EDITOR *British Medical Journal*
Technical Editor: KENNETH TILL

THE EDITORIAL COMMITTEE welcomes original papers, which should be addressed to Prof. RAC Hughes, Editor, Journal of Neurology, Neurosurgery, and Psychiatry, Medical School Building, UMDS United Medical and Dental Schools of Guy's and St Thomas's Hospitals, St Thomas Street, London SE1 9RT, UK. Papers are accepted on the understanding that the subject matter has not been and will not be published in any other journal. Papers should deal with original matter and the discussion should be closely relevant to this. Manuscripts should be typewritten in double spacing on one side of the paper only. A summary should appear at the beginning of each paper. The name(s) of the hospital or laboratory should also appear. Full postal address for correspondence and reprints should be supplied. Receipt of manuscripts will be acknowledged. Two copies (including figures and tables) should be submitted, of which only one need be a top copy. If the paper is rejected these will not be returned. After being kept for three months to answer any queries they will be shredded. Any original illustrations will, however, be returned when requested by authors.

The Editor will welcome Short Reports and Letters. Topics suitable for presentation for Short Reports include single case reports containing information from special investigations (for example, neurophysiological, radiological or pathological) that illustrate new phenomena, or reports of short, well focused research studies. Short reports should be restricted to about 1,500 words with a minimum of references and no more than one figure and one table. Suitable topics for a letter to the Editor include a report of one or more cases illustrating novel clinical phenomena, useful clinical tips, or additional reports of extremely rare associations. Also suitable are brief preliminary reports of research findings. Letters should be no longer than 1,000 words, with a maximum of five references and no more than one illustration or table.

Literature citation in short reports and letters: Due acknowledgement of appropriate prior reports should be given. On the other hand, a comprehensive, general review of a topic is not appropriate as part of a short report or letter and references should be selected for relevance to the specific topic of the report.

ETHICS Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *British Medical Journal* 1964;2:177)).

ABBREVIATIONS Measurements should be expressed in SI units (see *Journal of Clinical Pathology* 1974;27:590-7; *British Medical Journal* 1974;4:490; *International System of Units* 1972. National Bureau of Standards, Special Publication 330. United States Bureau of Printing: Washington). For recognised abbreviations see *Journal of Neurology, Neurosurgery, and Psychiatry* 1975;38:5; and *Units, Symbols and Abbreviations*. Third Edition 1977, edited by DN Baron, Royal Society of Medicine: London.

ILLUSTRATIONS *Photographs* Unmounted photographs on glossy paper should be provided together with magnification scales when appropriate (bar scales are preferred). When appropriate, points of interest should be indicated. If these are poorly defined, as in some scans, this also should be indicated, so that an attempt can be made to improve the quality of reproduction. *Diagrams* will be reduced to 2 1/4 inches (68 mm) wide, occasionally to 5 1/4 inches (145 mm). Lettering should be in either Letraset or stencil and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text. They should be marked on the back with figure numbers, title of paper, and name of first author. All photographs, graphs and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for

illustrations should be typed on a separate sheet. Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet. The format used in this issue of the Journal should be noted. Vertical lines will not be printed and usually there are only three horizontal lines in each table.

REFERENCES should be in the Vancouver style as in this issue. They should appear in the text by number only in the order in which they occur and should be listed on a separate sheet in the same order. Punctuation must be correct and journal titles should be in full or abbreviated in accordance with the *Index Medicus*. Thus:

Millikan CH, Eaton LH. Clinical evaluation of ACTH and cortisone in myasthenia gravis. *Neurology* 1951;1:145-52.

Penn AS. Immunological features of myasthenia gravis. In: Aguayo AJ, Karpati G, eds. *Topics in Nerve and Muscle Research*. Amsterdam: *Excerpta Medica* 1975:123-32.

Coers C, Woolf AL. *The innervation of muscle. A biopsy study*. Oxford: Blackwell, 1951:16-24.

A reference to unpublished work should not appear in the list but work "in press" may be included provided the name of the journal appears. The author is responsible for the accuracy of references.

REPRINTS Twenty-five reprints will be supplied free of charge. Additional reprints are available at cost if they are ordered when the proof is returned.

CORRECTIONS other than printer's errors may be charged to the author.
