Editorial commentary 409
Blood biomarkers: ready for clinical practice?
E Coulthard, A A Hosseini

Neurodegeneration

411 Plasma phosphorylated tau 181 predicts amyloid status and conversion to dementia stage dependent on renal function
S Lehmann, S Scharl-Massche, J-S Vidal, C Delaby, F Blanc, C Paquet, B Allinsquain, S Bombois, A Cabelle, O Hanon

420 Plasma biomarkers for Alzheimer’s disease: a field-test in a memory clinic

428 Elevated plasma p-tau181 levels unrelated to Alzheimer’s disease pathology in amyotrophic lateral sclerosis
V Vacchiano, A Masstrangolo, C Zenesini, S Baiardi, P Avoni, B Polisch, S Capelleti, F Sabli, R Lugon, P Parchi, on behalf of the BoReALS group

436 GSN gene frameshift mutations in Alzheimer’s disease
Y Jiang, M Wan, X Xiao, Z Lin, X Liu, Y Zhou, X Liao, J Li, Hzhou, L Zhou, LW., J Wang, J Guo, H Jiang, Z Zhang, K Xia, J Li, B Tang, B Jiao, L Shen

448 Structural and functional changes in the retina in Parkinson’s disease
J N Alves, B U Wester, A Højlund, R S Weil, S D Salat

Cognitive neurology

457 Cognitive performance is associated with glomerular filtration rate in patients with chronic kidney disease: results from the CKD-REIN cohort
M Pépin, H Levassor, J Bouquinnet, O Lambert, N Alencar de Pinho, M Turnini, C Helmer, M Metzger, L Chebbad, L Fritant, C Combe, D Fouque, M Louville, C Ayov, S Lataif, C Jaqueline, L Tei, B Stengel, Z A Massy, on behalf of CKD-REIN Study Investigators

Neuromuscular

467 Effectiveness of early cycles of fast-acting treatment in generalised myasthenia gravis

Multiple sclerosis

482 Decrease of natalizumab drug levels after switching from intravenous to subcutaneous administration in patients with multiple sclerosis
A A Toorop, Z L E van Kempen, M Steenhuis, J Nitsch, L G F Stinque, G van Dijk, C M Rosendaal, E P J Amelink, E Hoitma, B I Lissenberg-Witte, B A de Jong, B W van Oosten, E M M Strijbis, B M J Udeshihaq, T Rispens, J Killestein, on behalf of the NEXT-MS study group

487 Ocrelizumab concentration and antidrug antibodies are associated with B-cell count in multiple sclerosis

PostScript

494 Letters
