

Correction: CSF cytokine profile in MOG-IgG+ neurological disease is similar to AQP4-IgG+ NMOSD but distinct from MS: a cross-sectional study and potential therapeutic implications

Kaneko K, Sato DK, Nakashima I, *et al.* CSF cytokine profile in MOG-IgG+ neurological disease is similar to AQP4-IgG+ NMOSD but distinct from MS: a cross-sectional study and potential therapeutic implications. *J Neurol Neurosurg Psychiatry* 2018;89:927–36. doi: 10.1136/jnnp-2018-317969

In table 2 of this paper there were errors in the title headings. The terms AQP4-IgG should not be appearing in columns 4 and 6. In the final heading, the v should also be removed.
