

Vestibular dysfunction: a frequent problem in adult mitochondrial diseases

Supplementary Table 3: Summary of NMDAS descriptive statistics and logistic regression results to ascertain prediction of neuro-otological diagnosis in adult mitochondrial diseases

NMDAS	Median (IQR)	R²	P Value
Total Score	22.82 (16.24-21.55)	0.020	0.40
Vision	1 (0-2)	0.064	0.31
Hearing	2 (0-3)	0.15	0.055
Balance	2 (1-3)	0.018	0.46
Ptosis	0 (0-1)	0.010	0.57
CPEO	0 (0-0)	0.030	0.37
Ataxia	2 (0-3)	0.018	0.46
Neuropathy	0 (0-0.5)	0.0030	0.77

Abbreviations: CPEO, Chronic Progressive External Ophthalmoplegia; IQR, Interquartile Range; NMDAS, Newcastle Mitochondrial Disease Scale for Adults.
