DNA sequencing results for the German family: the patient is heterozygous for SOD1:c.112G>C, p.Gly38Arg but not the parents.
Supplement 1b South Korean family

DNA sequencing results for the Korean family: the patient is heterozygous for SOD1:c.268G>A, p.Ala90Thr but not the parents.
Supplement 1c Swedish family

DNA sequencing results for the Swedish family: the patient is heterozygous for SOD1:c.272A>T, p.Asp91Val but not the parents.
Supplement 1d

DNA sequencing results for the Kurdish-Turkish family: the patient is heterozygous for SOD1:c.304G>A, p.Asp102Asn but not the parents.
