Volume 94 Issue 9 | JNNP September 2023

Editorial commentary
669 Tipping the scales towards routine APOE genotyping
R Dionne, E Coulthard

General neurology
670 APOE genotypes modify the obesity paradox in dementia
M Shinhata, G Gheni, J Hitomi, G Bu, N Sato

757 Serum neurofilament light chain levels at attack predict post-attack disability worsening and are mitigated by inebilizumab: analysis of four potential biomarkers in neuromyelitis optica spectrum disorder

Spinal cord injury
681 Nitrous oxide-induced myeloneuropathy: a case series

Multiple sclerosis
689 Fertility, pregnancy and childbirth in women with multiple sclerosis: a population-based study from 2018 to 2020
M Mocca, G Affaitato, M G Fumo, R Giordana, M Di Cennamo, M Moccia, A Carotenuto, M Petracca, R Lanzillo, M Trassi, V Brescia Meria, R Palladino

698 Association of serum neurofilament light with microglial activation in multiple sclerosis
M Saraste, M Mattila, A Vuorimaa, S Lahtinen, M Sakstorf, D Leppert, J Kuhle, L Anäs

707 Disability accrual in primary and secondary progressive multiple sclerosis

718 Postpartum relapse risk in multiple sclerosis: a systematic review and meta-analysis
C Schubert, I Steinberg, J Peper, C Reman, K Hellings, S Körpe, A Solari, A Giordano, S M Gold, T Friede, C Hessen, A C Roll

Neuro-inflammation
726 Granulocyte activation markers in cerebrospinal fluid differentiate acute neuromyelitis spectrum disorder from multiple sclerosis
D Leppert, M Watanabe, S Schadelein, F Piehl, R Furlan, M Castaldi, J Lambert, B Evertsson, K Fink, T Matsushita, K Matuki, N Isobe, J Kira, P Benken, M Maccesi, E Willems, J Oechtering, A Orleth, S Meier, J Kuhle

This article has been chosen by the Editor to be of special interest and is freely available online.

This article has been chosen in conjunction with the BMJ Patient Forum to be of particular interest to patients and is freely available online.

This article has been made freely available online under the BMJ Journals open access scheme. See http://authors.bmj.com/open-access/.

The article is part of the Impact Commentaries series

The online version of this article contains multiple choice questions hosted on BMJ Learning.
Anti-Argonaute antibodies as a potential biomarker in NMOSD
S Carta, D Le Duy, V Rogemond, N Derache, H Chaumont, A Fromont, S Cabasson, M Boudot de la Motte, J Honnorat, R Marignier

Distinguishing functional from primary tics: a study of expert video assessments
A Rigas, T Mainka, T Pringsheim, A Münchau, I Malaty, Y Werbe, A E Cavanna, A J Lees, A E Lang, D Martino, C Ganos

Visual dysfunction is a better predictor than retinal thickness for dementia in Parkinson’s disease
N Hannaway, A Zarkali, L-A Leyland, F Bremner, J M Nicholas, S K Wagner, M Roig, P A Keane, A Toosy, J Chataway, R S Weil

Changes in the heartbeat-evoked potential are associated with functional seizures

Movement disorders
742

Neuropsychiatry
