EDITOR *British Medical Journal*  
Technical Editor: KENNETH TILL

THE EDITORIAL COMMITTEE welcomes original papers, which should be addressed to the Editor, Journal of Neurology, Neurosurgery, and Psychiatry, BMA House, Tavistock Square, London WC1H 9JR. Papers are accepted on the understanding that the subject matter has not been and will not be published in any other journal. Papers should deal with original matter and the discussion should be closely relevant to this. Manuscripts should be typewritten in double spacing on one side of the paper only. Two copies (including figures and tables) should be submitted of which only one need be a top copy. A summary of about 50 words should appear at the beginning of each paper. The name(s) of the hospital or laboratory should also appear. Full postal address for correspondence and reprints should be supplied. Receipt of manuscripts will be acknowledged.

The Editor will welcome Short Reports or Preliminary Communications limited to about 1000 words and with no more than one figure and one table. Also welcome are Letters to the Editor.

**ETHICS** Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *British Medical Journal* 1964;2:177)).

**ABBREVIATIONS** Measurements should be expressed in SI units (see *Journal of Clinical Pathology* 1974;27:590-7; *British Medical Journal* 1974;4:490; *International System of Units* 1972. National Bureau of Standards, Special Publication 330. United States Bureau of Printing: Washington). For recognised abbreviations see *Journal of Neurology, Neurosurgery, and Psychiatry* 1975;38:1-5; and *Units, Symbols and Abbreviations*, Third Edition 1977, edited by DN Baron, Royal Society of Medicine: London.

**ILLUSTRATIONS** *Photographs* Unmounted photographs on glossy paper should be provided together with magnification scales when appropriate. *Diagrams* will be reduced to 2½ inches (68 mm) wide, occasionally to 5½ inches (145 mm). Lettering should be in either Letraset or stencil and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text. They should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet. The format used in this issue of the Journal should be noted. Vertical lines will not be printed and usually there are only three horizontal lines in each table.

REFERENCES should be in the Vancouver style as in this issue. They should appear in the text by number only in the order in which they occur and should be listed on a separate sheet in the same order. Punctuation must be correct and journal titles should be in full or abbreviated in accordance with the *Index Medicus*. Thus:

Millikan CH, Eaton LH. Clinical evaluation of ACTH and cortisone in myasthenia gravis. *Neurology (Minneapolis)* 1951;1:145-52.

Penn AS. Immunological features of myasthenia gravis. In: Aguayo AJ and Karpati G, eds. *Topics in Nerve and Muscle Research*. Amsterdam: *Excerpta Medica* 1975:123-32.

Coers C, Woolf AL. *The innervation of muscle. A biopsy study*. Oxford: Blackwell, 1951:16-24.

A reference to unpublished work should not appear in the list but work "in press" may be included provided the name of the journal appears. The author is responsible for the accuracy of references.

**REPRINTS** Twenty-five reprints will be supplied free of charge. Additional reprints are available at cost if they are ordered when the proof is returned.

**CORRECTIONS** other than printer's errors may be charged to the author.

**COPYRIGHT** © 1982 by JOURNAL OF NEUROLOGY, NEUROSURGERY, AND PSYCHIATRY. All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means—electronic, mechanical photocopying, recording, or otherwise—without the prior permission of the Journal of Neurology, Neurosurgery, and Psychiatry.

**NOTICE TO ADVERTISERS** Applications for advertisement space and rates should be addressed to the Advertisement Manager, JOURNAL OF NEUROLOGY, NEUROSURGERY, AND PSYCHIATRY, BMA House, Tavistock Square, London WC1H 9JR.

**NOTICE TO SUBSCRIBERS** The Journal is published monthly. The annual subscription rate is £40.00 in the United Kingdom and Republic of Ireland, and US \$99 in all countries overseas. Payments for overseas subscriptions should be made in US dollars, or in other currency based on the prevailing exchange rate to the US dollar of that currency payable to the British Medical Association and addressed to the Subscription Manager, Journal of Neurology, Neurosurgery, and Psychiatry, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: British Medical Journal, 1172 Commonwealth Avenue, Boston, Mass. 02134. All enquiries, however, must be addressed to the Publisher in London.)

## Book reviews

**Cranio-cerebral Computer Tomography. Volume 1 of Pathological Computer Tomography.** Edited by A Wackenheim, L Jeanmart and AL Baert. (Pp 130; DM 198, US \$116.50.) Heidelberg: Springer Verlag, 1980.

This book is to form a trilogy with two others dealing with pathology of the trunk, the objective being to present cases suitable for didactic teaching in which computed tomograms and corresponding anatomical sections have been obtained. The main part of the book is, therefore, an atlas of computed tomograms, supplemented by a very brief text and few references. The computed tomograms are from second generation machines but are of reasonably good quality and they are generally accompanied by well displayed morbid anatomical sections. Many good teaching cases in which a fairly detailed comparison is possible, are included, and trainees in neurosciences should find these of value, but unfortunately the authors have included several cases, mainly among the acute conditions in which correlation is poor, usually because of too long an interval between CT and necropsy. The authors have not attempted to cover all the common CT manifestations of cerebral pathology and the approach is essentially anecdotal. The book is generally well produced, though occasionally incorrect reference is made in the text to the illustrations.

Although the concept of this book was excellent, it is obvious that an even greater amount of material was necessary to allow the type of selection essential for its unqualified success; one hopes that this will be achieved in future editions.

