

Supplementary Figures:

SF1: Tests which performed best in older patients: i) sensitivity; ii) specificity

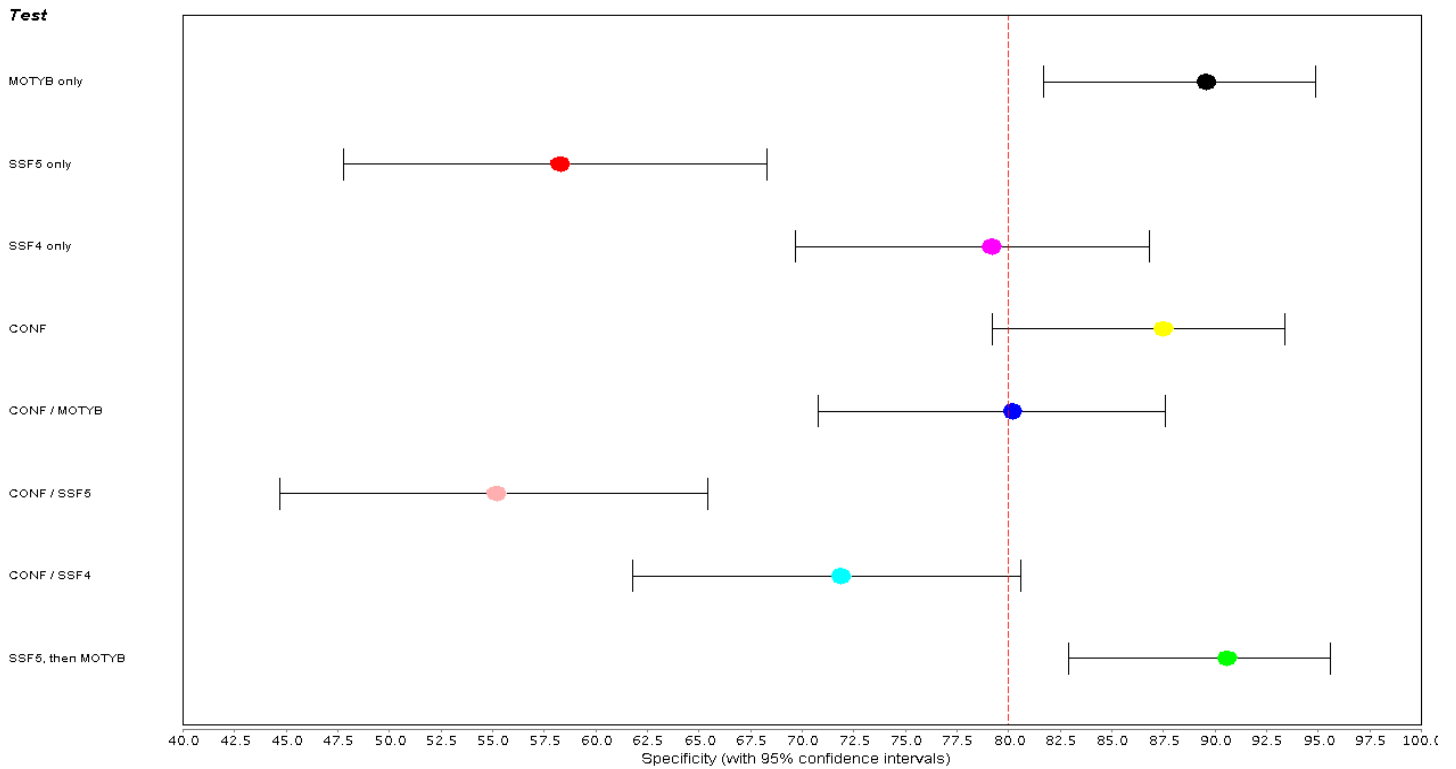

i)

Older patients, best tests (sensitivity), n=133

ii)

