

Table 4: (online) Details of Treatment

	Surgical	Endovascular
Adjunct treatment/technique used		
Stent-assisted coiling		12
Second generation modified coils		6
Multiple aneurysm clips	37	
Anterior clinoidectomy/Suction deflation	3	
EC-IC bypass	1	
Endovascular Procedural Complications		
Thromboembolic		6
Intra-procedural aneurysm rupture		1
Stretched coil		1
Coil prolapse		1
Use of thrombolytic		6
Medical complications (pulmonary edema)		1
Surgical Procedural Complications		
Intra-procedural aneurysm rupture	1	
Slipped aneurysm clip requiring re-operation for repositioning	2	
Intra-aneurysmal thrombus migration	1	
Delayed re-operation for repair CSF leak	1	

Table 5 (online): Details of imaging outcomes

	Surgical n=48	Endovascular N=56
No residual aneurysm	45	50
Residual aneurysm	3	6
Complete occlusion	35	29
Residual neck	5	11
Imaging artefact	3	4
Not available	0	2
Initial failures (Death)	1 1	3 1
Imaging fate of initial failures to treat the aneurysm		
No further attempts at treatment (patent aneurysm)	1	2
Clipping of residual with complete occlusion	0	1
