Editorial commentaries

357 There might be more to SPG4!
B P C van de Warrenburg

358 The unsolved puzzle of multiple sclerosis and venous function
C Franceschi

359 Botulinum toxin should be first-line treatment for poststroke spasticity
G Sheean

Review

360 Diagnosis and new treatment in muscle channelopathies
G Meola, M G Hanna, B Fontaine

Research papers

366 Incidence and survival of dementia in a general population of Japanese elderly: the Hisayama study
Y Matsui, T Tanizaki, H Arima, K Yonemoto, Y Doi, T Ninomiya, K Sasaki, M Iida, T Iwaki, S Kanba, Y Kiyohara

371 Social dysfunctioning after mild to moderate first-ever stroke at vocational age
M Hommel, S Trabucco-Miguel, S Jeray, B Naegele, N Gonnet, A Jalliard

376 Management and clinical outcome of posterior fossa arteriovenous malformations: report on a single-centre 15-year experience
L da Costa, L Lopes, A R Willinsky, M Tymianski, M L Schwartz, K G ter Brugge

380 Botulinum neurotoxin versus tizanidine in upper limb spasticity: a placebo-controlled study
D M Simpson, J M Gracies, S A Yablon, R Barbano, A Brashear, the BoNT/TZD Study Team

386 Increasing prevalence and incidence of multiple sclerosis in South East Wales
C Hirst, G Ingram, T Pickersgill, R Swingler, D A S Compston, N P Robertson

392 Chronic cerebrospinal venous insufficiency in multiple sclerosis
P Zamboni, R Galeotti, E Menegatti, A M Malagoni, G Tacconi, S Dall’Ara, I Bartolomei, F Salvi

400 The onset location of multiple sclerosis predicts the location of subsequent relapses
E M Mowry, S Deen, J Mallochov, J Pelletier, P Bacchetti, E Waubant

404 Anti-Hu-associated brainstem encephalitis
A Saiz, J Bruna, P Stourac, M C Vigliani, B Giometto, W Griseld, J Honnorat, D Psimaras, R Voltz, F Graus

412 Onco-neural antibodies and tumour type determine survival and neurological symptoms in paraneoplastic neurological syndromes with Hu or CV2/CRMP5 antibodies
J Honnorat, S Cantalat-Carel, D Ricard, P CM Carpentier, V Rogemond, F Chapuis, M Agera, E Decullier, A M Duchemin, F Graus, J C Antoine

417 Intraoperative preservation of corticospinal function in the brainstem
G Neulek, J Bogucki, J Schramm

Short reports

423 Risk of incident Parkinson’s disease and parkinsonism in essential tremor: a population based study
J Bente-Leon, E D Louis, F Bermejo-Pareja, on behalf of the Neurological Disorders in Central Spain (NEDICES) Study Group

426 Filamin A mutation, a common cause for periventricular heterotopia, aneurysms and cardiac defects
M C Y de Wit, J M Kros, D J J Halley, I F M de Coo, R Verdijk, B C Jacobs, G M S Mancini

429 Disrupted intrinsic functional connectivity in the vegetative state
F Cauda, B M Micon, K Sacco, S Duca, F D’Agata, G Geminianni, S Canavero

435 Moveable spine.

MORE CONTENTS
432 Pattern and progression of white-matter changes in a case of posterior cortical atrophy using diffusion tensor imaging
T Duning, T Warnecke, S Mohammadi, H Lohmann, H Schießbauer, H Kugel, S Knecht, E B Ringelstein, M Deppe

437 Risk indicators for development of headache during dipyridamole treatment after cerebral ischaemia of arterial origin
P H A Halkes, J van Gijn, L J Kappelle, P J Koudstaal, A Algra, on behalf of the ESPRIT Study Group

440 Posterior fossa abnormalities in hereditary spastic paraparesis with spastin mutations
C Scuderi, M Fichera, G Calabrese, M Elia, C Amato, M Savio, E Borgione, G A Vitello, S A Musumeci

444 Temporal cortex direct current stimulation enhances performance on a visual recognition memory task in Alzheimer disease
P S Boggio, L P Khoury, D C S Martins, O E M S Martins, E C de Macedo, F Fregni