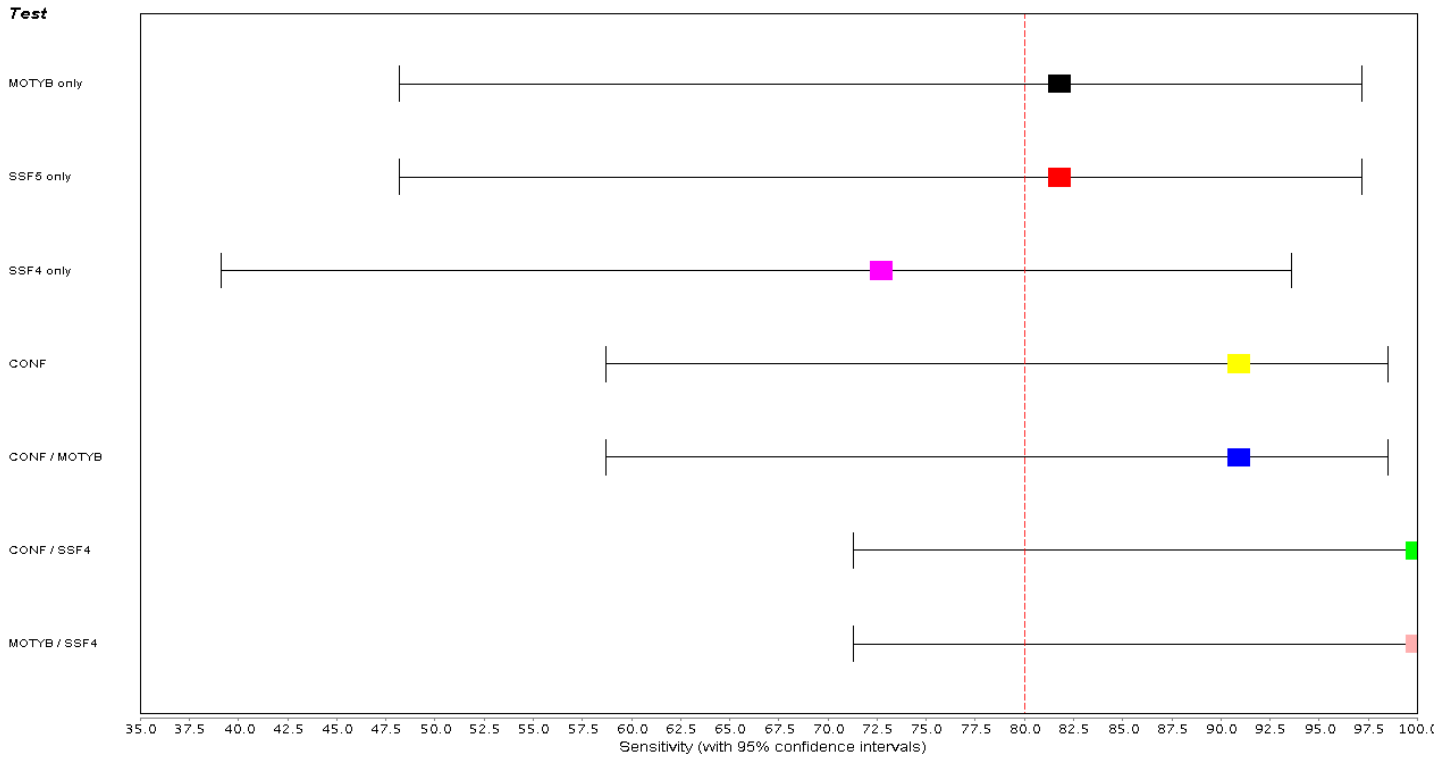

Older patients, best tests (specificity), n=133

SF2: Tests which performed best in younger patients: i) sensitivity; ii) specificity

