

# AAN PML diagnostic criteria

**Online supplementary figure:** Flowchart showing the progression of patients through the diagnostic categories of the PML diagnostic criteria during follow-up of the PML disease course.

Legend: <sup>A</sup> Developed PML symptoms; <sup>B</sup> Repeated CSF collection with positive JCV PCR ; <sup>C</sup> New CSF samples obtained twice in two patients, which were again negative; <sup>D</sup> No new CSF samples obtained, as MRI findings were considered conclusive for PML by the treating neurologist and an experienced neuroradiologist.
