Contents

Editorial commentaries
945 Degenerateur tau/TDP-43: rise of the machines
P J Nestor

946 Could immunological mechanisms trigger neurodegeneration in frontotemporal dementia?
J R Barrell, J R Hodges

947 Increased premorbid physical activity and amyotrophic lateral sclerosis: born to run rather than run to death, or a seductive myth?
M R Turner

948 Fasciculation potentials: a diagnostic biomarker of early ALS?
A Eisen, S Vucic

Neurodegeneration
949 White matter imaging helps dissociate tau from TDP-43 in frontotemporal lobar degeneration

956 TDP-43 frontotemporal lobar degeneration and autoimmune disease

963 Fasciculations potentials and earliest changes in motor unit physiology in ALS
M de Carvalho, M Swash

969 Split hand syndrome in amyotrophic lateral sclerosis: different excitability changes in the thenar and hypothenar motor axons
K Shibuya, S Misawa, S Nasu, Y Sekiguchi, S Mitamura, M Beppu, S Ohmori, Y Iwai, S Ito, K Kanay, Y Sato, K Kusuwara

Neurological picture
976 Lifetime physical activity and the risk of amyotrophic lateral sclerosis

982 Rapidly progressive scoliosis and respiratory deterioration in Ullrich congenital muscular dystrophy
T Yonekawa, H Komaki, M Okada, Y K Hayashi, I Nonaka, K Sugai, M Sasaki, I Nishino

989 Overlooked non-motor symptoms in myasthenia gravis
S Suzuki, K Utsugiawa, N Suzuki

Cerebrovascular disease
995 Decompressive craniectomy in cerebral venous thrombosis: a single centre experience

Movement disorders
1001 Clinical relevance and practical implications of trials of perfusion and angiographic imaging in patients with acute ischaemic stroke: a multicentre cohort imaging study
J M Wardlaw, K W Muir, A J MacLeod, C Wiz, F McVerry, T Carpenter, K Shuler, R Thomas, P Achampong, K Dani, A Murray

1008 Lies tell the truth about cognitive dysfunction in essential tremor: an experimental deception study with the guilty knowledge task
F Mameli, E Tomasini, E Scelez, M Funagalli, R Ferrucci, L Bertolasi, A Priori

Neuromuscular
976 Lifetime physical activity and the risk of amyotrophic lateral sclerosis
Long-term efficacy and safety of incobotulinumtoxinA injections in patients with cervical dystonia
D Dressler, S Paus, A Seitzinger, B Gebhardt, A Kupsch

Long-term subthalamic nucleus stimulation improves sensorimotor integration and proprioception
A W Shukla, E Moro, C Gunraj, A Lozano, M Hodaie, A Lang, R Chen

Deep brain stimulation for dystonia
M Vidailhet, M-F Jutras, D Grabli, E Roze

Transcranial magnetic stimulation as an efficient treatment for psychogenic movement disorders
B Garcin, E Roze, F Mesrati, E Cognat, E Fournier, M Vidailhet, B Degos

Tumefactive demyelination: an approach to diagnosis and management
T A Hardy, J Chataway

Cognitive domain deficits in patients with aneurysmal subarachnoid haemorrhage at 1 year

Association between the rs1333040 polymorphism on the chromosomal 9p21 locus and sporadic brain arteriovenous malformations
C L Sturiale, I Gatto, A Puca, S D’Arrigo, I Giarretta, A Albanese, C Di Rocco, G Maira, R Pola

Cognitive neurology

Neurogenetics

Multiple sclerosis
