Table 1. List of conditions associated with cerebral microbleeds.

Brain diseases	Sporadic small vessel disease	-Sporadic cerebral amyloid angiopathy -Arteriosclerosis
	Genetic small vessel disease	-CADASIL, CARASIL -COL41 mutation -Hereditary forms of cerebral amyloid angiopathy -Fabry's disease
	Other cerebrovascular conditions	-Posterior reversible encephalopathy syndrome -Reversible cerebral vasoconstriction syndrome -Moya-Moya -Inflammatory or immunologically-mediated small vessel disease (vasculitis, infective endocarditis)
	Other	-Traumatic brain injury -Post-radiation treatment -Multiple sclerosis -Refractory epilepsy -Encephalopathies
Extra-cerebral diseases	Heart	-Cardiac valve replacement -Mechanical valves -Cardiopulmonary bypass
	Kidney	-Chronic kidney disease
	Haematological disorders	-Antiphospholipid syndrome -Sickle cell disease -Haemophilia -Thrombotic thrombocytopenic purpura
	Multiple organs failure	-Severe critical conditions -Extra corporeal membrane oxygenation