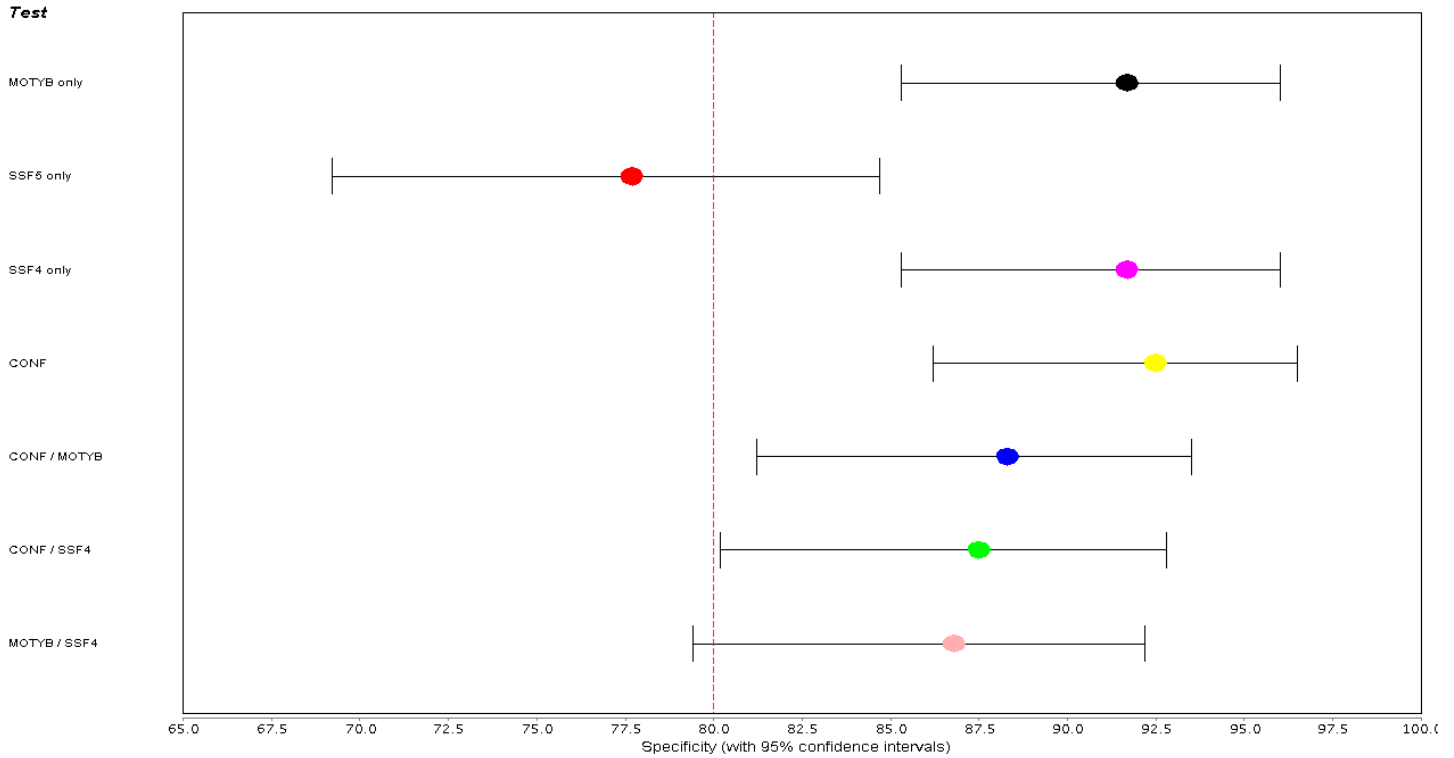

i)

Younger patients, best tests (sensitivity), n=132

ii)

