

Supplementary Figures and tables

**Supplementary figure 1: Overall survival for rs12608932 polymorphism under an additive model.**

The p-value indicates the difference in cumulative risk between homozygous C-allele carriers vs heterozygotes vs homozygous A-allele carriers.

Supplementary figure 2: Survival probability adjusted for sex, age at onset and site of onset for rs12608932 polymorphism under a recessive model.

Supplementary figure 3: Survival probability adjusted for sex, age at onset and site of onset for rs12608932 polymorphism under a recessive model.
