Editorial commentaries

357 There might be more to SPG4!
B P C van de Warrenburg

358 The unsolved puzzle of multiple sclerosis and venous function
C Franceschi

359 Botulimum toxin should be first-line treatment for poststroke spasticity
G Sheean

Review

360 Diagnosis and new treatment in muscle channelopathies
G Meola, M G Hanna, B Fontaine

Research papers

366 Incidence and survival of dementia in a general population of Japanese elderly: the Hisayama study
Y Matsui, Y Tanizaki, H Arima, K Yonemoto, Y Doi, T Ninomiya, K Sasaki, M Iida, T Iwaki, S Kanba, Y Kiyohara

371 Social dysfunctioning after mild to moderate first-ever stroke at vocational age
M Hommel, S Trabucco-Miguel, S Jeray, B Naegle, N Gonnet, A Jalllard

376 Management and clinical outcome of posterior fossa arteriovenous malformations: report on a single-centre 15-year experience
L da Costa, L Thines, A R Willinsky, M Tymianski, M L Schwartz, K G ter Brugge

380 Botulimum neurotoxin versus tizanidine in upper limb spasticity: a placebo-controlled study
D M Simpson, J M Gracies, S A Yablon, R Barbano, A Brashear, the BoNT/TZD Study Team

386 Increasing prevalence and incidence of multiple sclerosis in South East Wales
C Hirst, G Ingram, T Pickersgill, R Swingler, R Barbano, A Brashear, the BoNT/TZD Study Team

392 Chronic cerebrospinal venous insufficiency in patients with multiple sclerosis
P Zamboni, R Galeotti, E Menegatti, A M Malagoni, G Tacconi, S Dall’Ara, I Bartolomei, F Salvi

400 The onset location of multiple sclerosis predicts the location of subsequent relapses
E M Mowry, S Deen, J Malhotra, J Pelletier, P Bacchetti, E Waubant

404 Anti-Hu-associated brainstem encephalitis
A Saiz, J Bruna, P Stourac, M C Vigliani, B Giometto, W Griseld, J Honorat, D Pismaras, R Voltz, F Graus

408 A new dominantly inherited pure cerebellar ataxia, SCA 30
E Storey, M Bahlo, M Fahey, O Sisson, C J Lueck, R J M Gardiner

412 Onco-neural antibodies and tumour type determine survival and neurological symptoms in paraneoplastic neurological syndromes with Hu or CV2/CRMP5 antibodies
J Honorat, S Cantalat-Carel, D Ricard, J Ph Camdessanche, A F Carpentier, V Rogemond, F Chapuis, M Aguerre, E Decullier, A M Duchemin, F Graus, J C Antoine

417 Intraoperative preservation of corticospinal function in the brainstem
G Neulek, J Bogucki, J Schramm

Short reports

423 Risk of incident Parkinson’s disease and parkinsonism in essential tremor: a population based study
J Bento-Leon, E D Louis, F Bermejo-Pareja, on behalf of the Neurological Disorders in Central Spain (NEDICES) Study Group

426 Filamin A mutation, a common cause for periventricular heterotopia, aneurysms and cardiac defects
M C Y de Wit, J M Kros, D J J Halley, I F M de Coo, R Verdijk, B C Jacobs, G M S Mancini

429 Disrupted intrinsic functional connectivity in the vegetative state
F Cauda, B M Micon, K Sacco, S Duca, F’D’Agata, G Geminiani, S Canavero

More contents ➤
432  Pattern and progression of white-matter changes in a case of posterior cortical atrophy using diffusion tensor imaging
   T Duning, T Warnecke, S Mohammadi, H Lohmann, H Schiffbauer, H Kugel, S Knecht, E B Ringelstein, M Deppe

437  Risk indicators for development of headache during dipyridamole treatment after cerebral ischaemia of arterial origin
   P H A Halkes, J van Gijn, L J Kappelle, P J Koudstaal, A Algra, on behalf of the ESPRIT Study Group

440  Posterior fossa abnormalities in hereditary spastic paraparesis with spastin mutations
   C Scuderi, M Fichera, G Calabrese, M Elia, C Amato, M Savio, E Bergione, G A Vitello, S A Musumeci

444  Temporal cortex direct current stimulation enhances performance on a visual recognition memory task in Alzheimer disease
   P S Boggi, L P Khoury, D C S Martins, O E M S Martins, E C de Macedo, F Fregni