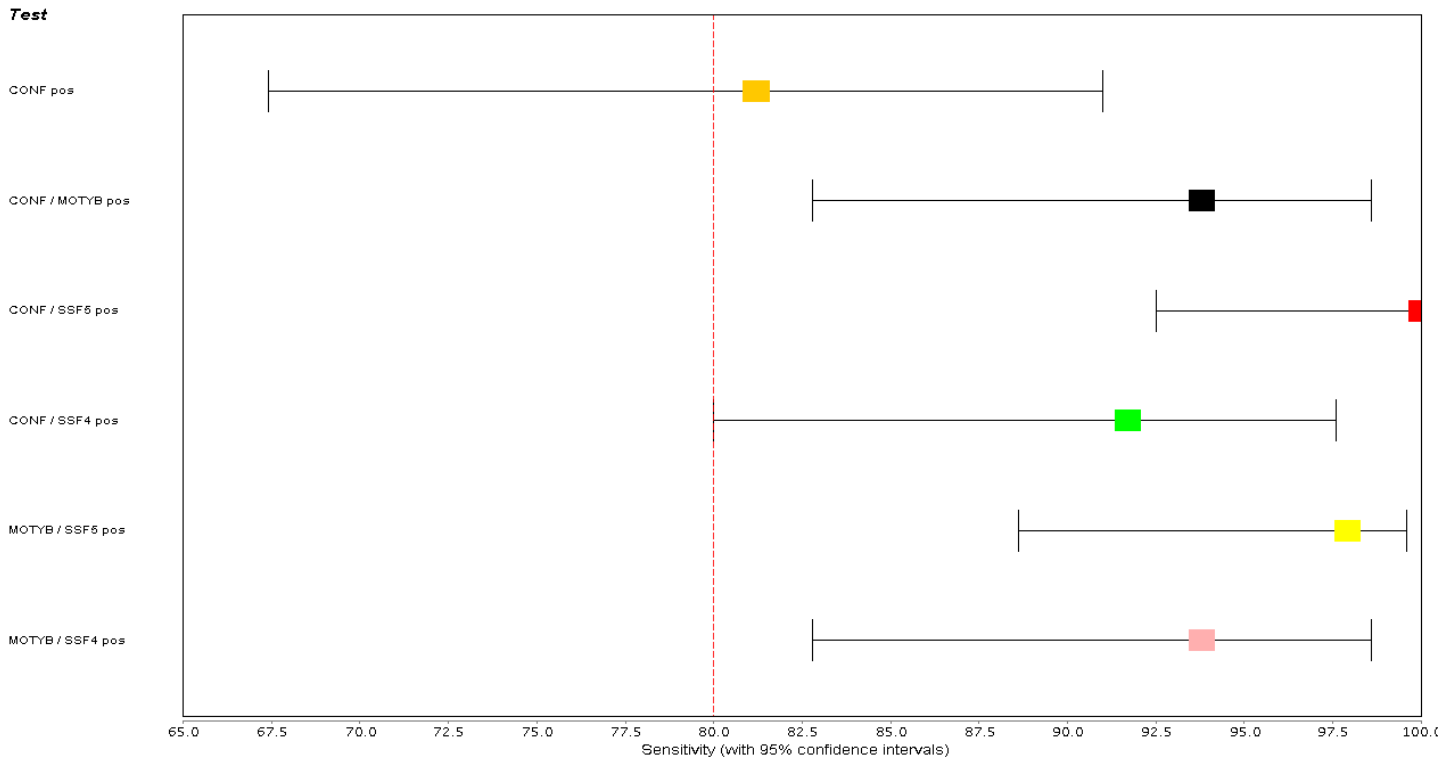

Younger patients, best tests (specificity), n=132

SF3: Performance of simultaneous combinations, scenario a (all patients): i) sensitivity; ii) specificity