BRIAN KENDALL

**Reaction Time and Attention after Closed Head Injury.** By AH van Zomeren. (Pp 161; Dfl 30.00.) Lisse: Swets and Zeitlinger BV, 1981.

This short book is, in fact, the author's doctoral thesis presented to the University of Groningen. All too often, material presented for a thesis does not transfer easily to a conventional book, but happily that is not the case with Dr Van

Zomeren's study which is clear and concise. The book incorporates a brief but very useful historical review, and then describes the results of two main blocks of experiments. The first is concerned with the effects of task complexity and severity of injury; the second is a detailed longitudinal study of a group of patients tested serially over a 24-month period. The book is well written and informative, and while never shrinking from complex theoretical issues, it is clearly and interestingly written throughout. For anyone concerned with understanding the after-effects of closed head injury, or wanting to understand the nature of attention deficits after acute brain damage, this book will be extremely valuable.

NEIL BROOKS

**Clinical Neuro-ophthalmology 2nd Ed.** By Bryan Ashworth and Ian Isherwood. (Pp 292; £32.50.) Oxford: Blackwell Scientific Publications, 1981.

The second edition of this handsomely produced book is an improvement on the first. The standard of the illustrations is particularly high but the revision of the text has been less satisfactory, and it is still uneven in its approach. Some chapters, for example on the clinical examination, appear to be written for first year students; others are suitable for ophthalmologists taking the final fellowship. Random selection of a few topics in medical ophthalmology produced more errors and inconsistencies than there should be. For example there is confusion over the word "blackout" used to denote loss of consciousness and loss of vision. There is a highly inaccurate diagram of visual pathways which confuses the disc and macula. Wilson's disease appears under visual failure and there is no mention of the nasal visual field defects typical of carotid aneurysm.

The book may be useful to ophthalmologists preparing for examinations, and the bibliography is excellent, but as a source of reference and an authoritative account of neuro-ophthalmology, even of such common conditions as ischaemic optic neuritis, it compares unfavourably with its American counterpart.

ROSS RUSSELL

## Notices

The editor thanks the following for assisting in the assessment of papers submitted during 1981:

CBT Adams, Ingrid Allen, Bryan Ashworth, HS Bachelard, JP Ballantyne, Roger Bannister, M Baraitser, MR Bond, D Bowen, G Chadwick, DAS Compston, LT Cotton, WI Cranston, G Curzon, JM Dawson, EPG DuBoulay, V Dubowitz, LW Duchon, R Edwards, C Ellis, P Fenwick, MA Gresty, M Halliday, MJG Harrison, AP Hopkins, JT Hughes, RAC Hughes, J Hume Adams, RD Illingworth, S Illis, I Janota, PG Jenner, WB Jennett, DE Jewitt, BE Kendell, DPE Kingsley, R Kocen, P Lantos, NF Lawton, P Le Quesne, R Levy, M Longson, JJ Maccabe, CD Marsden, J Marshall, C Mawdsley, JC Meadows, BS Meldrum, E Miller, R Mindham, J Morgan Hughes, RS Maurice-Williams, DL McLellan, WI McDonald, PW Nathan, J Newsom Davis, C Pallis, G Pampiglione, J Payan, JD Parkes, JMS Pearce, CE Polkey, P Prior, N Quinn, G Ratcliff, D Regan, J Reid, E Reynolds, A Richens, AH Roberts, K Robinson, M Ron, J Rothwell, P Rudge, D Rushton, G Rushworth, M Sanders, GD Schott, P Schurr, EM Sedwick, T Shallice, John A Simpson, JMK Spalding, JA Stephens, M Swash, Lindsay Symon, G Teasdale, PK Thomas, ED Thompson, K Till, M Trimble, E Warrington, ES Watkins, JM White, R Willison, J Wilson, M Wyke, KJ Zilkha.

### World Federation of Neurology

The following officers have been appointed to serve for four years until the next World Congress of Neurology is held in Cologne in the Federal Republic of Germany in September 1985:

President:

Dr Richard Masland, USA

First Vice-President:

Prof Sir John Walton, UK

Other Vice-Presidents:

Prof Mahmoud Mustafa, Egypt

Dr A Cšanda, Hungary

Prof C Loeb, Italy

Prof A Spino França, Brazil

Prof S Katsuki, Japan

Secretary-Treasurer-General:

Dr P Dreyfus, USA

Joint Secretary-Treasurer-General:

Prof P Juul-Jensen, Denmark

Editor-in-Chief of the Journal of the Neurological Sciences:

Prof WB Matthews, UK

# Reduced Subscription Rates for Junior Hospital Doctors Residents and Interns...

## Journal of Neurology, Neurosurgery & Psychiatry

is available to junior hospital doctors in all parts of the world for a maximum of four consecutive years at **REDUCED Annual Subscription Rates.** (Thereafter, or when reaching consultant status this special offer will no longer apply.) The following reduced rates apply for the twelve issues published in 1982.

**Inland £24.00**  
**Overseas US \$60.00**

(The full rates are: Inland £40.00; Overseas US\$99.00)

*The opportunity to subscribe to this journal of international authority and repute at a substantially reduced subscription rate is one not to be missed by junior doctors seeking to specialise in neurology, neurosurgery or psychiatry.*

*Please complete the adjacent order form and send for your subscription NOW.*

*Further order forms can be supplied on request.*
