

Vestibular dysfunction: a frequent problem in adult mitochondrial diseases

Supplementary Table 2: Risk ratio and Chi squared results for hearing loss and diagnosis of peripheral vestibular disorder in adult mitochondrial diseases

Presence of symptom	Risk of PVD (Risk Ratio 95% CI)	Chi Squared	P Value
Hearing loss	2.22 (0.83-5.92)	4.13	0.042*

Abbreviations: CI, Confidence Intervals; PVD, Peripheral Vestibular Disorder; * = $p \leq 0.05$.