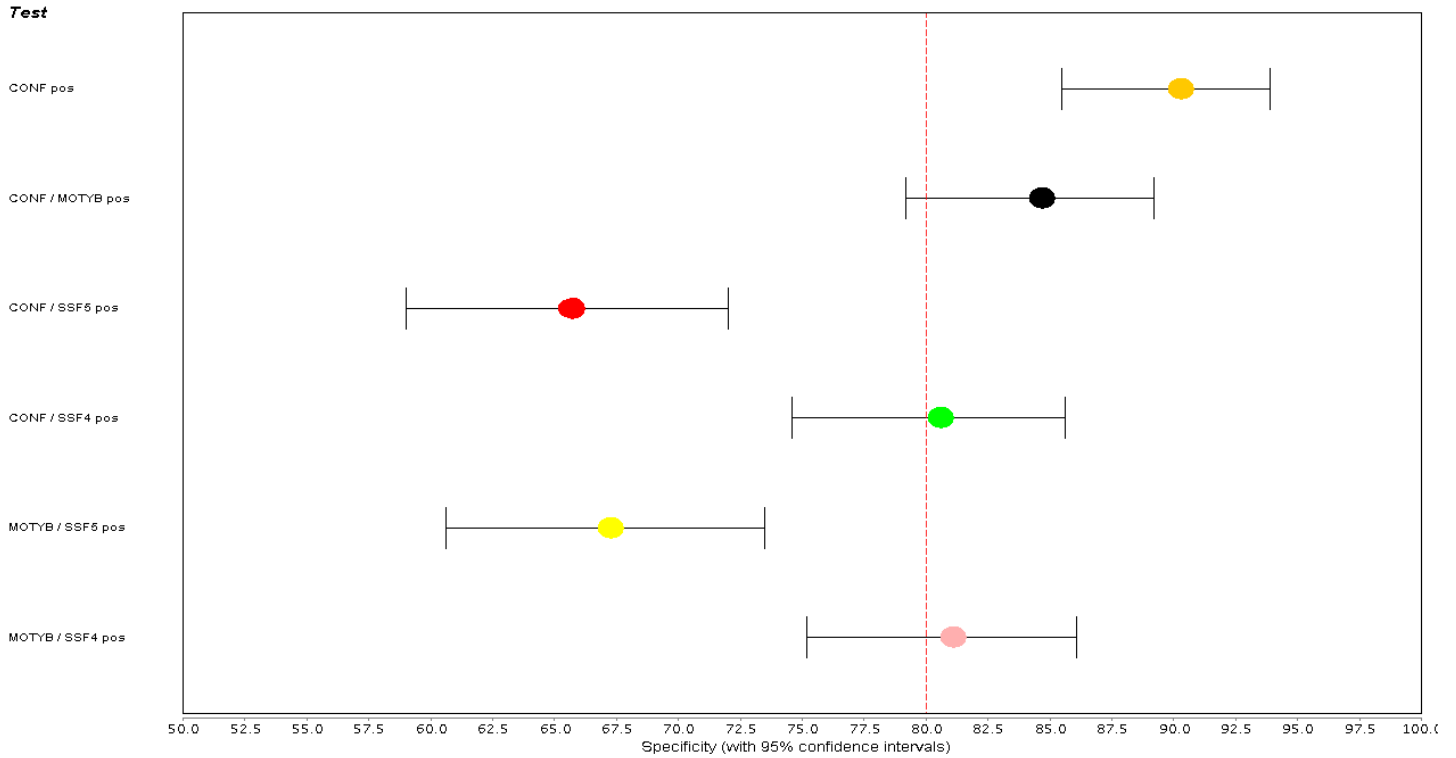

i)

All patients, sensitivity of simultaneous (a) combinations, n=265

ii)

