Announcement from the British Neuropathology Association
The 1995 Summer meeting—to include joint sessions with the British Association for Imaging in Neuropathology—will be held on 15–17 July in Cambridge.

On 16 July BNPA will hold a scientific meeting with the theme of "movement disorders" and its AGM. On 17 July BNPA/BAP will have a joint session on neuroimaging, psychiatry, and psychopharmacology. Short scientific papers and single case videos by members of both associations will also be presented. For further details please contact Ms Sue Garratt, 17 Clocktower Mews, London N1 7BB, UK.

For details of membership of the BNPA, which is open to medical practitioners in psychiatry, neurology, and related clinical neurosciences, please contact Sue Garratt, 17 Clocktower Mews, London N1 7BB, UK.

Another book in a line of AANS publications, intended to "provide neurosurgeons, especially those not located in an academic institution, with periodic publications related to neurosurgery". The original titles covered everyday subjects but these books are becoming increasingly esoteric. One wonders if complex dural AVMs should be managed by a neurosurgeon not located in an academic institution and with no particular interest in difficult vascular cases.

Not surprisingly, the authors are from the other side of the Atlantic, except for two French neuroradiologists. This is a very thorough subject review by physicians with much experience in managing this uncommon condition. There are numerous radiographic investigations, clearly labelled. Being multi-authored, the style does vary but the book is clearly laid out and easy to read.

Although the subject matter is perhaps a little abstruse for the trainee, no good neuroscience library should be without a copy.
