Contents

Editorial commentaries
945 Degenerator tau/TDP-43: rise of the machines
   P J Nestor

946 Could immunological mechanisms trigger neurodegeneration in frontotemporal dementia?
   J R Burrell, J R Hodges

947 Increased premorbid physical activity and amyotrophic lateral sclerosis: born to run rather than run to death, or a seductive myth?
   M R Turner

948 Fasciculation potentials: a diagnostic biomarker of early ALS?
   A Eisen, S Viaic

Neurodegeneration
949 White matter imaging helps dissociate tau from TDP-43 in frontotemporal lobar degeneration

956 TDP-43 frontotemporal lobar degeneration and autoimmune disease

963 Fasciculation potentials and earliest changes in motor unit physiology in ALS
   M de Carvalho, M Swash

969 Split hand syndrome in amyotrophic lateral sclerosis: different excitability changes in the thenar and hypothenar motor axons
   K Shibuya, S Mitaw, S Nasu, Y Sekiguchi, S Mitsuma, M Beppu, S Ohmori, Y Iwai, S Ito, K Kanai, Y Sato, S Kuwabara

Neurological picture
973 Unilateral midbrain infarct presenting as dorsal midbrain syndrome
   M H Rafaii

976 Lifetime physical activity and the risk of amyotrophic lateral sclerosis
   M H B Huisman, M Seelen, S W de Jong, K R I S Dorresteijn, P C van Doormaal, A J van der Koot, M de Visser, H J Schelhaas, L H van den Berg, J H Veldink

982 Rapidly progressive scoliosis and respiratory deterioration in Ullrich congenital muscular dystrophy
   T Yonekawa, H Komaki, M Okada, Y K Hayashi, I Noda, K Sugai, M Sasaki, I Nishino

989 Overlooked non-motor symptoms in myasthenia gravis
   S Suzuki, K Utsugiawa, N Suzuki

Cerebrovascular disease
995 Decompressive craniectomy in cerebral venous thrombosis: a single centre experience

Movement disorders
1001 Clinical relevance and practical implications of trials of perfusion and angiographic imaging in patients with acute ischaemic stroke: a multicentre cohort imaging study
   J M Wardlaw, K W Munt, A J Macdonald, C W, F McVerry, T Carpenter, K Shuler, R Thomas, P Acharpong, K Daf, A Murray

1008 Lies tell the truth about cognitive dysfunction in essential tremor: an experimental deception study with the guilty knowledge task
   F Mameli, E Tomasini, E Sceolo, M Funagalli, R Ferrucci, L Bertolasi, A Priori

MORE CONTENTS ➤
Contents

Volume 84 Issue 9 | JNPP September 2013

1014 Long-term efficacy and safety of incobotulinumtoxinA injections in patients with cervical dystonia
D Dressler, S Paus, A Seitzinger, B Gebhardt, A Kupsch

1020 Long-term subthalamic nucleus stimulation improves sensorimotor integration and proprioception
A W Shukla, E Moro, C Gunraj, A Lozano, M Hodaie, A Lang, R Chen

1029 Deep brain stimulation for dystonia
M Vidailhet, M-F Jutras, D Grabli, E Roze

1043 Transcranial magnetic stimulation as an efficient treatment for psychogenic movement disorders
B Garcin, E Roze, F Mesrati, E Cognat, E Fournier, M Vidailhet, B Degas

Multiple sclerosis
1047 Tumefactive demyelination: an approach to diagnosis and management
T A Hardy, J Chataway

Cognitive neurology
1054 Cognitive domain deficits in patients with aneurysmal subarachnoid haemorrhage at 1 year

Neurogenetics
1059 Association between the rs1333040 polymorphism on the chromosomal 9p21 locus and sporadic brain arteriovenous malformations
C L Sturiale, I Gatto, A Puca, S D'Arrigo, I Giarretta, A Albanese, C Di Rocco, G Maira, R Pola