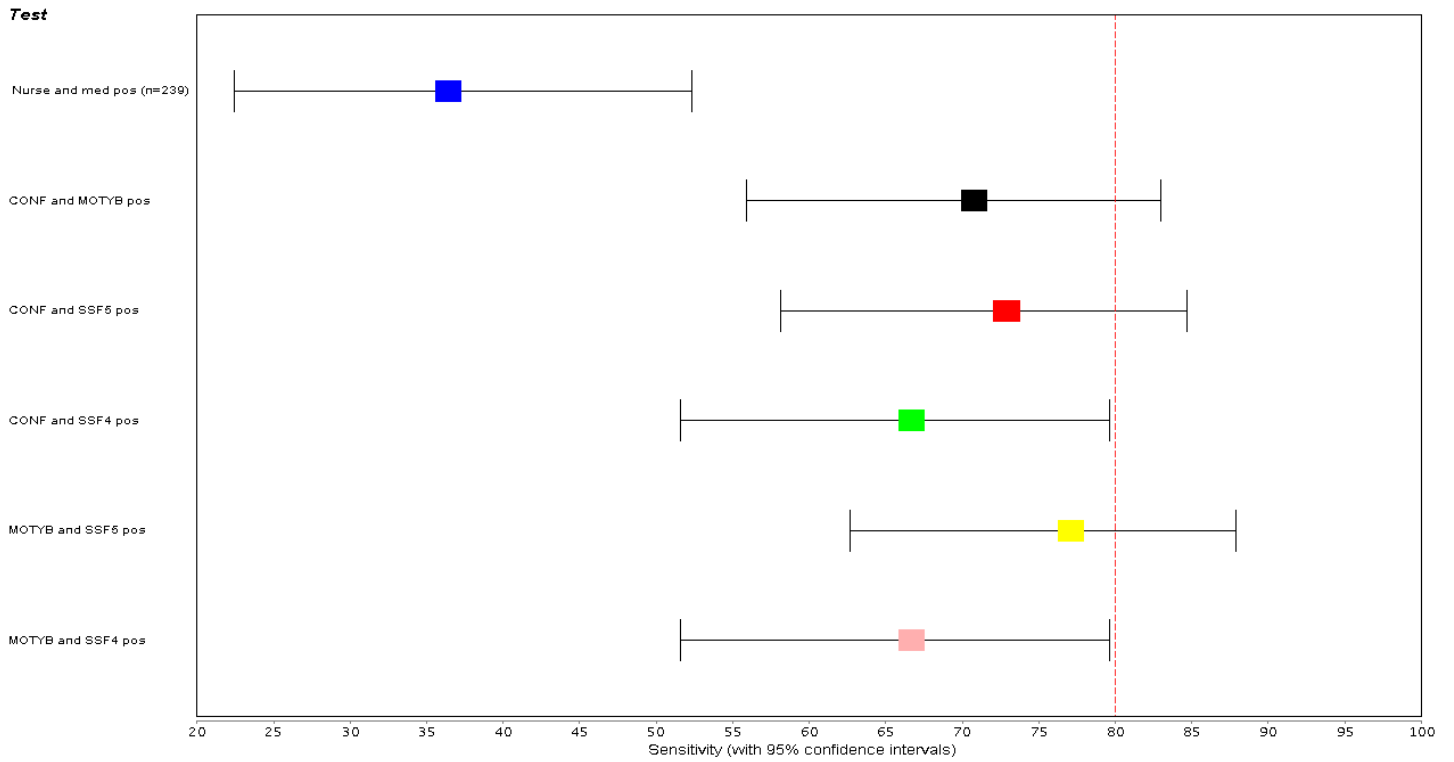

All patients, specificity of simultaneous (a) combinations, n=265

SF4: Performance of simultaneous combinations, scenario b (all patients): i) sensitivity; ii) specificity

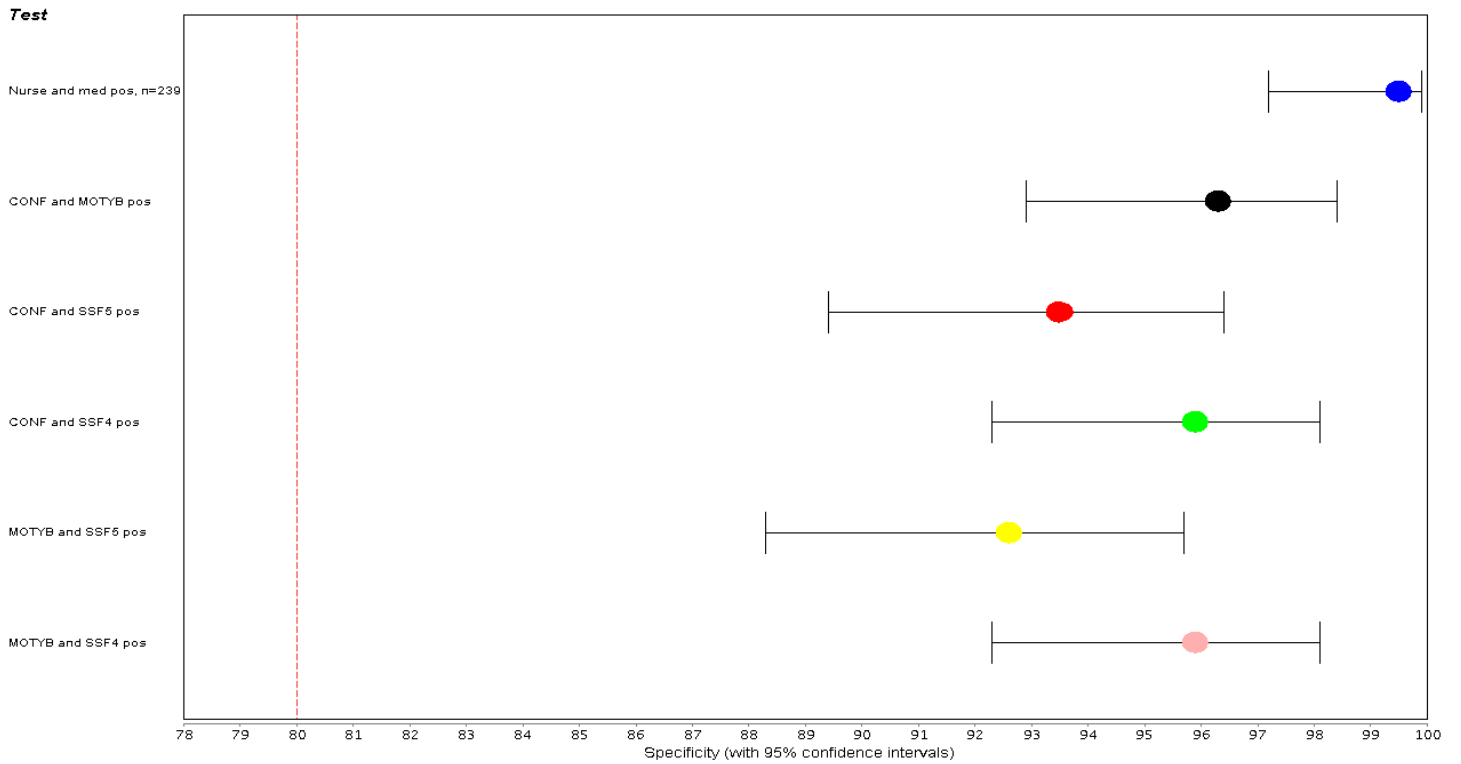

i)

