Scale, Physical anaedonia in Parkinson’s disease, 1308
untethering, Adult tethered cord syndrome presenting with refractory diarrhoea, 1396
upper airway, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642
upper limb, Effects of levodopa on upper limb mobility and gait in Parkinson’s disease, 1304
vagus nerve stimulation, BOLD fMRI activation induced by vagus nerve stimulation in seizure patients, 811
variant Creutzfeldt-Jakob disease, Screening for variant Creutzfeldt-Jakob disease, 828
vascular dementia, Coexistence of CADASIL and Alzheimer’s disease, 790
vasculitis, Peripheral neuropathy in hepatitis C virus infection with and without cryoglobulinaemia, 1267
vasospastic amaurosis fugax, Vasospastic amaurosis fugax, 149
vein of Galen aneurysmal malformation, Vein of Galen malformations, 42
velocity dependent properties, Velocity dependent passive muscle stiffness, 283
venous sinus, Idiopathic intracranial hypertension: 12 cases treated by venous sinus stenting, 1662
ventricular drainage, Early diagnosis of external ventricular drainage infection: results of a prospective study, 929
Failure of regular external ventricular drain exchange to reduce CSF infection, 1598
ventricularlymegally, Assessment of the impact of the removal of cerebrospinal fluid on cerebral tissue volumes by advanced volumetric 3D-MRI in posthaemorrhagic hydrocephalus in a premature infant, 658
verbal memory, Development of selective verbal memory impairment secondary to a left thalamic infarct: a longitudinal case study, 255
vertebral artery, Vertebral artery origin angioplasty and primary stenting: safety and restenosis rates in a prospective series, 586
vertebral artery dissection, Economy class stroke syndromes: vertebral artery dissection revisited, 1594
vertebrobasilar insufficiency, Sudden bilateral simultaneous deafness with vertigo as a sole manifestation of vertebrobasilar insufficiency, 539
vertigo, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388
vestibular cortex, Acute rotatory vertigo caused by a small haemorrhage of the vestibular cortex, 388
vestibular function, Vestibulo-ocular areflexia in families with spinocerebellar ataxia type 3 (Machado-Joseph disease), 1403
vestibular reflexes, Vestibular activation by bone conducted sound, 771
Vestibular reflexes and positional manoeuvres, 589
vestibular schwannoma, Clinical experience with gamma knife stereotactic radiosurgery in the management of vestibular schwannomas secondary to type 2 neurofibromatosis, 1288
video recording, Trigeminal autonomic cephalalgia-like syndrome associated with a pontine tumour in a one year old girl, 391
videofluoroscopy, Vocal fold motion impairment in patients with multiple system atrophy: evaluation of its relationship with swallowing function, 982
vigabatrin, A controlled study comparing visual function in patients treated with vigabatrin and tiagabine, 339
Vigabatrin, Tiagabine, and visual fields, 286
violence, New evidence for an association between the CSF HVA:HIAA ratio and psychopathic traits, 918
virology, Neurovirological methods and their applications, 1016
vision, A controlled study comparing visual function in patients treated with vigabatrin and tiagabine, 339
visual attention, “Bottom-up” and “top-down” effects on reading saccades: a case study, 1423
visual cortex, Increased visual cortical excitability in ecstasy users: a transcranial magnetic stimulation study, 1136
visual loss, Visual prognosis after indirect traumatic optic neuropathy, 246
visual prognosis, Visual prognosis after indirect traumatic optic neuropathy, 246
vitamin B-12, Low vitamin B-12 status in confirmed Alzheimer’s disease as revealed by serum holotranscobalamin, 959
vocal cord, Sequential constriction of upper airway and vocal cords in sleep apnoea of multiple system atrophy: low field magnetic resonance fluoroscopic study, 642
vocal fold motion impairment, Vocal fold motion impairment in patients with multiple system atrophy: evaluation of its relationship with swallowing function, 982
volumetric MRI, Assessment of the impact of the removal of cerebrospinal fluid on cerebral tissue volumes by advanced volumetric 3D-MRI in posthaemorrhagic hydrocephalus in a premature infant, 658
Development of selective verbal memory impairment secondary to a left thalamic infarct: a longitudinal case study, 255
volumetry, Amygdala volumetry in “imaging-negative” temporal lobe epilepsy, 1245
Medial temporal lobe atrophy in patients with refractory temporal lobe epilepsy, 1627
Von Recklinghausen, Neurofibromatosis, 384
wallerian degeneration, Wallerian degeneration of the inferior cerebellar peduncle depicted by diffusion weighted imaging, 977
wasp sting, Encephalomyeloradiculopathy associated with wasp sting, 134
website, Internet resources for neurosurgeons and neuropathologists, 154
Wernicke encephalopathy, Reversible acute axonal polyneuropathy associated with Wernicke-Korsakoff syndrome: impaired physiological nerve conduction due to thiamine deficiency?, 674
West Nile virus infection, Acute anterior radiculitis associated with West Nile virus infection, 823
West Riding Lunatic Asylum, The West Riding Lunatic Asylum, 1141
whiplash injuries, Focal hand dystonia after cervical whiplash injury, 134
white matter disease, Brain white matter lesions detected by magnetic resonance imaging are associated with balance and gait speed, 94
white matter lesions, The natural course of Sneddon syndrome: clinical and magnetic resonance imaging findings in a prospective six year observation study, 542
whole cell mode, Nanotechnology for neuronal ion channels, 1466

William Senhouse Kirkes, Cerebral embolism in endocarditis: William Senhouse Kirkes (1823–64), 1570
Wilson’s disease, Faces of the giant panda and her cub: MRI correlates of Wilson’s disease, 657
working memory, Moderate hypoglycaemia abolishes working memory in humans with and without insulin treated diabetes, 278
Working memory deficits in multiple sclerosis: a controlled study with auditory P600 correlates, 1231
world wide web, Internet resources for neurosurgeons and neuropathologists, 154
xenobiotics, Polymorphisms of toxifying and detoxifying hepatic enzymes in amyotrophic lateral sclerosis, 1161
X-linked adrenoleucodystrophy, Clinical and electrophysiological improvement of adrenomyeloneuropathy with steroid treatment, 822
X-linked learning difficulties, Learning difficulties: what the neurologist needs to know, i30
X-linked mental retardation, Brain cysts associated with mutation in the Aristaless related homeobox gene, ARX, 536
