Online only supplemental figure S1. Flow chart of patient selection

404 patients in the INTERACT1 cohort

2829 patients in the INTERACT2 cohort

3233 in the INTERACT1 and INTERACT2 pooled cohort

525 excluded
- 46 had unavailable mRS at 90 days
- 274 had unavailable baseline CT
- 204 had non-hemispheric haematoma
- 5 had no information of haematoma laterality

2708 included in the analysis

mRS indicates modified Rankin Scale
Online only supplemental figure S2. Distribution of NIHSS scores between hemispheric subgroups

NIHSS indicates National Institutes of Health Stroke Scale
Online only supplemental figure S3. Kaplan-Meier curves for death with NIHSS in 2 categories.

Cochran–Mantel–Haenszel log-rank P < 0.0001

Survival probability (%)

Time from randomisation (days)

NIHSS indicates National Institutes of Health Stroke Scale