All patients, sensitivity of simultaneous (b) combinations, n=265

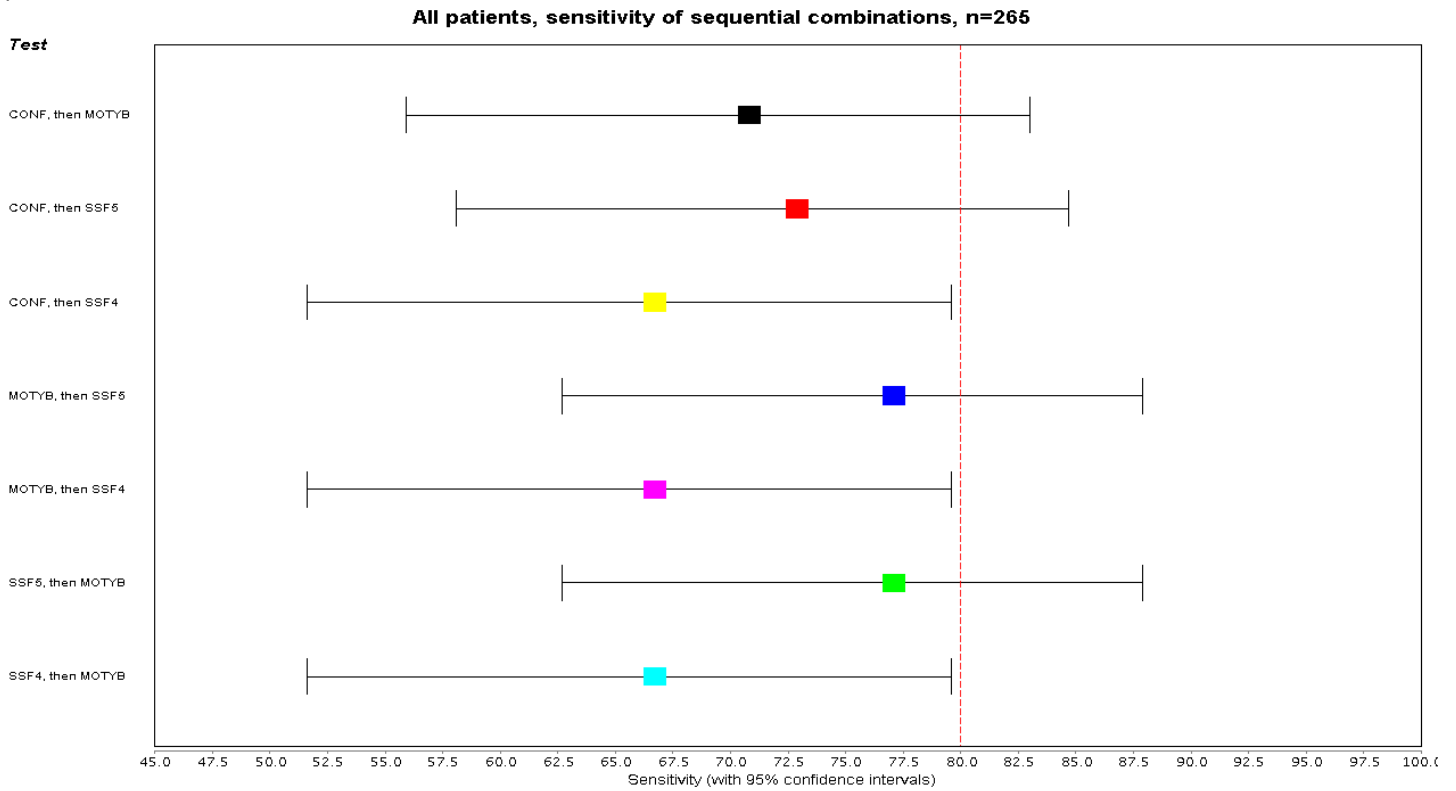

ii)

All patients, specificity of simultaneous (b) combinations, n=265

SF5: Performance of sequential combinations (all patients): i) sensitivity; ii) specificity

i)

ii)
