# CELLOLITE SURGICAL SPONGES

CELLOLITE is a white, synthetic, X-Ray detectable sponge designed to overcome all the drawbacks of conventional absorbent materials.

The main characteristics of CELLOLITE — its extreme softness and high degree of conformability, its rapid wicking rate and high absorbency capacity, its overall X-Ray opacity and fibre-free nature, all serve to ensure that CELLOLITE is the only really safe and efficient sponge for Neurosurgery.

In short, no other material can match the properties of CELLOLITE  $^{\odot}$ 

Why struggle on using the same old fibrous pattie when you can take a giant step forward with CELLOLITE (1)? In these days of Space Age surgical techniques why 'make do' with conventional patties?

Use CELLOLITE Surgical Sponges, the product born out of Space Age technology, and benefit from the superior properties of a sponge with the needs of the Twenty-first Century in mind.

Benefit from the softness and non-abrasive character, the overall X-Ray opacity possible due to 'state of the art' encapsulation of Barium Sulphate particles chemically bonded to the sponge, and, so important in delicate surgery, the fibre-free nature of CELLOLITE<sup>®</sup> which guarantees that no fibres can be shed into the wound, virtually eliminating the risk of granulomas etc. which are a hazard when using conventional patties.

What other product can offer so much?

Use CELLOLITE the ideal Neurosurgical Sponge.

## HOW TO DO IT

Every doctor knows the sinking sensation induced by waiting one's turn for an examination viva and the social anxieties of changing jobs. The misery of first night nerves does not, however, disappear with time: each decade brings new challenges. On these occasions—chairing a committee, giving evidence in court, appearing on television—practical tips can be enormously helpful. The same is true of the many skills not taught in medical school—how to lecture, referee papers, edit, or use a library. All these and many more nuggets of down-to-earth advice have been collected from past issues of the *BMJ* to form a compendium for the novice—whatever his or her age or seniority.

Price: Inland £4.00; Abroad US\$10.00 (Concessionary price to BMA members: Inland £3.50; Abroad US\$8.75.

When ordering BMA members must quote their membership number or the full price will be applicable.)

Payment must be enclosed with order or a surcharge of 50p will be made for rendering invoices and statements.
